Preface *ix*

1	Introduction to Nanotechnology	1
1.1	Introduction	1
1.2	Importance of Size in Nanotechnology	2
1.3	Approaches in Nanotechnology	2
1.3.1	Top-Down Approach	2
1.3.2	Bottom-Up Approach	3
1.4	Impact of Nanotechnology	4
1.4.1	Sensors for the Automotive Industry	4
1.4.2	Health and Medicine	5
1.4.3	Energy and Environment	5
1.4.4	National Security	5
1.5	Nanotechnology Applications	6
1.5.1	Information Technology	6
1.5.2	Energy	6
1.5.3	Medicine	6
1.5.4	Consumer Goods	6
1.6	Summary and Challenges	6
	References	8
2	Biomaterials in Medicine	11
2.1	Introduction	11
2.2	Biodegradable Polymers	20
2.3	Natural Biomaterials	25
2.3.1	Gelatin	26
2.3.2	Pectin	27
2.3.3	Chitosan	28
2.3.4	Cyclodextrins (CDs)	29
2.3.5	Dextran, Dextran–Spermine (D-SPM)	30
2.3.6	Miscellaneous Polysaccharide Polymers	32
2.3.6.1	Pullulan	32
2.3.6.2	Schizophyllan	33
2.3.6.3	Alginate Acid	33
2.3.6.4	Hydroxypropyl Cellulose	33

2.3.6.5	Glycosaminoglycans	33
2.3.7	Modified Polysaccharides as Gene Delivering Agents	35
2.3.8	Cationic Lipid	38
2.4	Biodegradable Nanoparticles	39
	References	40
3	Classification of Nanomaterials	47
3.1	Introduction	47
3.2	Classification of Nanomaterials	48
3.2.1	Nanoparticles	48
3.2.2	Nanofibers, Nanowires, and Nanorods	49
3.2.3	Self-assembly of Proteins and Peptides	52
3.3	Nanocarriers	54
3.3.1	Nanocarriers in Gene Therapy Technology	54
3.3.2	Nanocarriers in siRNA Technology	55
3.3.3	Colloidal Carrier System	57
3.3.4	Nanoparticulate System	59
3.4	Nanoscaffolding Materials	59
	References	60
4	Nanomaterials in Gene Therapy Technology	63
4.1	Introduction	63
4.2	Approaches to Gene Therapy	64
4.2.1	Viral Vectors for Gene Delivery	64
4.2.2	Nonviral Vectors for Gene Delivery	65
4.2.2.1	Cationic Polymers	65
4.2.2.2	Cationic Lipid	72
4.2.2.3	Conventional Phosphate Method	72
4.2.2.4	Cell-Receptor-Mediated Uptake	72
4.3	Physical Methods for Gene Delivery	78
4.4	Combination of Physical and Nonviral Methods to Enhance DNA Nanoparticle Uptake by the Cells	80
4.5	Summary	91
	References	92
5	Nanomaterials in Gene-Silencing Technology	109
5.1	Introduction	109
5.2	Gene Silencing	110
5.2.1	siRNAs	110
5.2.2	shRNAs	110
5.2.3	miRNAs	111
5.3	Approaches to siRNA Delivery Systems	111
5.4	siRNA Technology in Cancer Therapy	113
5.5	Future Prospects	114
	References	114

6	Imaging Technology	117
6.1	Introduction	117
6.2	Polymeric Nanoparticles in MRI Technology and Disease Therapy	119
6.3	Surface-Coating Polymer in Nanoparticles	121
6.4	Drug Delivery with Polymeric Nanoparticles	122
6.5	Stimuli-Sensitive Drug Delivery	123
6.6	Multifunction of Targeted Drug Delivery	124
6.7	Gene Transfer via Polymeric Nanoparticles in Drug Delivery	124
6.8	Magnetic Hyperthermia	125
6.9	Future Prospects	126
	References	126
7	Nanotechnology in Natural Hydrogel	133
7.1	Introduction	133
7.2	Mechanical Properties of Hydrogels and Interpenetrating Networks	134
7.3	Engineering Hydrogels with Controlled Mechanical, Chemical, and Biological Properties	138
7.4	Developing Methods of Fabricating Composite Biodegradable Hydrogels Using IPNs	139
7.5	Engineering Approaches to Deliver Growth Factors from Hydrogels	142
7.6	Drug Delivery Systems Using Polymeric Hydrogel	143
7.7	RNA-Responsive Hydrogels	146
7.8	DNA-Responsive Hydrogels	146
7.9	Aptamer-Responsive Hydrogels	147
	References	148
8	Nanotechnology in Tissue Engineering	151
8.1	Introduction	151
8.2	3D <i>In vitro</i> Systems	153
8.2.1	Porous Scaffolds	153
8.2.2	Hydrogels	156
8.2.3	Self-assembly of Proteins	158
8.3	Cellular Microenvironment	160
8.3.1	Extracellular Matrix	160
8.3.2	Cellular Microenvironment (Niche)	160
8.3.3	Nerve Tissue	161
8.4	3D Technology on Frontier of Neuroscience	162
8.4.1	Tissue Engineering	162
8.4.2	Development of 3D <i>In vitro</i> Cell Culture Technology	164
8.4.3	Nerve Regeneration in 3D Models	164
8.4.4	Nanotechnology in Neuroscience	166
8.5	Regenerative Medicine Therapy	167
8.5.1	Specific Mediated Nanomaterials	167
8.5.1.1	Three-Dimensional Peptide Matrices	168

8.5.1.2	<i>In vitro</i> Biological Approaches of Self-Assembled Systems	169
8.5.1.3	Antimicrobial Activities	169
8.5.1.4	Cell Culture Scaffold for Tissue Engineering	170
8.5.1.5	Drug and Gene Delivery	171
8.5.2	Biom mineralization Materials	174
8.5.3	Self-Assembled Systems in Regenerative Medicine Therapy	174
8.5.4	Enhancement of Angiogenesis in Self-Assembled Systems	175
8.5.5	Enhancement of Bone Regeneration in Self-Assembled Systems	178
8.5.6	Other Forms of Self-Assembled Systems in Regenerative Medicine	178
8.6	Future Prospects	179
	References	180
9	Safety Issue of Nanomaterials	187
9.1	Introduction	187
9.2	Biocompatibility and Toxicity of Nanomaterials	188
9.2.1	<i>In vitro</i> Biological Approaches of Nanomaterials	188
9.2.2	Cell Cytotoxicity Assay	190
9.2.3	Chemical Reference Standard	190
9.3	Safety Issue of Nanomaterials	191
9.3.1	Quality Assurance Statement	191
9.3.2	Environmental, Health, and Safety Issues of Nanomaterials	192
9.3.3	Biohazard of Nanomaterials	193
9.4	Limitations of Nanomaterials Technology in Nature and Medicine	194
9.5	Future Prospects	195
	References	196
	Index	203
