## Part I Rhodium(I) Catalysis 1

<b>1</b>	<b>Rhodium(I)-Catalyzed Asymmetric Hydrogenation</b>	<b>3</b>
	<i>Tsuneo Imamoto</i>	
1.1	Introduction	3
1.2	Chiral Phosphorus Ligands	3
1.2.1	P-Chirogenic Bisphosphine Ligands	4
1.2.1.1	Electron-Rich C <sub>2</sub> Symmetric Ligands	4
1.2.1.2	Three-Hindered Quadrant Ligands	5
1.2.1.3	Ligands Bearing Two or Three Aryl Groups at the Phosphorus Atom	5
1.2.2	DuPhos, BPE, and Analogous Ligands	6
1.2.3	Ferrocene-Based Bisphosphine Ligands	7
1.2.4	C <sub>2</sub> Symmetric Triaryl- or Diarylphosphine Ligands with Axial Chirality	9
1.2.5	Phosphine–Phosphite and Phosphine–Phosphoramidate Ligands	9
1.2.6	Other Bidentate Ligands	9
1.2.7	Monodentate Phosphorus Ligands	11
1.3	Application of Chiral Phosphorus Ligands in Rhodium-Catalyzed Asymmetric Hydrogenation	12
1.3.1	Hydrogenation of Alkenes	12
1.3.1.1	Hydrogenation of Enamides	12
1.3.1.2	Hydrogenation of Enol Esters	18
1.3.1.3	Hydrogenation of $\alpha,\beta$ -Unsaturated Acids, Esters, and Related Substrates	19
1.3.1.4	Hydrogenation of Other Functionalized Alkenes	21
1.3.1.5	Hydrogenation of Unfunctionalized Alkenes	24
1.3.1.6	Hydrogenation of Heteroarenes	24
1.3.2	Hydrogenation of Ketones	25
1.3.3	Hydrogenation of Imines, Oximes, and Hydrazones	26
1.4	Enantioselection Mechanism of Rhodium-Catalyzed Asymmetric Hydrogenation	27

1.5	Conclusion	28
	References	29
<b>2</b>	<b>Rhodium(I)-Catalyzed Hydroboration and Diboration</b>	<b>39</b>
	<i>Kohei Endo</i>	
2.1	Introduction	39
2.2	Hydroboration of Alkenes	39
2.2.1	Development of Catalyst Systems	39
2.2.2	Enantioselective Reactions	41
2.2.3	Hydroboration of Functionalized Molecules	44
2.3	Diboration	45
2.3.1	1,1-Diboration Reactions	45
2.3.2	1,2-Diboration Reactions	45
2.4	Conclusion	46
	References	47
<b>3</b>	<b>Rhodium(I)-Catalyzed Hydroformylation and Hydroamination</b>	<b>49</b>
	<i>Zhiwei Chen and Vy M. Dong</i>	
3.1	Introduction	49
3.2	Rhodium(I)-Catalyzed Hydroformylation	49
3.2.1	Asymmetric Hydroformylation of Challenging Substrates	49
3.2.2	Transfer Hydroformylation	50
3.3	Rhodium(I)-Catalyzed Hydroamination	54
3.3.1	Asymmetric Rhodium(I)-Catalyzed Hydroamination	54
3.3.2	Anti-Markovnikov Rhodium(I)-Catalyzed Hydroamination	56
3.4	Conclusion	59
	References	61
<b>4</b>	<b>Rhodium(I)-Catalyzed Hydroacylation</b>	<b>63</b>
	<i>Maitane Fernández and Michael C. Willis</i>	
4.1	Introduction	63
4.2	Rhodium(I)-Catalyzed Intramolecular Hydroacylation	63
4.2.1	Small Ring Synthesis: Five-Membered Rings	63
4.2.2	Larger Ring Synthesis: Six-, Seven-, and Eight-Membered Rings	66
4.3	Rhodium(I)-Catalyzed Intermolecular Hydroacylation	68
4.3.1	N-Based Chelation Control	69
4.3.2	O-Based Chelation Control	70
4.3.3	S-Based Chelation Control	73
4.3.4	C=O as a Directing Group for Hydroacylation	79
4.4	Conclusion	81
	References	81
<b>5</b>	<b>Rhodium(I)-Catalyzed Asymmetric Addition of Organometallic Reagents to Unsaturated Compounds</b>	<b>85</b>
	<i>Hsyueh-Liang Wu and Ping-Yu Wu</i>	
5.1	Introduction	85

