Preface *ix*

1	TiO₂ Nanoparticles: Properties and Applications	1
	<i>Ozioma U. Akakuru, Zubair M. Iqbal, and Aiguo Wu</i>	
1.1	Introduction	1
1.2	Properties of TiO ₂ Nanoparticles	2
1.2.1	Crystal Properties	2
1.2.2	Optical Properties	3
1.2.3	Electrochemical Properties	5
1.3	Synthesis of TiO ₂ Nanoparticles	6
1.3.1	The Hydrothermal Method	6
1.3.2	Sol–Gel Method	8
1.3.3	Solvothermal Method	10
1.3.4	Chemical and Physical Vapor Deposition Method	11
1.3.5	Thermal Decomposition Method	12
1.3.6	Oxidation Method	13
1.4	Applications of TiO ₂ Nanoparticles	14
1.4.1	Nanobiotechnology	14
1.4.2	Nanomedicine	17
1.4.3	Wastewater Treatment	21
1.4.4	Air Treatment	26
1.4.5	Energy Devices	29
1.4.6	Water Splitting for Hydrogen Production	30
1.4.7	Food and Cosmetics	34
1.4.8	Soil Remediation	35
1.4.9	Pesticides Removal	36
1.4.10	Paint and Paper Productions	40
1.5	Conclusion	41
	Acknowledgments	42
	References	42

2	Toxicity of TiO₂ Nanoparticles	67
	<i>Gohar I. Dar, Madiha Saeed, and Aiguo Wu</i>	
2.1	Introduction	67
2.2	Modes of Exposure, Biodistribution, Clearance, and Fate of TiO ₂ NPs	70
2.2.1	Inhalation	70
2.2.2	Oral Route	71
2.2.3	Injection	72
2.2.4	Dermal Route	73
2.3	Cell Death Pathways Induced by TiO ₂ NPs	74
2.3.1	Apoptosis	74
2.3.2	Autophagy	76
2.3.3	Crosstalk Between Apoptosis and Autophagy	76
2.3.4	Necrosis	77
2.4	Toxicity of TiO ₂	77
2.4.1	Cellular Uptake	78
2.4.2	Oxidative Stress Effectuates by TiO ₂	78
2.4.3	Genotoxicity	79
2.4.4	Reproductive and Developmental Toxicity	81
2.4.5	Carcinogenicity	81
2.4.6	Immunotoxicity of TiO ₂ NPs	83
2.4.7	Neurotoxicity of TiO ₂ NPs	83
2.4.8	Acute Toxicity of TiO ₂	84
2.4.9	Sub-acute Toxicity of TiO ₂	86
2.4.10	Sub-chronic Toxicity of TiO ₂ NPs	87
2.5	Alternative Perspective	88
2.6	Conclusion	89
	Acknowledgments	89
	References	89
3	Antibacterial Applications of TiO₂ Nanoparticles	105
	<i>Chen Xu, Jianjun Zheng, and Aiguo Wu</i>	
3.1	Introduction	105
3.2	Antibacterial Effect of TiO ₂ Nanoparticle	107
3.3	Ion-Doped TiO ₂ Nanoparticles and Their Antibacterial Effect	113
3.4	Antibacterial Agent-Doped TiO ₂ Nanoparticles and Their Antibacterial Effect	120
3.4.1	Ag-Doped TiO ₂ Nanoparticles	120
3.4.2	Zn-Doped TiO ₂ Nanoparticles	123
3.4.3	Cu-Doped TiO ₂ Nanoparticles	123
3.5	Antibacterial Applications of TiO ₂ -Based Nanoparticles	124
3.5.1	Medical Application	124
3.5.2	Environmental Application	125
3.5.3	Food Safety Application	126
3.6	Conclusion and Outlook	126
	Acknowledgments	126
	References	127

