Software Complexity

Measures and Methods

Walter de Gruyter
Berlin · New York 1991

Contents

1	Introduction	1
2	Problems in Evaluating the Complexity of Programs	7
2.1	Difficulties in Interpreting the Results of Software Complexity Measurement	7
2.2	Problems in Interpreting Numerical Values	21
2.3	Problems in Determining the Complexity of Programs	22
2.4	Problems in Calculating the Arithmetic Mean	22
2.5	Problems in Selecting Appropriate Software Complexity Measures	23
3	Discussion about Software Measurement and Measures	25
3.1	What is Software Measurement?	25
3.2	An Overview of Software Measurement	27
3.3	What are Software Metrics/Measures?	28
3.3.1	The Difference of Measure and Metric	28
3.3.2	Term Software Measure	29
3.4	Classification of Software Complexity Measures	31
3.4.1	Computational and Psychological Complexity	31
3.4.2	Basili's Classification of Complexity Measures	32
3.4.3	Sherif's Classification of Software Measures	32
3.4.4	Fenton's and Kaposi's Classification of Software Measures	32
3.4.5	Program Change-Measures	33
3.4.6	GMD's Classification	33
3.4.7	Sheppard's Classification of Software Complexity Measures	33
3.4.8	METKIT's Classification of Software Measures	34
3.5	Verbal Definitions of the Term Complexity	34
3.6	Limits to the Values of Software Measures	35
3.7	Remarks About Measures in Relationship to Measurement Theory and Scales	36
3.8	Summary	37
4	Measurement Theory and Criteria for Scales	39
4.1	The Definition of the Empirical Relational System and the Formal Relational System	40
4.1.1	The Difference Between the Measurement of the Length of Wooden Boards and the Complexity of Software	41
4.2	The Definition of Scales and Meaningfulness	42
4.2.1	Examples of Scale Types	43
4.2.2	Examples of Meaningfulness	45
4.3	Criteria for Ordinal and Ratio Scales	46

4.3.1	Weak Order and Ordinal Scale	47
4.3.1.1	The Empirical Relation "Equal or More Complex Than"	49
4.3.2	Extensive Structure and the Ratio Scale	49
4.4	Description of Measures as an Ordinal and Ratio Scale	51
4.4.1	Empirical Subrelation	51
4.4.2	Atomic Modification	51
4.4.3	Partial Property of a Measure	52
4.4.4	Property s of a Measure	54
4.4.5	Empirical Subrelation of a Measure	54
4.4.6	The Choice of an Appropriate Software Complexity Measure	55
4.4.7	Partial and Complete Description of the Property s of a Measure	56
4.4.7.1	Partial Description of the Property s of a Measure	56
4.4.7.2	Complete Description of the Property s of a Measure	56
4.4.8	Summary of Partial Properties and Atomic Modifications	56
4.4.9	Modified Axioms of the Extensive Structure	57
4.4.10	Binary Operations between Programs	58
4.5	Characterization of the Measure of McCabe	62
4.5.1	The Measure of McCabe as an Ordinal Scale	62
4.5.2	The Measure of McCabe as a Ratio Scale	64
4.6	Summary	65
5	Models of Programs and their Definitions	67
5.1	Definitions of Control Flowgraphs	67
5.2	Definitions of Subflowgraphs and Primes	72
5.3	Definitions and Notation for Decomposition of Flowgraphs, Sequence and Nesting	77
5.4	Definitions of Structuredness of Flowgraphs	78
5.4.1	D-Structures	79
5.4.2	D'-Structures	80
5.4.3	BJn-Structures	81
5.5	Definition of Intervals and Reducibility	81
5.6	Definition of Loops	82
5.7	Definition of Unstructuredness of Flowgraphs	82
5.8	Notations Used in this Book	84
6	Ideas Behind the Complexity of Programs	87

