Preface *xv*

Part I Fundamentals of Triboelectric Nanogenerator *1*

1	Overview of Triboelectric Nanogenerators	3
	<i>Xiaosheng Zhang</i>	
1.1	Energy Crisis of Microsystems	3
1.2	Microenergy Technologies	5
1.2.1	Photovoltaic Effect	7
1.2.2	Thermoelectric Effect	7
1.2.3	Electromagnetic Effect	8
1.2.4	Piezoelectric Effect	8
1.3	Triboelectric Nanogenerators	9
1.3.1	Principle of Triboelectric Nanogenerators	9
1.3.2	Key Factor: Triboelectric Series	11
1.3.3	Material Progress of Triboelectric Nanogenerators	11
1.3.4	Challenges of Triboelectric Nanogenerators	14
1.4	Summary	14
	Abbreviations	15
	References	15
2	Structures of Triboelectric Nanogenerators	19
	<i>Haixia Zhang</i>	
2.1	Operation Mechanisms of TENGs	19
2.1.1	Contact-Separation (CS) Mode	21
2.1.2	Relative-Sliding (RS) Mode	21
2.1.3	Single-Electrode (SE) Mode	22
2.1.4	Freestanding (FS) Mode	22
2.2	Typical Structures of TENGs	24
2.2.1	Plane-Shaped TENGs	24
2.2.2	Arch-Shaped TENGs	26
2.2.3	Zig-Zag-Shaped TENGs	30

2.2.4	Wavy-Shaped TENGs	33
2.2.5	Tank-Shaped TENGs	33
2.2.6	Rotor-Shaped TENGs	33
2.3	Summary	37
	Abbreviations	37
	References	38
3	Fabrication of Triboelectric Nanogenerators	41
	<i>Bo Meng</i>	
3.1	Mass Fabrication Technologies for Triboelectric Nanogenerators	41
3.1.1	Soft Lithography	41
3.1.2	Flexible Printed Circuit Manufacture	44
3.1.3	Roll-to-Roll Manufacture	45
3.1.4	3D Printing	46
3.1.5	Textile Manufacture	49
3.2	Performance Enhancement for Triboelectric Nanogenerators	50
3.2.1	Plasma Treatment	51
3.2.2	Wrinkle-Structured Surface	51
3.2.3	Chemical Synthesis	53
3.3	Summary	54
	Abbreviations	55
	References	55
4	Characterization of Triboelectric Nanogenerators	59
	<i>Yu Song</i>	
4.1	Electrical Operating Cycles of Triboelectric Nanogenerators	60
4.1.1	V–Q Plot and Its Characteristics	60
4.1.2	Operating Cycles of Energy Output	61
4.1.3	Measurements of Operating Cycles	64
4.2	Standard and Figure of Merits for Quantifying Triboelectric Nanogenerators	66
4.2.1	Figure of Merits of Triboelectric Nanogenerators	66
4.2.2	Structural Figure of Merits of Triboelectric Nanogenerators	67
4.2.3	Material Figure of Merit for Triboelectric Nanogenerators	70
4.3	Summary	73
	Abbreviations	74
	References	74
5	Power Management of Triboelectric Nanogenerators	77
	<i>Xiaoliang Cheng</i>	
5.1	Theoretical Analysis of Power Transmittance of TENGs	77
5.1.1	Resistive Load Characteristics of TENGs	78
5.1.2	Capacitive Load Characteristics of TENGs	78
5.2	The Progress in TENG Power Management	81
5.2.1	Using Inductive Transformers	81
5.2.2	Using Capacitive Transformers	82
5.2.3	Using LC Oscillation Circuit	83

- 5.3 Summary 90
- Abbreviations 90
- References 91

Part II Approaches to Flexible and Stretchable Device 95

6 Overview of Flexible and Stretchable Approaches 97

Mengdi Han

- 6.1 Intrinsically Flexible or Stretchable Materials 97
 - 6.1.1 Nanomaterials in Different Dimensions 97
 - 6.1.2 Organic Materials 100
 - 6.1.3 Other Materials 102
- 6.2 Structural Designs for Flexible and Stretchable Electronics 103
 - 6.2.1 Structural Design for Flexible Electronics 103
 - 6.2.2 2D Structural Design for Stretchable Electronics 105
 - 6.2.3 3D Structural Design for Stretchable Electronics 107
- 6.3 Summary 107
- Abbreviations 107
- References 108

