Introduction	7
1 Identifying values	21
1.1 The fundamentals of property evaluation	22
1.1.1 Property – an asset	22
1.1.2 Reasons for property evaluation	26
1.1.3 Concepts of value	29
1.2 Established valuation procedures	38
1.2.1 The comparative value procedure	40
1.2.2 The real value procedure	49
1.2.3 The capitalized earnings value procedure	55
1.2.4 The residual value method	67
1.2.5 The discounted cash flow method	70
1.2.6 Conclusion	76
1.3 Identifying values using the dynamic method	78
1.3.1 The microanalysis – the tenant cycle and tenant dynamics	79
1.3.2 The macroanalysis – the location	112
1.3.3 Matching	139
1.3.4 Threats	158
2 Raising values	165
2.1 Possibilities of value enhancement	168
2.2 An initial approach: The investment class	170
2.3 Levels of value added	172
2.4 Participants in value enhancement	176
3 Realizing values	181
3.1 Property in the capital market	182
3.2 The property investment market in Germany	183
3.2.1 Players	185
3.3 Conclusion	199
4 Triad	201
4.1 Annual financial statements in the property industry	203
4.1.1 Income statement	204
4.1.2 The balance sheet	209
4.1.3 Cash flow statement	213

4.2	Balance sheet analysis	216
4.2.1	Key performance indicators	217
4.2.2	Example of a key figure analysis	224
4.2.3	The trade deal	231
5	Conception of a property rating	233
5.1	Optimum investment duration	233
5.2	Rating	234
5.2.1	Current rating methods	234
5.2.2	Rating in the dynamic method	235
5.2.3	Structure of the dynamic rating	239
6	The dynamic method as an IT solution	243
6.1	The functions	243
6.2	Operation	244
6.3	Your access to the software	245
	Epilogue	246
	Note of thanks	247
	Bibliography	249
	Index	253
