<b>1</b>	<b>The Power of Boston: Why Is the Boston Marathon the Greatest? .....</b>	<b>11</b>
<b>2</b>	<b>My All-Time Favorite Marathon: Sharing Boston 1996 With My Dad ..</b>	<b>12</b>
<b>3</b>	<b>Six Steps to Qualifying for the Boston Marathon .....</b>	<b>14</b>
<b>4</b>	<b>How to Choose the Right Course—Some are Faster .....</b>	<b>16</b>
	• Websites	
	• Pick 3 races in a row	
	• Races with the highest percentage of qualifiers	
<b>5</b>	<b>A Tour of the Boston Course With Bill Rodgers .....</b>	<b>19</b>
<b>6</b>	<b>How to Qualify and Enter .....</b>	<b>25</b>
<b>7</b>	<b>A Blending of Key Elements .....</b>	<b>26</b>
	• Set realistic goals each season	
	• How much improvement one can expect	
	• Use the "magic mile" time trial in this book to monitor improvement	
	• The long runs are the most important training component	
	• There must be significant rest between stress workouts	
	• Back off when your "gut instinct" tells you that you may be getting injured	
	• Cadence drills improve efficiency	
	• Acceleration-gliders train the muscles to "shift gears"	
	• Hills build strength and improve performance	
<b>8</b>	<b>For Extra Credit .....</b>	<b>29</b>
	Workouts, compression sleeves, supplements, mental training, water running, heart monitors	
<b>9</b>	<b>Training Schedules: .....</b>	<b>31</b>
	Time goal 3:05.....	32
	Time goal 3:10.....	36
	Time goal 3:15.....	40
	Time goal 3:25.....	44
	Time goal 3:30.....	48
	Time goal 3:35.....	52
	Time goal 3:40.....	56
	Time goal 3:45.....	60
	Time goal 3:55.....	64
	Time goal 4:00.....	68
	Time goal 4:10.....	72
	Time goal 4:25.....	76
	Time goal 4:40.....	80

Time goal 4:55 .....	84
Time goal 5:10 .....	88
Time goal 5:25 .....	92
<b>10 What If? .....</b>	<b>97</b>
• Race weekend doesn't match up with the training plan	
• If race day conditions are not right...	
• Injury interruption	
• Sickness interruption	
• Career, vacation, family interruptions	
• Cross training can keep you fit, if you must stop running	
<b>11 The Galloway Run-Walk-Run Method.....</b>	<b>101</b>
"Walk breaks give you control over your training and your fatigue."	
• Walk before you get tired	
• A short and gentle walking stride	
• No need to ever eliminate the walk breaks	
• How to keep track of the walk breaks	
• Strategies by pace per mile	
<b>12 The "Magic Mile" Is Your Reality Check .....</b>	<b>105</b>
• The best predictor of performance	
• How to do the "MM"	
• Galloway's Performance Predictor	
• The "leap of faith" goal prediction—how much?	
<b>13 Your Journal—The Best Planning and Evaluation Tool .....</b>	<b>111</b>
• The planning process	
• The data recording	
• Morning pulse as a guide for overstress	
<b>14 Form Improvement Drills—To Make Running Faster and Easier .....</b>	<b>117</b>
<b>15 The Principles of Great Running Form .....</b>	<b>121</b>
• I believe that running is an inertial activity	
• Relaxed muscles	
• The big three: posture, stride and bounce	
<b>16 Hill Training Builds Strength—And More.....</b>	<b>127</b>
• The Hill Workout	
• Hill Running Form	
• Hill training strengthens lower legs and improves running form	
• Running faster on hills in races	
• Downhill form	
• Biggest mistakes: too long a stride, bouncing too much	