7 Flexible and Stretchable Devices from 0D Nanomaterials 113

Zongming Su

- 7.1 0D Nanomaterials 114
 - 7.1.1 Quantum Dots 114
 - 7.1.2 Carbon Quantum Dots 115
 - 7.1.3 Gold Nanoparticles 116
- 7.2 Thin Films Using 0D Nanomaterials 117
 - 7.2.1 Casting 117
 - 7.2.2 Dip Coating 118
 - 7.2.3 Langmuir–Blodgett Deposition 120
- 7.3 Patterning Methods and Applications 121
 - 7.3.1 Screen Printing 121
 - 7.3.2 Inkjet Printing 121
 - 7.3.3 Microcontact Printing 122
- 7.4 Applications of 0D Nanomaterials 123
 - 7.4.1 Electrodes 124
 - 7.4.2 Light-Emitting Diodes 125
 - 7.4.3 Transistors 125
- 7.5 Summary 128
- Abbreviations 128
- References 129

8 Flexible and Stretchable Devices from 1D Nanomaterials 133

Liming Miao

- 8.1 Carbon Nanotubes 133
 - 8.1.1 Fabrication Methods for CNTs 133

8.1.1.1	CNT-Based Bulk Materials	134
8.1.1.2	CNT-Based Surface Materials	134
8.1.2	Application of CNTs	136
8.2	ZnO Nanowires	138
8.2.1	Synthesis of ZnO Nanowires	139
8.2.2	Applications of ZnO Nanowires	141
8.3	Ag Nanowires	142
8.3.1	Fabrication Methods for Ag Nanowires	142
8.3.2	Applications of Ag Nanowires	143
8.4	Summary	145
	Abbreviations	145
	References	146
9	Flexible and Stretchable Devices from 2D Nanomaterials	149
	<i>Jinxin Zhang</i>	
9.1	2D Nanomaterials	149
9.1.1	Graphene	150
9.1.2	TMDs	151
9.1.3	Boron Nitride	151
9.2	Synthesis of Graphene	152
9.2.1	Micromechanical Exfoliation	152
9.2.2	Epitaxial Growth	153
9.2.3	Chemical Exfoliation	153
9.3	Graphene Transfer	154
9.3.1	Mechanical Exfoliation	154
9.3.2	Polymer-Assisted Transfer	154
9.3.3	Roll-to-Roll Transfer	156
9.3.4	“Transfer-Free” Method	156
9.4	Applications of Graphene	157
9.4.1	Flexible and Stretchable Transparent Electrodes	157
9.4.2	Nanogenerators	158
9.5	Summary	160
	Abbreviations	161
	References	161
10	Flexible and Stretchable Devices from Unconventional 3D Structural Design	165
	<i>Hangbo Zhao and Mengdi Han</i>	
10.1	Stretchable 3D Ribbon and Membrane Structures Formed by Basic Buckling	165
10.1.1	3D Nanoribbons	166
10.1.2	3D Nanomembranes	167
10.1.3	3D Bridge-Island Structures	167
10.2	Deterministic 3D Assembly	167
10.2.1	Basic Approach of Deterministic 3D Assembly	169
10.2.2	3D Kirigami Structure in Micro-/Nanomembranes	172
10.2.3	Buckling Control Assisted by Stress and Strain Engineering	172

10.2.4	Multilayer 3D Structures	173
10.2.5	Freestanding 3D Structures	175
10.2.6	Morphable 3D Structures by Multistable Buckling Mechanics	176
10.3	Flexible and Stretchable Devices from 3D Assembly	177
10.3.1	Electronic Devices and Systems	177
10.3.2	Optical and Optoelectronic Devices	177
10.3.3	Scaffolds as Interfaces with Biological Systems	178
10.4	Summary	180
	Abbreviations	181
	References	181