5.2	$\alpha,\beta$ -Unsaturated Ketones	85
5.2.1	Chiral Phosphorus Ligands	85
5.2.2	Chiral Diene Ligands	89
5.2.3	Chiral Bis-sulfoxide Ligands	92
5.2.4	Chiral Hybrid Ligands	92
5.3	$\alpha,\beta$ -Unsaturated Aldehydes	95
5.4	$\alpha,\beta$ -Unsaturated Esters	98
5.5	$\alpha,\beta$ -Unsaturated Amides	102
5.6	$\alpha,\beta$ -Unsaturated Phosphonates	105
5.7	$\alpha,\beta$ -Unsaturated Sulfonyl Compounds	105
5.8	Nitroolefin Compounds	107
5.9	Alkenylheteroarene and Alkenylarene Compounds	111
5.10	Conclusion	111
	References	112

## **6 Rhodium(I)-Catalyzed Allylation with Alkynes and Allenes 117**

*Adrian B. Pritzius and Bernhard Breit*

6.1	Introduction	117
6.2	Rh(I)-Catalyzed Addition of O-Nucleophiles	117
6.3	Rh(I)-Catalyzed Addition of S-Nucleophiles	123
6.4	Rh(I)-Catalyzed Addition of N-Nucleophiles	124
6.5	Rh(I)-Catalyzed Addition of C-Nucleophiles	127
6.6	Application of Rhodium-Catalyzed Addition in Total Synthesis	127
6.7	Conclusion	129
	References	130

## **7 Rhodium(I)-Catalyzed Reductive Carbon–Carbon Bond Formation 133**

*Adam D. J. Calow and John F. Bower*

7.1	Introduction	133
7.2	Hydroformylation	133
7.2.1	Directed Rh-Catalyzed Hydroformylation	134
7.2.2	Reversibly Bound Directing Groups in Rh-Catalyzed Hydroformylation	135
7.3	Reductive C—C Bond Formation Between Electron-Deficient Alkenes and Carbonyls or Imines	137
7.3.1	Reductive Aldol Reactions	137
7.3.2	Reductive Mannich Reactions	142
7.4	Reductive C—C Bond Formation Between Less Polarized Carbon-Based $\pi$ -Unsaturated Systems and Carbonyls, Imines, or Anhydrides	144
7.4.1	Reductive C—C Bond Formations Between Alkenes and Carbonyls, Imines, or Anhydrides	144
7.4.2	Reductive C—C Bond Formations Between Alkynes and Carbonyls or Imines	146

7.4.3	Miscellaneous Processes	150
7.5	Reductive C—C Bond Formation Between Carbon-Based $\pi$ -Unsaturated Systems	151
7.5.1	C—C Bond-Forming Reactions Between Alkenes and Alkynes	151
7.5.2	C—C Bond-Forming Reactions Between Alkynes and Alkynes	154
7.6	Conclusions	156
	References	156
<b>8</b>	<b>Rhodium(I)-Catalyzed [2+2+1] and [4+1] Cycloadditions</b>	<b>161</b>
	<i>Tsumoru Morimoto</i>	
8.1	Introduction	161
8.2	[2+2+1] Cycloaddition	161
8.2.1	[2+2+1] Cycloaddition of an Alkyne, an Alkene, and CO (Pauson–Khand-Type Reaction)	161
8.2.1.1	Pauson–Khand-Type Reaction Using Aldehydes as a C1 Component	162
8.2.1.2	Pauson–Khand-Type Reaction Using Formates as a C1 Component	171
8.2.1.3	Pauson–Khand-Type Reaction Using Oxalic Acid as a C1 Component	171
8.2.1.4	Pauson–Khand-Type Reaction Using Supported Carbon Monoxide	172
8.2.2	[2+2+1] Cycloaddition of Two Alkynes and CO	172
8.2.3	Carbonylative [2+2+1] Cycloaddition Including <i>hetero</i> -Multiple Bonds	174
8.3	[4+1] Cycloaddition	176
8.3.1	Cycloaddition of All Carbon $4\pi$ -Conjugated Systems with CO	176
8.3.2	Cycloaddition of $4\pi$ -Conjugated Systems Including Nitrogen Atom	178
8.4	Conclusion	179
	References	179
<b>9</b>	<b>Rhodium(I)-Catalyzed [2+2+2] and [4+2] Cycloadditions</b>	<b>183</b>
	<i>Yu Shibata and Ken Tanaka</i>	
9.1	Introduction	183
9.2	[2+2+2] Cycloaddition	183
9.2.1	[2+2+2] Cycloaddition of Alkynes	184
9.2.2	[2+2+2] Cycloaddition of Alkynes with Nitriles	199
9.2.3	[2+2+2] Cycloaddition of Alkynes with Heterocumulenes	200
9.2.4	[2+2+2] Cycloaddition of Alkynes with Alkenes	207
9.2.5	[2+2+2] Cycloaddition of Alkynes with Carbonyl Compounds and Imines	211
9.3	[4+2] Cycloaddition	214
9.3.1	[4+2] Cycloaddition of Alkynes with 1,3-Dienes	215
9.3.2	[4+2] Cycloaddition via C—H Bond Cleavage	218
9.4	Conclusion	222
	References	225