4	Surface-Enhanced Raman Spectrum of TiO₂ Nanoparticle for Biosensing (TiO₂ Nanoparticle Served as SERS Sensing Substrate)	133
	<i>Jie Lin and Aiguo Wu</i>	
4.1	Introduction	133
4.2	SERS Effect of Nanomaterial Substrate	135
4.2.1	Mechanism of Non-metal SERS Platforms	135
4.2.2	Advantages for TiO ₂ SERS Substrate	136
4.2.3	SERS Mechanism of TiO ₂ SERS Substrate	137
4.2.4	Novel Methods to Improve TiO ₂ SERS Enhancement	139
4.3	TiO ₂ SERS Substrate Applied in Biosensing	144
4.3.1	Cell Capture on TiO ₂ Nanorod Arrays	144
4.3.2	Cell Capture Performance of TiO ₂ Coatings	147
4.4	Conclusions and Future Perspectives	150
	Acknowledgments	151
	References	151
5	Cancer Theranostics of White TiO₂ Nanomaterials	153
	<i>Yang Gao, Sijia Sun, Zhibin Yin, Yanhong Liu, Aiguo Wu, and Leyong Zeng</i>	
5.1	Introduction	153
5.2	TiO ₂ as Inorganic Photosensitizer for Photodynamic Therapy	154
5.2.1	Photodynamic Therapy Principle	154
5.2.2	Ultraviolet Light Responsive Photodynamic Therapy	155
5.2.3	980 nm Near-Infrared Light Responsive Photodynamic Therapy	156
5.2.4	808 nm Near-Infrared Light Responsive Photodynamic Therapy	158
5.2.5	Organic/Inorganic Dual-Mode Photodynamic Therapy	161
5.3	TiO ₂ as Sonosensitizer for Sonodynamic Therapy	162
5.3.1	Sonodynamic Therapy Principle	162
5.3.2	Sonodynamic Therapy	162
5.3.3	High Intensity-Focused Ultrasound Therapy	166
5.4	TiO ₂ as Multifunctional Nanoprobes for Visualized Theranostics	167
5.4.1	Magnetic Resonance Imaging and Phototherapy	167
5.4.2	Fluorescent Imaging and Phototherapy	168
5.4.3	Multi-mode Imaging and Phototherapy	169
5.4.4	Drug Delivery and Synergistic Therapy	170
5.5	Conclusions and Future Perspectives	172
	Acknowledgments	173
	References	173
6	Cancer Theranostics of Black TiO₂ Nanoparticles	185
	<i>Ting Dai, Wenzhi Ren, and Aiguo Wu</i>	
6.1	Introduction	185
6.1.1	Limitations of White TiO ₂ Nanoparticles in Cancer Treatment	185
6.1.2	Advantages of Black TiO ₂ Nanoparticles in Cancer Treatment	186
6.2	Preparations and Properties of Black TiO ₂ Nanomaterials	187
6.2.1	Hydrogenation Reduction Method	187

6.2.2	Hydrogen Plasma Method	187
6.2.3	Chemical Reduction Method	188
6.2.4	Properties of Black TiO ₂ Nanomaterials	188
6.3	Black TiO ₂ for Phototherapy	189
6.3.1	Black TiO ₂ for Photothermal Therapy	190
6.3.2	Black TiO ₂ for Photodynamic Therapy	194
6.3.3	Black TiO ₂ for Synergistic Photothermal and Photodynamic Therapy	194
6.4	Black TiO ₂ for Imaging-Guided Phototherapy	195
6.5	Black TiO ₂ for Synergistic Chemo-phototherapy	199
6.6	Black TiO _{2-x} for Synergistic of Sonodynamic–Photothermal Therapy	202
6.7	Overview and Further Perspective	205
	Acknowledgments	207
	References	207
7	Neurodegenerative Disease Diagnostics and Therapy of TiO₂-Based Nanoparticles	217
	<i>Xiang Gao, Jieling Qin, Zhenqi Jiang, Juan Li, and Aiguo Wu</i>	
7.1	Introduction	217
7.2	The Symptoms of Neurodegenerative Disease	219
7.3	Traditional Diagnosis and Treatment for NDs	220
7.3.1	Current Methods for the Diagnosis of NDs	220
7.3.2	Current Medicine for the Treatment of NDs	220
7.4	Nanoparticles in the Diagnosis and Treatment of NDs	221
7.4.1	The Diagnosis of ND Using NPs	221
7.4.2	The Treatment of ND Using NPs as Drug Delivery	222
7.5	The Diagnosis of NDs Using TiO ₂	222
7.6	The Therapy of NDs Using TiO ₂	225
7.6.1	The Therapy of NDs Using TiO ₂ as Drug Delivery Platform	225
7.6.2	The Therapy of NDs Using TiO ₂ as Light-Responsive Material	226
7.7	The Dilemma Situation of TiO ₂ in the NDs	226
7.8	Conclusion	228
	Acknowledgments	228
	References	228
	Index	237