11 Flexible and Stretchable Devices from Other Materials 183

Haotian Chen

11.1	Polymer-Based Conductive Materials	183
11.1.1	PANI	184
11.1.2	PPy	185
11.1.3	PEDOT:PSS	185
11.1.4	Organic Nanowires	185
11.2	Composite-Based Conductive Materials	189
11.2.1	Conductive Fillers Blended into Stretchable Elastomers	189
11.2.2	Conductive Film Embedded into Stretchable Elastomer	191
11.3	Textile-Based Conductive Materials	195
11.3.1	Fiber-Based Conductive Materials	195
11.3.2	Textile-Based Conductive Materials	196
11.4	Summary	199
	Abbreviations	199
	References	200

Part III Self-Powered Smart System 203

12 Active Sensors 205

Xuexian Chen

12.1	Active Touch Sensors	205
12.1.1	Static and Dynamic Pressure Sensor	206
12.1.2	Tactile Imaging Sensor	206
12.1.3	Single-Electrode Touch Sensor	207
12.2	Active Vibration Sensors	210
12.2.1	Vibration Sensor for Quantitative Amplitude Measurement	210
12.2.2	Vibration Acceleration Sensor	212
12.2.3	Vibration Direction Sensor	213
12.2.4	Acoustic Sensor	213
12.3	Active Motion Sensors	215
12.3.1	Linear Displacement Sensor	215
12.3.2	Angle Sensor	217
12.3.3	Omnidirectional Tilt Sensor	217
12.4	Active Chemical/Environmental Sensors	219

12.4.1	Chemical Sensor	219
12.4.2	UV Sensor	221
12.5	Summary	222
	Abbreviations	222
	References	223
13	Hybrid Sensing Technology	227
	<i>Xiaosheng Zhang, Yanyuan Ba, and Mengdi Han</i>	
13.1	Dual Hybrid Power Technology	227
13.1.1	Triboelectric–Piezoelectric Nanogenerator	228
13.1.2	Triboelectric–Photovoltaic Nanogenerator	231
13.1.3	Triboelectric–Electromagnetic Nanogenerator	233
13.2	Multiple Hybrid Power Technology	234
13.2.1	Triple Hybrid Generators	234
13.2.2	Four-Mechanism Hybrid Generators	235
13.3	Hybrid Sensors and Applications	238
13.3.1	Piezoelectric–Triboelectric Hybrid Sensors	239
13.3.2	Electromagnetic–Triboelectric Hybrid Sensors	242
13.3.3	Multiple Hybrid Sensors	247
13.4	Summary	249
	Abbreviations	250
	References	251
14	Smart Actuators	253
	<i>Xiaosheng Zhang and Zhaohui Wu</i>	
14.1	Actuators in Optics	254
14.1.1	Laser Controller	254
14.1.2	Tunable Optical Membranes	258
14.2	Actuators in Biomedicine	261
14.2.1	Bladder Illness Curation	261
14.2.2	Drug Delivery	264
14.3	Actuators in Industrial Application	267
14.3.1	Electrospinning System	268
14.3.2	Syringe Printing	270
14.4	Actuators in Microfluidic Manipulation	272
14.4.1	Droplet Motion Drive	272
14.4.2	Microfluidic Transport	274
14.5	Summary	276
	Abbreviations	276
	References	277
15	Flexible and Stretchable Electronic Skin	281
	<i>Mayue Shi and Hanxiang Wu</i>	
15.1	Design of Electronic Skin	281
15.2	Electronic Skin for Mechanical Sensing	285

- 15.2.1 Pressure Sensing 285
- 15.2.2 Sliding Sensing 288
- 15.2.3 Bending Sensing 288
- 15.2.4 Location Sensing 289
- 15.2.5 Strain Sensing 290
- 15.3 Electronic Skin for Physiological Sensing 294
 - 15.3.1 Multimodal Sensing 294
 - 15.3.2 Physiological Monitoring 296
 - 15.3.3 Signal Transmission 298
 - 15.3.4 Reliability 298
- 15.4 Summary 301
 - Abbreviations 301
 - References 302

