

Table of contents

1	Chapter 1: General introduction	1
1.1	<i>Bursaphelenchus xylophilus</i> and related species	3
1.2	Pine wilt disease	4
1.2.1	Factors affecting the spread of <i>Bursaphelenchus xylophilus</i> and pine wilt disease outbreak	4
1.2.2	Disease process	4
1.2.3	History of spread	6
1.3	Spread of <i>Bursaphelenchus xylophilus</i> by vector beetles.....	6
1.4	Non-vector spread of <i>Bursaphelenchus xylophilus</i>	10
1.5	Hosts of <i>Bursaphelenchus xylophilus</i>	11
1.5.1	Non-susceptible conifers	11
1.5.2	Susceptible conifers.....	12
1.5.3	Distribution, relevance and application of <i>Pinus sylvestris</i>	13
1.5.4	Critique of population dynamics and pathogenicity investigations	15
1.6	Pest risk analysis, management and contingency planning.....	16
1.7	Thesis objectives.....	20
1.8	List of publications in peer-reviewed journals	21
1.9	References	23
2	Chapter 2: Publication I: Long-term survival and non-vector spread of the pinewood nematode, <i>Bursaphelenchus xylophilus</i> , via wood chips	35
2.1	Publication I.....	35
2.2	Publication I - Supplementary material	65
3	Chapter 3: Publication II: Population dynamics and pathogenicity of <i>Bursaphelenchus xylophilus</i> in seven- to eight-year-old <i>Pinus sylvestris</i> trees.....	71
4	Chapter 4: Publication III: The pine wood nematode, <i>Bursaphelenchus xylophilus</i> (Steiner & Buhrer) Nickle, and its pathogenicity to German <i>Pinus sylvestris</i> provenances	95
5	Chapter 5: General discussion.....	113

Table of contents

5.1	General discussion.....	115
5.1.1	Long-term survival of <i>Bursaphelenchus xylophilus</i> in wood chips.....	115
5.1.2	Non-vector spread of <i>Bursaphelenchus xylophilus</i> via wood chips.....	116
5.1.3	Population dynamics in seven- to eight-year-old <i>Pinus sylvestris</i> trees	118
5.1.4	Pathogenicity in seven- to eight-year-old <i>Pinus sylvestris</i> trees	120
5.1.5	Pathogenicity to German <i>Pinus sylvestris</i> provenances.....	122
5.2	References	125
6	Chapter 6: Conclusions	129
	Curriculum vitae.....	131
