Preface *ix*

List of Abbreviations *xiii*

About the Author *xvii*

1	Enantioselective Copper-Catalyzed Domino Reactions	1
1.1	Introduction	1
1.2	Two-Component Processes	2
1.2.1	Reactions Based on Cyclizations	2
1.2.2	Reactions Initiated by Michael Additions	9
1.2.3	Reactions Initiated by Friedel–Crafts Reactions	15
1.2.4	Reactions Initiated by Aldol Reactions	16
1.2.5	Miscellaneous Reactions	19
1.3	Three-Component Processes	23
1.3.1	Reactions Based on Alkyne Couplings	23
1.3.1.1	Reactions of Alkynes, Aldehydes, and Amines	23
1.3.1.2	Other Alkyne Couplings	33
1.3.2	Reactions Initiated by Michael Additions	34
1.3.3	Reactions Based on 1,3-Dipolar Cycloadditions	41
1.3.4	Reactions Based on Addition Reactions to Alkenes	45
1.3.5	Reactions Based on Alkene Couplings	48
1.3.6	Miscellaneous Reactions	50
1.4	Conclusions	50
	References	51
2	Enantioselective Palladium-Catalyzed Domino Reactions	57
2.1	Introduction	57
2.2	One- and Two-Component Processes	57
2.2.1	Reactions Based on Heck Reactions	57
2.2.2	Reactions Initiated by Wacker Reactions	65
2.2.3	Reactions Based on Cyclizations	68
2.2.4	Reactions Initiated by Michael Additions	74
2.2.5	Miscellaneous Reactions	77
2.3	Three-Component Processes	80
2.3.1	Reactions Based on Alkene Couplings	80

2.3.2	Three-Component Reactions Initiated by Wacker Reactions	82
2.3.3	Miscellaneous Reactions	86
2.4	Conclusions	91
	References	91
3	Enantioselective Rhodium-Catalyzed Domino Reactions	95
3.1	Introduction	95
3.2	One- and Two-Component Processes	95
3.2.1	Reactions Based on [2+2+2] Cycloadditions	95
3.2.2	Reactions Based on 1,3-Dipolar Cycloadditions	100
3.2.3	Reactions Initiated by Ring-Opening Reactions	105
3.2.4	Reactions Initiated by Michael Additions	105
3.2.5	Reactions Based on Cyclizations	107
3.2.6	Miscellaneous Reactions	113
3.3	Three-Component Processes	115
3.3.1	Reactions Based on Alkyne Couplings	115
3.3.2	Reactions Initiated by Cycloadditions	118
3.3.3	Miscellaneous Reactions	121
3.4	Conclusions	124
	References	124
4	Enantioselective Scandium-Catalyzed Domino Reactions	129
4.1	Introduction	129
4.2	One- and Two-Component Processes	130
4.2.1	Domino Bromination/Aminocyclization Reactions	130
4.2.2	Reactions Initiated by Ring-Opening Reactions	134
4.2.3	Reactions Initiated by Michael Additions	136
4.2.4	Domino Diazoalkane Addition/1,2-Rearrangement Reactions	139
4.2.5	Domino Imine Formation/Intramolecular Amidation Reactions	143
4.2.6	Miscellaneous Reactions	145
4.3	Three-Component Processes	153
4.3.1	Reactions Based on Mannich Couplings	153
4.3.2	Miscellaneous Reactions	155
4.4	Conclusions	162
	References	163
5	Enantioselective Silver-Catalyzed Domino Reactions	167
5.1	Introduction	167
5.2	One- and Two-Component Processes	168
5.2.1	Reactions Initiated by Michael Additions	168
5.2.2	Reactions Based on Cyclizations	186
5.2.3	Reactions Initiated by Aldol Reactions	193
5.2.4	Domino Reactions Initiated by Mannich Reactions	197
5.2.5	Miscellaneous Reactions	200
5.3	Three-Component Processes	204
5.3.1	Reactions Based on Mannich Reactions	204
5.3.2	Reactions Based on 1,3-Dipolar Cycloadditions	205

5.3.3	Miscellaneous Reactions	207
5.4	Conclusions	208
	References	209
6	Enantioselective Nickel-Catalyzed Domino Reactions	213
6.1	Introduction	213
6.2	Two-Component Processes	213
6.2.1	Reactions Initiated by Michael Additions	213
6.2.2	Reactions Based on Cyclizations	221
6.2.3	Miscellaneous Reactions	226
6.3	Three-Component Processes	235
6.3.1	Reactions Based on Alkene Couplings	235
6.3.2	Reactions Based on Alkyne Couplings	238
6.3.3	Miscellaneous Reactions	241
6.4	Conclusions	244
	References	245
7	Enantioselective Gold-Catalyzed Domino Reactions	249
7.1	Introduction	249
7.2	One- and Two-Component Processes Based on Cyclizations	249
7.2.1	Reactions of 1,6-Enynes	249
7.2.2	Other Reactions	254
7.3	Three-Component Processes Based on Alkyne Couplings	263
7.4	Conclusions	266
	References	266
8	Enantioselective Magnesium-Catalyzed Domino Reactions	269
8.1	Introduction	269
8.2	Two-Component Domino Reactions Initiated by Michael Additions	269
8.3	Miscellaneous One- and Two-Component Domino Reactions	274
8.4	Multicatalyzed Reactions	283
8.5	Conclusions	288
	References	290
9	Enantioselective Cobalt-Catalyzed Domino Reactions	293
9.1	Introduction	293
9.2	One- and Two-Component Processes	293
9.3	Three-Component Processes	300
9.4	Conclusions	301
	References	302
10	Enantioselective Zinc-Catalyzed Domino Reactions	305
10.1	Introduction	305
10.2	Two-Component Processes Initiated by Michael Additions	305

10.3	Three-Component Processes	311
10.4	Conclusions	314
	References	314
11	Enantioselective Yttrium- and Ytterbium-Catalyzed Domino Reactions	317
11.1	Introduction	317
11.2	Two-Component Processes	318
11.2.1	Reactions Initiated by Aldol Additions	318
11.2.2	Miscellaneous Reactions	321
11.3	Three-Component Processes	324
11.3.1	Three-Component Processes Based on Cycloadditions	324
11.3.2	Miscellaneous Reactions	327
11.4	Conclusions	330
	References	331
12	Enantioselective Domino Reactions Catalyzed by Other Metals	333
12.1	Introduction	333
12.2	One- and Two-Component Processes	333
12.2.1	Iron-Catalyzed Reactions	333
12.2.2	Zirconium-Catalyzed Reactions	337
12.2.3	Platinum-Catalyzed Reactions	339
12.2.4	Iridium-Catalyzed Reactions	343
12.2.5	Aluminum-Catalyzed Reactions	344
12.2.6	Tin-Catalyzed Reactions	345
12.2.7	Ruthenium-Catalyzed Reactions	348
12.2.8	Titanium-Catalyzed Reactions	349
12.2.9	Vanadium-Catalyzed Reactions	352
12.2.10	Gallium-Catalyzed Reactions	353
12.3	Three-Component Processes	355
12.3.1	Iridium-Catalyzed Reactions	355
12.3.2	Boron-Catalyzed Reactions	358
12.3.3	Aluminum-Catalyzed Reactions	360
12.3.4	Tin-Catalyzed Reactions	361
12.3.5	Zirconium-Catalyzed Reactions	362
12.4	Conclusions	363
	References	365