<b>10</b>	<b>Rhodium(I)-Catalyzed Cycloadditions Involving Vinylcyclopropanes and Their Derivatives</b>	<b>229</b>
	<i>Xing Fan, Cheng-Hang Liu, and Zhi-Xiang Yu</i>	
10.1	Introduction	229
10.2	VCP Isomerization Catalyzed by Rh(I)	230
10.3	Cycloaddition Reactions Using VCPs 5C Synthons	231
10.3.1	[5+1] cycloadditions of VCPs and CO	231
10.3.2	[5+1] Cycloaddition Reactions of VCP Derivatives and CO	233
10.3.3	Intermolecular [5+2] Cycloaddition Reactions	237
10.3.4	Intramolecular [5+2] Cycloaddition Reactions	239
10.3.5	[5+2] Cycloaddition Reactions of VCP Derivatives with $2\pi$ Components	245
10.3.6	[5+2+1] and [5+1+2+1] Cycloaddition Reactions	251
10.4	Cycloaddition Reactions Using VCPs 3C Synthons	255
10.4.1	[3+2] Cycloaddition Reactions of VCPs	255
10.4.2	[3+2] Cycloaddition Reactions of VCP Derivatives and $2\pi$ -Components	261
10.4.3	[3+2+1] Cycloaddition Reactions	262
10.4.4	[3+4] and [3+3] Cycloaddition Reactions of Vinylaziridines	264
10.5	Miscellaneous Cycloaddition	266
10.5.1	[7+1] Cycloaddition of Buta-1,3-dienylcyclopropanes	266
10.5.2	Intramolecular Reactions of ACPs and $2\pi$ -Synthons	266
10.5.3	Intramolecular Hydroacylation of VCPs	268
10.6	Conclusion	270
	Acknowledgments	270
	References	271
<b>11</b>	<b>Rhodium(I)-Catalyzed Reactions via Carbon–Hydrogen Bond Cleavage</b>	<b>277</b>
	<i>Takanori Shibata</i>	
11.1	Introduction	277
11.2	C–H Arylation	277
11.3	C–H Alkylation	279
11.3.1	Directed C–H Alkylation by Alkenes	279
11.3.2	Undirected C–H Alkylation by Alkene	281
11.4	C–H Alkenylation	283
11.5	Tandem Reaction Initiated by C–H Activation	285
11.6	C–H Borylation	287
11.7	Undirected Dehydrogenative C–H/Si–H Coupling	290
11.8	Conclusion	295
	References	295
<b>12</b>	<b>Rhodium(I)-Catalyzed Reactions via Carbon–Carbon Bond Cleavage</b>	<b>299</b>
	<i>Masahiro Murakami and Naoki Ishida</i>	
12.1	Introduction	299