Part IV Applications of Flexible and Stretchable Self-Powered Smart System 305

- 16 All-in-One Self-Powered Microsystems 307**
Xiaosheng Zhang and Danliang Wen
 - 16.1 All-in-One Energy Harvester 308
 - 16.1.1 One-Structural Triple-mechanism Energy Harvester 309
 - 16.1.2 One-Structural Flexible Energy Harvester 310
 - 16.1.3 One-Structural Multi-mechanism Energy Harvester 312
 - 16.2 All-in-One Power Unit 316
 - 16.2.1 Connection of TENGs and Traditional Circuits 316
 - 16.2.2 Integration of TENGs and Flexible Supercapacitors 320
 - 16.3 All-in-One Self-Powered Microsystems 326
 - 16.3.1 All-Fiber-Based Self-Powered Microsystem 326
 - 16.3.2 All-in-One Self-charging Smart Bracelet 326
 - 16.3.3 Other Research of All-in-One Self-Powered Microsystems 327
 - 16.4 Summary 335
 - Abbreviations 335
 - References 336
- 17 Applications in Biomedical Systems 339**
Cunman Liang and Mengdi Han
 - 17.1 Power Sources of Implantable Medical Devices 340
 - 17.1.1 Power Source for Pacemakers 340
 - 17.1.2 Power Source for Medical Lasers 342
 - 17.1.3 Hybrid Power Source for Medical Applications 344
 - 17.2 Active Monitoring 345
 - 17.2.1 Nanogenerators for Cardiac Monitoring 345
 - 17.2.2 Multifunctional Real-Time Monitoring 347
 - 17.2.3 Versatile Energy Conversion and Monitoring 350

- 17.2.4 Self-Powered Wireless Body Sensor Network 352
- 17.3 Self-Powered System for Electric Stimulation in Tissue Engineering 353
- 17.3.1 Self-Powered Electrical-Stimulation-Assisted Neural Differentiation System 353
- 17.3.2 Biodegradable TENG for in Vivo Short-Term Stimulation 354
- 17.3.3 Absorbable Bioresorbable in Vivo Natural-Materials-Based TENGs 355
- 17.4 Summary 356
- Abbreviations 357
- References 357

18 Applications in Internet of Things and Artificial Intelligence 359

Mayue Shi and Hanxiang Wu

- 18.1 Applications in Internet of Things 359
- 18.1.1 Internet of Things 359
- 18.1.2 Self-Powered Sensing Nodes 360
- 18.1.3 Wireless Communication 363
- 18.1.4 Power Management Circuit 364
- 18.2 Applications in Artificial Intelligence 367
- 18.2.1 Artificial Intelligence 367
- 18.2.2 Electronic Skin 368
- 18.2.3 Robotic Prosthetics 371
- 18.2.4 Human–Machine Interfaces 374
- 18.3 Summary 376
- Abbreviations 376
- References 377

19 Applications in Environmental Monitoring/Protection 379

Hang Guo and Wei Tang

- 19.1 Self-powered Environmental Monitoring System 379
- 19.1.1 Phenol Detection 380
- 19.1.2 Dopamine Detection 382
- 19.1.3 Heavy Metal Ion Detection 383
- 19.2 Self-powered Environmental Protection 384
- 19.2.1 Degradation of AAB 384
- 19.2.2 Degradation of Methyl Orange (MO) System 384
- 19.2.3 Removing Fly Ash and SO₂ 385
- 19.2.4 Seawater Desalination (SD) and Electrolysis (SE) System 386
- 19.3 Self-powered Electrochemistry System 388
- 19.3.1 Water Electrolysis Units 388
- 19.3.2 Electrochemical Polymerization System 389
- 19.3.3 Electrochemical Reduction System 390

19.4	Self-powered Anticorrosion	391
19.4.1	Driven by Mechanical Energy	392
19.4.2	Driven by Wave Energy	393
19.5	Summary	394
	Abbreviations	394
	References	395
	Index	399
