

Contents

Part I Background and Fundamentals

1 Automatic Text Summarization: Past, Present and Future	3
Horacio Saggion and Thierry Poibeau	
2 Information Extraction: Past, Present and Future	23
Jakub Piskorski and Roman Yangarber	

Part II Named Entity in a Multilingual Context

3 Learning to Match Names Across Languages	53
Inderjeet Mani, Alex Yeh, and Sherri Condon	
4 Computational Methods for Name Normalization Using Hypocoristic Personal Name Variants.....	73
Patricia Driscoll	
5 Entity Linking: Finding Extracted Entities in a Knowledge Base	93
Delip Rao, Paul McNamee, and Mark Dredze	
6 A Study of the Effect of Document Representations in Clustering-Based Cross-Document Coreference Resolution.....	117
Horacio Saggion	

Part III Information Extraction

7 Interactive Topic Graph Extraction and Exploration of Web Content	137
Günter Neumann and Sven Schmeier	
8 Predicting Relevance of Event Extraction for the End User	163
Silja Huttunen, Arto Vihavainen, Mian Du, and Roman Yangarber	

9	Open-Domain Multi-Document Summarization via Information Extraction: Challenges and Prospects.....	177
	Heng Ji, Benoit Favre, Wen-Pin Lin, Dan Gillick, Dilek Hakkani-Tur, and Ralph Grishman	
 Part IV Multi-Document Summarization		
10	Generating Update Summaries: Using an Unsupervised Clustering Algorithm to Cluster Sentences.....	205
	Aurélien Bossard	
11	Multilingual Statistical News Summarization	229
	Mijail Kabadjov, Josef Steinberger, and Ralf Steinberger	
12	A Bottom-Up Approach to Sentence Ordering for Multi-Document Summarization	253
	Danushka Bollegala, Naoaki Okazaki, and Mitsuru Ishizuka	
13	Improving Speech-to-Text Summarization by Using Additional Information Sources	277
	Ricardo Ribeiro and David Martins de Matos	
14	Multi-Document Summarization Techniques for Generating Image Descriptions: A Comparative Analysis.....	299
	Ahmet Aker, Laura Plaza, Elena Lloret, and Robert Gaizauskas	
	Index.....	321
