Glossary	vii
Symbols	ix
Contents	xiii
1 Introduction	1
2 Fundamentals	3
2.1 Magnetism	3
2.1.1 Magnetic fields	3
2.1.2 Paramagnetism	4
2.1.3 Diamagnetism	5
2.1.4 Ferromagnetism, Ferrimagnetism and Antiferromagnetism	5
2.2 Magnetic nanoparticles	6
2.2.1 Structure and Composition	7
2.2.2 Superparamagnetism	8
2.2.3 Interparticle interactions	9
Magnetic dipole-dipole interactions	9
Electrostatic interactions	10
Steric interactions	11
Total interparticle interaction	11
2.2.4 Static magnetic properties	12
2.2.5 Dynamic magnetic properties	13
Influence of magnetic fields	14
Influence of magnetic dipole-dipole interactions	15
Influence of superimposed static magnetic fields	15
2.2.6 Effective relaxation	15
2.2.7 Response to time dependent magnetic fields	16
Time domain: step response	16
Frequency domain: Debye model	16
2.2.8 Structure formation in MNP suspensions	18
2.2.9 Applications	19
2.3 Liquid crystals	20
2.3.1 Mesophases	20
Nematic phase	20
Smectic phase	20
Columnar phase	21
2.4 Optical properties	21
2.4.1 Refractive indices and birefringence	21
2.4.2 Polarized optical microscopy	23
2.5 Magnetic nanoparticles and liquid crystals	24
2.5.1 Ferromagnetic nematics: state of the art	25
2.5.2 Barium hexaferrite	26

3	Magnetization dynamics of nanoplatelet suspensions	27
3.1	Measurement setup	28
3.2	Sample preparation	29
3.3	Relaxation of single particles	30
3.3.1	Measurement results	30
3.3.2	Shape dependence of the zero-field Brownian relaxation time	34
	Spherical particles	34
	Thin disk particles	35
	Cylindrical particles with varying aspect ratios	35
3.3.3	Discussion	36
3.3.4	Conclusion	37
3.4	Magnetization dynamics in suspensions with constant surfactant molarity . .	38
3.4.1	Measurement results	38
3.4.2	Isotropic suspensions	41
3.4.3	Nematic suspension	44
3.4.4	Discussion	45
3.4.5	Conclusion	47
3.5	Decoupling the role of electrostatic interactions and magnetic interactions . .	47
3.5.1	Measurement series	48
3.5.2	Influence of electrostatic interactions	49
	Discussion	52
3.5.3	Influence of magnetic interactions	52
	Discussion	57
3.5.4	Conclusion	57
3.6	Multimodal magnetization dynamics in AC and DC fields	58
3.6.1	Measurement results	58
	AC excitation	58
	AC excitation with superimposed DC offset fields	60
3.6.2	Discussion	62
3.6.3	Conclusion	63
4	Magneto-optical measurement system	65
4.1	Basic operation principle	65
4.1.1	Key metrics	67
4.2	Hardware	68
4.2.1	Excitation	68
	3-axis coil system	69
	Current drivers	72
4.2.2	Optical components	75
4.2.3	Analog input and output device	76
4.3	Measurement modes and their implementations	77
4.3.1	Generation of oscillating and rotating fields	78
	In-phase and quadrature detection	78
	Automated measurement routines	79
4.3.2	Step-response measurements	81
4.3.3	Static ambient field compensation	82
4.4	Stripe formation in oscillating magnetic fields	84
4.4.1	Materials and methods	84
4.4.2	Measurement results	85
4.4.3	Discussion	86
4.4.4	Conclusion	88

5	Conclusion and Outlook	89
6	Appendix	93
A	Calculation of the transmitted intensity under crossed polarizers in POM . .	93
B	Scientific contributions	95
B.1	Publications	95
B.2	Conference contributions	95
	List of Figures	97
	List of Tables	99
	References	101