6.1	Desirable Properties of Measures by Tsai, Lopez, Rodriguez and Vovik	87
6.2	Desirable Properties of Measures by Evangelisti	88
6.3	Ideas of Complexity by McCabe	89
6.4	Ideas of Complexity by Belady	89
6.5	Axioms of Complexity by Piwowarski	89
6.6	Axioms of Complexity by Bache	90
6.7	Desireable Properties of Complexity Measures by Weyuker	92
6.8	Required Properties for Measures by Jayaprakash, Lakshmanan, Sinha	96
6.9	Summary	98
7	Our Investigation of Software Complexity Measures	99
7.1	Overview of our Investigation of the Measures	99
7.2	The "Measure Demonstration System" MDS	100
7.2.1	Measures Implemented in MDS and Treated in this Book	102
7.2.2	Representation of Flowgraphs in MDS	103
7.2.3	Nested Flowgraphs for the Investigation of the Measures	103
7.2.4	Interpreting the Numbers of Measurement	106
7.2.4.1	Interpreting Numbers for the Measure MCC-V with MDS	108
7.2.4.2	Interpreting Numbers for the Measure MCC-V-Q with MDS	109
7.2.4.3	Interpreting Numbers for the Measure MCC-V2 with MDS	110
7.2.4.4	Interpreting Numbers for the Measure LOC with MDS	112
7.2.4.5	Interpreting Numbers for the Measure ALPHA with MDS	113
7.2.4.6	Interpreting Numbers for the Measure BAND with MDS	114
7.2.5	Selection of Measures with MDS	115
7.2.6	Examples and Counterexamples for the Extensive Structure	115
7.2.6.1	Axiom of Associativity	116
7.2.6.2	Axiom of Commutativity	117
7.2.6.3	Axiom of Monotonicity	118
7.2.6.4	Archimedean Axiom	120
7.3	Atomic Modifications, Partial Properties and the Ordinal Scale	120
7.4	Extensive Structure and Binary Operations between Programs	127

7.5	Conditions for the Use of Measures as an Ordinal and a Ratio Scale in Practice	128
7.5.1	Conditions for the Use of the Measures MCC-V, C2 and MCC-V2 as an Ordinal and a Ratio Scale	130
7.6	Summary	131
8	Characterization of Software Complexity Measures	133
8.1	Selection of the Software Complexity Measures	138
8.1.1	Software Complexity Measures not treated in this Book	138
8.2	Measures of Halstead	142
8.3	Measure Lines of Code	146
8.4	Measures of McCabe and Modifications	151
8.4.1	Explanations by McCabe	152
8.4.2	Examples of the Measures	153
8.4.3	Cyclomatic Number of a Graph and a Flowgraph	154
8.4.4	Comments from the Literature	159
8.4.5	Discussion of the Measures of McCabe	161
8.4.6	Extensive Structure and Ratio Scale	165
8.4.7	Final Remarks	167
8.5	Measures "Relative and Absolute Logical Complexity" of Gilb	170
8.6	Measure "Control Flow Density" of Szentes and Potier	176
8.7	Measures of Szentes and Gras	179
8.8	Measure of Oviedo	195
8.9	Measure PATH of Schneidewind	200
8.10	Measures of Whitworth and Szulewski	206
8.11	Measures of Hecht and Extensions	221
8.12	Measure of Moawad and Hassan and Extensions	234
8.13	Measures "Reachability" of Schneidewind	242
8.14	Measures of Chen	250
8.14.1	Measure Maximal Intersection Number (MIN)	251
8.14.2	Measure Z	252
8.14.3	Measure Z'	252
8.14.4	Discussion of the Measures	253
	8.14.4.1 Revised and Improved Definition of the Measure MIN by the Author	254
8.14.5	Examples	255
8.14.6	Discussion of the Measures	260
8.14.7	Extensive Structure and Ratio Scale	262
8.14.8	Final Remarks	263

8.15 Measures Based on the Prime Decomposition of Flowgraphs	265
8.15.1 Measures of Dunsmore and Gannon	269
8.15.2 Measure of Prather	281
8.15.3 Measures of the Project "Structured-Based Software Measure- ment"	296
8.15.3.1 Structural Measures Based on the Fenton-Whitty Scheme	297
8.15.3.2 Definition of Structural Measures	299
8.15.3.3 The Axioms of Structure	300
8.15.3.4 Assigning of Values to Primes	301
8.15.3.5 The Measures VINAP-PD and VINAP-SUM	301
8.15.3.6 New Primes	302
8.15.3.7 Examples	303
8.15.3.8 Explanations by Bache and Fenton	309
8.15.3.9 Discussion of the Measures	309
8.15.3.10 Extensive Structure and Ratio Scale	314
8.15.3.11 Final Remarks	318
8.15.4 Measures of Fenton and Kaposi	320
8.15.5 Measures of Preiser and Storm	330
8.15.6 Measures of Ejioogu	333
8.15.7 Measures of Blaschek	345
8.15.8 Measures of Belady	362
8.16 Measure of Schmidt and Gong and Extensions	374
8.17 Measures Based on Ranges	400
8.17.1 Introduction	400
8.17.1.1 Dominators	400
8.17.1.2 First Occurrence Path	401
8.17.1.3 Lower Bound and Greatest Lower Bound	403
8.17.1.4 Ranges and Scopes	404
8.17.1.5 Nesting Level of Nodes	410
8.17.2 Measures of Harrison and Magel	413
8.17.2.1 Measure SCOPE	413
8.17.2.2 Measure SCOPE and Extensions as Defined by Ho- watt and Baker	414
8.17.2.3 Comments from the Literature	416
8.17.2.4 Examples	416
8.17.2.5 Discussion of the Measures	425
8.17.2.6 Extensive Structure and Ratio Scale	429