## **17 Speed Training Prepares You for Top Performance ..... 131**

- Gradually pushing up the workload
- Stress + Rest = Improvement
- Introducing the body to speed through "drills"
- A gentle increase in your weekly workouts causes a slight breakdown
- The damage
- Beware of junk miles
- Speed training gets you into the anaerobic zone: producing an oxygen debt
- The anaerobic threshold
- The talk test—how aerobic are you?
- Fast Twitch vs. Slow Twitch Muscle Fibers
- Are you working too hard toward a time goal?
- The personal growth of speed training

## **18 How Speed Training Works ..... 139**

- Sustained Speed—through an increase in the number of repetitions
- Longer runs improve endurance—and help you improve finish time
- Running form improves
- Watch out! Speedwork increases aches, pains and injuries
- Beware of the ego

## **19 Race Day! ..... 142**

- Rehearsal
- The afternoon before
- Race number
- Computer chip
- Eating issues
- Drinking
- Pack your bag
- Race day checklist
- After the start
- After mid-race
- The next day

## **20 Mental Toughness ..... 151**

- Left brain vs. right brain
- Three strategies for staying mentally tough
  - I. Rehearsing Success
  - II. Magic Words
  - III. Dirty Tricks

## **21 Cross Training: Getting Better as You Rest the Legs ..... 157**

- Cross training activities
- Ease into a new exercise!
- Water running can improve your running form
- Fat burning and overall fitness exercises

- Cross training for the upper body
- Weight training
- Don't do these on a non-running day!

## **22 Dealing with the Heat..... 163**

- "Forget about a personal record when it's over 60F"
- Hot long runs: when to run, don't wear a hat, taking a pool break, sun screen
- How to adjust pace as the temperature increases
- Heat disease alert: symptoms, risk factors and action plan
- Heat adaptation workout
- Maintaining heat adaptation during the winter

## **23 Choosing the Best Shoe for You..... 169**

- How to choose a really good running store
- How to determine your foot type
- Choosing shoes by foot shape and function
- Go by fit and not the size noted on the box
- Racing shoe or lightweight training shoe?
- Shoes for women
- Breaking in a new shoe
- How do you know when it's time to get a new shoe?

## **24 The Clothing Thermometer ..... 175**

## **25 Practical Eating Issues ..... 177**

- Eating the day before a run, right before a run and during a run
- How much fluid to drink the day before, the morning of a run and during the run
- Preventing side pains
- Maintaining stable blood sugar levels during a run
- The bad side of fat
- Electrolytes
- Drinking/eating schedule before a hard morning run
- Eating during a run
- It is important to re-load after exercise—within 30 minutes

## **26 Troubleshooting Performance ..... 181**

- Times are slowing down at end
- Slowing down in the middle of the race
- Nauseous at the end
- Tired during workouts

## **27 Problems/Solutions..... 183**

- Side pain
- I feel great one day... and not the next
- Cramps in the muscles

- Upset stomach or diarrhea
- Headache

## **28 Staying Injury-Free..... 189**

- Be sensitive to weak links
- How do you know that you are injured?
- Treatment options
- Treatments while you are waiting to see a doctor
- Preventing injury
- Don't stretch!
- Do the "toe squincher" exercise (prevention of foot and heel injuries)
- Don't increase total mileage or minutes more than 10 %  
a week more than 2 weeks in a row.
- Drop total mileage in half every 3<sup>rd</sup> or 4<sup>th</sup> week
- Avoid a long stride—whether walking or running

## **29 Injury Troubleshooting ..... 193**

- Quick treatment tips
- For all injuries
- Muscle injuries
- Tendon and foot injuries
- Knee injuries
- Shin injuries
- Best cross training modes to maintain your running conditioning

## **30 Treatment Suggestions—From One Runner to Another ..... 197**

- Knee pain
- Outside of knee pain—Iliotibial Band Syndrome
- Shin pain—"Shin Splints" or Stress Fracture
- Heel pain—Plantar Fascia
- Back of foot—Achilles tendon
- Hip and groin
- Calf muscle

## **31 Products That Enhance Running..... 203**

- The Stick
- Endurox R4
- Other Galloway Books: training schedules, and gifts that  
keep on giving—even to yourself