12.2	Reactions of Cyclopropanes and Cyclobutanes	299
12.3	Reactions via Cleavage of C(Carbonyl)—C Bonds	310
12.4	Reactions via Directing Group-Assisted C—C Bond Cleavage	315
12.5	Reactions of Alcohols via C—C Bond Cleavage	323
12.6	Reactions via Cleavage of C—CN Bond	330
12.7	Reactions via Decarbonylation of Aldehydes and Carboxylic Acid Derivatives	332
12.8	Conclusion	333
	References	334

## Part II Rhodium(II) Catalysis 341

13	<b>Rhodium(II) Tetracarboxylate-Catalyzed Enantioselective C—H Functionalization Reactions</b>	343
	<i>Sidney M. Wilkerson-Hill and Huw M. L. Davies</i>	
13.1	Introduction	343
13.2	Mechanistic Insights and General Considerations	344
13.3	Development of Rh <sub>2</sub> (S-DOSP) <sub>4</sub> as a Chiral Catalyst for C—H Functionalization	347
13.4	Combined C—H Functionalization/Cope Rearrangement	350
13.5	Phthalimido Amino Acid-Derived Catalysts for Intramolecular C—H Functionalization	353
13.6	Development of Triarylcyclopropane Carboxylate Rh(II) Complexes for Catalyst-Controlled Site-Selective C—H Functionalization	359
13.7	Emerging Chiral Dirhodium Catalyst for Enantioselective C—H Functionalization	364
13.8	New Paradigms in the Logic of Chemical Synthesis	365
13.9	Conclusion	368
	Acknowledgments	369
	References	369
14	<b>Rhodium(II)-Catalyzed Nitrogen-Atom Transfer for Oxidation of Aliphatic C—H Bonds</b>	373
	<i>Tom G. Driver</i>	
14.1	Introduction	373
14.2	Mechanism-Inspired Development of New Rh <sub>2</sub> (II) Catalysts	374
14.2.1	Mechanism of Intramolecular Rh <sub>2</sub> (II)-Catalyzed C—H Bond Amination	374
14.2.2	Tetradentate Carboxylate Ligands for Bimetallic Rhodium(II) Complexes	375
14.2.3	Design, Synthesis, and Performance of Rh <sub>2</sub> <sup>II,III</sup> Complexes	381
14.3	The Development of New Intramolecular Rh <sub>2</sub> (II)-Catalyzed sp <sup>3</sup> -C—H Bond Amination	383
14.3.1	C—H Bond Amination of Etheral Bonds	383
14.3.2	The Use of Rh <sub>2</sub> (II)-Catalyzed C—H Bond Amination to Create Glycans and Glycosides	385

14.3.3	C—H Bond Amination of MIDA Boronates	386
14.3.4	Formation of Medium-Ring <i>N</i> -Heterocycles Through C—H Bond Amination	387
14.3.5	Synthesis of Spiroaminal Scaffolds	387
14.3.6	Expanding the Scope of C—H Bond Amination with New NH <sub>2</sub> -Based N-Atom Precursors	389
14.3.7	<i>N</i> -Tosylcarbamate N-Atom Precursors in Rh <sub>2</sub> (II)-Catalyzed C—H Bond Amination Reactions	394
14.3.8	Aryl Azide N-Atom Precursors in Rh <sub>2</sub> (II)-Catalyzed sp <sup>3</sup> -C—H Bond Amination Reactions	398
14.4	Intermolecular Rh <sub>2</sub> (II)-Catalyzed sp <sup>3</sup> -C—H Bond Amination Using an Iodine(III) Oxidant to Generate the Nitrene	400
14.4.1	Intermolecular C—H Bond Amination of Activated C—H Bonds	400
14.5	Non-Oxidatively Generated Nitrenes in Intermolecular Rh <sub>2</sub> (II)-Catalyzed sp <sup>3</sup> -C—H Bond Amination	411
14.5.1	<i>N</i> -Tosylcarbamates as the Nitrogen-Atom Precursor in Intermolecular sp <sup>3</sup> -C—H Bond Amination Processes	411
14.5.2	Azides as the Nitrogen-Atom Precursor in Intermolecular sp <sup>3</sup> -C—H Bond Amination Reactions	414
14.6	Diastereoselective Rh <sub>2</sub> (II)-Catalyzed sp <sup>3</sup> -C—H Bond Amination Using Chiral, Non-racemic Nitrogen-Atom Precursors	416
14.6.1	Intermolecular Diastereoselective C—H Bond Amination Using Sulfonimidamides	416
14.6.2	Intermolecular Diastereoselective C—H Bond Amination Using <i>N</i> -Tosylcarbamates	422
14.7	Enantioselective Rh <sub>2</sub> (II)-Catalyzed sp <sup>3</sup> -C—H Bond Amination	422
14.7.1	Intramolecular Asymmetric C—H Bond Amination	422
14.8	Conclusion	429
	References	430

