	INTRODUCTION: YOU CAN DO IT!	12
1	WHY DO WOMEN LOVE THE HALF MARATHON?	14
2	READ THIS FIRST (TO STAY INJURY-FREE)	
3	SETTING GOALS AND PRIORITIES	18
	Top three goals (even for time-goal runners)	19
	Running enjoyment	19
	Stay injury-free (a training journal helps)	19
	Avoiding overuse or burnout	19
	Become the captain of your ship	20
	When to set a time goal	20
4	IMPORTANT HEALTH INFORMATION	21
	Medical check	21
	Risks: heart disease, lung infections, speedwork injuries	22
	Should I run when I have a cold?	23
	Risk of speed	23

PRACTICAL INFORMATION: SHOES AND EQUIPMENT	24
Convenience	24
Shoes	
A watch	
A Run-Walk-Run timer	
Clothing: comfort above all	
A training journal	
Where to run	
Safety – top priority!	
Surface	
Picking a running companion	
Rewards	
An appointment on the calendar or in your training journal	
Motivation to get out the door	
Treadmills are just as good as streets for short runs	
Usually no need to eat before the run	29
THE GALLOWAY RUN-WALK-RUN METHOD	30
Walk before you get tired	30
A short and gentle walking stride	31
No need to eliminate the walk breaks	32
How to keep track of the walk breaks	32
Run-Walk-Run ratios	32
CHOOSING THE RIGHT GOAL AND PACE	34
Prediction strategy	34
The "Magic Mile" time trial (MM)	35
How hard should I run the MM?	36
Galloway's performance predictor	36
First-time half marathoners – run to finish only	
Time goal runners may make a "leap of faith" goal prediction	
How much of a "leap of faith" improvement?	
"Magic Mile" time trials (MM) give you a reality check	
Final reality check	40
Use a journal!	40
PRIMARY TRAINING COMPONENTS	41
Long runs	
Drills	
Hills	
"Magic Mile" time trials (MM)	42

		introducing the body to speed through "drills"	/4

	A gentle increase in speedwork causes a slight breakdown	75
	The damage	75
	The damage stimulates the muscles, tendons, etc.,	
	to rebuild stronger and better than before	
	You must have enough rest – if you want to rebuild stronger and better	76
	Quality rest is crucial: 48 hours between workouts	76
	Beware of junk miles	77
	Regularity	
	"Muscle memory"	
	Aerobic running is done during long runs	77
	Speed training gets you into the anaerobic zone: an oxygen debt The anaerobic threshold	
	The talk test - how aerobic are you?	
	Are you working too hard toward a time goal?	
	The personal growth of speed training	79
14	HOW SPEED TRAINING WORKS	80
• •	800-meter repeats are run 15 seconds faster than half-mile goal pace	
	Keep going when tired – through an increase in the number of repetitions	
	Longer runs maintain endurance – and improve your time	
	Running form improves	
	Watch out! Speedwork increases aches, pains, and injuries	
15	RACE DAY TIMETABLE	82
	Faster?	83
	Resources: Where to find out about races	83
	How to register – enter early!	85
	Rehearsal	85
	The afternoon before	86
	Race number	86
	Computer chip	86
	The carbo-loading dinner	86
	Drinking	87
	The night before	87
	Sleep	
	Race day checklist	
	After the start	
	At the finish	
	After the finish	
	The next day	91

16	YOUR JOURNAL WILL INSPIRE YOU	92
	Journal keepers are more likely to be lifelong runners	93
	Restoring order	93
	A simple reward can pull you out of the dumps	94
	This is your book	94
	Can you capture the fleeting thoughts of the right brain?	94
	The various types of journals	96
	An organized running journal	96
	Notebook	96
	Computer logs	96
	The writing process	97
	Are you tired or just lazy? Your morning pulse may tell	98
17	RUNNING FORM	100
	A better way of running?	101
	The big three: posture, stride, and bounce	101
	Four negative results of inefficient form	102
	If you feel relaxed and running is easy even at the end of a run,	
	you're probably running correctly	102
	Posture	102
	Feet low to the ground	104
	Stride length	
	Cadence drill	
	Walking form	107
18	WOMEN-SPECIFIC EXERCISE ISSUES BY BARBARA GALLOWAY	108
	Movement of internal organs	
	Breast issues	109
	Bras	
	Bra fitting	
	Chaffing issues	111
	Incontinence