8.17.2.7 Final Remarks	430
8.17.3 Measures of Howatt and Baker	433
8.17.3.1 Remarks by Howatt and Baker	436
8.17.3.2 Comments by the Author	436
8.17.3.3 Examples for the Measures SCOPE, PEN and AVG	437
8.17.3.4 Examples for the Measure NL	441
8.17.3.5 Discussion of the Measures	450
8.17.3.6 Extensive Structure and Ratio Scale	454
8.17.3.7 Final Remarks	456
8.18 Measures for Analyzing the Unstructuredness of Flowgraphs	458
8.18.1 Measure of Woodward, Hennell and Hedley	459
8.18.2 Measure of Piwowarski and Extensions	464
8.18.2.1 Comments to the Definition of the Measure by the Author	465
8.18.2.2 Entry-Node of a Range	469
8.18.2.3 Structuredness and Unstructuredness of Pairs of Ranges	470
8.18.2.4 Definition of the Measure of Piwowarski by the Author	471
8.18.2.5 Examples	472
8.18.2.6 Definition of the Measure of Piwowarski by Howatt and Baker	482
8.18.2.7 Discussion of the Measures of Piwowarski	483
8.18.2.8 Extensive Structure and Ratio Scale	486
8.18.2.9 Final Remarks	487
8.18.3 Measures for Unstructuredness of Howatt and Baker and Ex- tensions	490
9 Results and Research in the Future	511
9.1 List of the Investigated Measures	511
9.2 Partial Properties of the Measures	512
9.2.1 Partial Properties of the Measures of McCabe and Extensions	513
9.2.2 Partial Properties of the Measures of Szentes and Gras	514
9.2.3 Partial Properties of the Measures of Hecht and Moawad	515
9.2.4 Partial Properties of the Measures of Schneidewind	515
9.2.5 Partial Properties of the Measures of Chen	516
9.2.6 Partial Properties of Measures Based on Primes	517
9.2.7 Partial Properties of the Measures of Blaschek and Ejiogu	518
9.2.8 Partial Properties of the Measures of Belady	519

9.2.9	Partial Properties of the Measures of Schmidt and Gong	519
9.2.10	Partial Properties of Measures Based on Ranges	520
9.2.11	Partial Properties of the Measures for Unstructuredness	521
9.2.12	List of the Measures and the Partial Properties	522
9.2.13	Complete List of the Atomic Modifications	523
9.2.14	Classification of Measures by Partial Properties	529
9.2.15	Summary	530
9.3	Properties of Measures Related to the Extensive Structure	531
9.3.1	Overview of the Properties of the Measures to Extensive Structure	531
9.3.2	Axiom of Weak Associativity for the Binary Operation BALT	534
9.3.3	Sensitivity of Measures to adding Statements	536
9.4	Set of Measures to Measure the Intra-Modular Complexity	538
9.4.1	Normalized Measures and such with Unclear Properties	538
9.4.2	Criteria for the Selection of Appropriate Measures	539
9.4.3	Set of Measures to Analyze the Program Complexity	542
9.4.4	Standardized Software Complexity Measures	545
9.4.5	Minimal Set of Standardized Software Complexity Measures	551
9.5	Measurement Process of Restructure and Software Reuse	551
9.6	Wrong and Correct Calculation of the Arithmetic Mean	557
9.7	Complexity in Comparison to Reference Programs and Program Versions	558
9.8	Validation of a Measure	560
9.9	Correlation between Software Complexity Measures	562
9.10	Open Problems and Research in the Future	563
10	Glossary of Terms	565
11	References	573