## **15 Rhodium(II)-Catalyzed Cyclopropanation 433**

*Vincent N.G. Lindsay*

15.1	Introduction	433
15.1.1	Mechanistic Considerations	434
15.2	Intermolecular Cyclopropanation of Alkenes	436
15.2.1	Via Rhodium(II) Carbenes Bearing One Electron-Withdrawing Group (Acceptor Carbenes)	438
15.2.2	Via Rhodium(II) Carbenes Bearing One Electron-Withdrawing Group and One Electron-Donating Group (Donor–Acceptor Carbenes)	440
15.2.3	Via Rhodium(II) Carbenes Bearing Two Electron-Withdrawing Groups (Acceptor–Acceptor Carbenes)	441
15.3	Intramolecular Cyclopropanation of Alkenes	443
15.4	Cyclopropanation of Poorly Nucleophilic $\pi$ -Systems: Alkynes, Arenes, and Allenes as Substrates	444
15.5	Conclusion	445
	References	445

<b>16</b>	<b>Reactions of <math>\alpha</math>-Imino Rhodium(II) Carbene Complexes Generated from <i>N</i>-Sulfonyl-1,2,3-Triazoles</b>	<b>449</b>
	<i>Tomoya Miura and Masahiro Murakami</i>	
16.1	Introduction	449
16.2	Synthesis of <i>N</i> -Sulfonyl-1,2,3-Triazoles	451
16.3	Reactions of Carbon Nucleophiles with $\alpha$ -Imino Rhodium(II) Carbene Complexes	451
16.4	Reactions of Oxygen and Sulfur Nucleophiles with $\alpha$ -Imino Rhodium(II) Carbene Complexes	458
16.5	Reactions of Nitrogen Nucleophiles with $\alpha$ -Imino Rhodium(II) Carbene Complexes	464
16.6	Conclusion	466
	References	467

<b>17</b>	<b>Rhodium(II)-Catalyzed 1,3- and 1,5-Dipolar Cycloaddition</b>	<b>471</b>
	<i>Nirupam De, Donguk Ko, and Eun Jeong Yoo</i>	
17.1	Introduction	471
17.2	1,3-Dipolar Cycloadditions of Carbonyl Ylides	471
17.2.1	[3+2] Cycloadditions of Carbonyl Ylides and Dipolarophiles	471
17.2.2	Chemoselective [3+2] Cycloadditions of Carbonyl Ylides	475
17.2.3	Applications to Natural Product Synthesis	476
17.3	1,3-Dipolar Cycloadditions of Azomethine Ylides	478
17.4	1,3-Dipolar Cycloadditions of Enoldiazo Compounds	479
17.5	1,5-Dipolar Cycloadditions of Pyridinium Zwitterions	482
17.6	Conclusion	484
	References	484

### **Part III Rhodium(III) Catalysis 487**

<b>18</b>	<b>Rhodium(III)-Catalyzed Annulative Carbon-Hydrogen Bond Functionalization</b>	<b>489</b>
	<i>Tetsuya Satoh and Masahiro Miura</i>	
18.1	Introduction	489
18.2	Type A Annulation	490
18.2.1	Annulation Utilizing Oxygen-containing Directing Group	490
18.2.2	Annulation Utilizing Nitrogen-containing Directing Group	492
18.2.3	Annulation Utilizing Sulfur-containing Directing Group	504
18.2.4	Annulation Utilizing Phosphorus-containing Directing Group	506
18.3	Type B Annulation	508
18.4	Type C Annulation	510
18.5	Type D Cyclization	515
18.6	Conclusion	516
	References	517
