

Acknowledgments VII

Reading Guide IX

About the Authors XIII

1 Introduction 1

2 Necessity of Ecodesign 9

2.1 Challenges 12

2.1.1 The Explosive Growth of the World Population 12

2.1.2 The Deterioration of the Natural Ecosystem 13

2.1.3 The Depletion of Natural Resources 14

2.2 Limits to Growth 16

2.2.1 Environmental Impact of Human Activity 17

2.2.2 Ecological Footprint 19

2.3 The Alarm Bell Is Still Ringing 21

2.4 Environmental Initiatives over the Past Years 24

2.5 Stakeholders of a Sustainable Society 26

2.6 Conclusion 28

3	Emergence of Ecodesign and the Circular Economy Model	33
3.1	Ecodesign	35
3.2	Lansink's Ladder	38
3.3	Sustainable Development	39
3.3.1	People, Planet, Profit	39
3.3.2	The Dilemma of Agreement	41
3.3.3	Sustainable Development Goals	42
3.3.4	Eco-efficiency	44
3.3.5	Cradle to Cradle	44
	3.3.5.1 Eco-effectiveness	45
	3.3.5.2 The C2C Business	46
3.4	The Circular Economy Model	47
3.4.1	The Principles of a Circular Economy Model	48
3.4.2	Value Preservation in the Circular Economy Model	50
3.4.3	The Relation between Ecodesign and the Circular Economy Model	52
3.5	Bio-(based) Economy – Green Economy – Blue Economy	53
3.5.1	Bio-(based) Economy	53
3.5.2	Green Economy	54
3.5.3	Blue (Marine) Economy by the European Commission	55
4	Design for X	59
4.1	Feedstock and Materials	62
4.2	Technologies (Design for Manufacturing – DfM)	64
4.3	Assembly (Design for Assembly – DfA)	64
4.4	Packaging and Distribution (Design for Logistics – DfL)	66
4.5	Design for Use – DfU	67
4.5.1	Consumer Behavior (Design for Sustainable Behavior – DfSB)	68
4.5.2	Energy Consumption (Design for Energy Efficiency – DfEE)	71
4.5.3	Consumables	72
4.5.4	Extending Life Span (Design for Longevity – DfLG)	73
4.6	Design for Disassembly (DfD)	74
4.7	Design for Reuse and Repurposing (DfRR)	75
4.8	Design for Repair and Maintenance (DfR – DfM)	75
4.8.1	Dilemma: Repair versus New Product	76
4.9	Design for Remanufacturing or Refurbishing (DfRM – DfRF)	77
4.10	Design for Recycling (DfR)	78
4.10.1	Recyclability of Materials in General	79
4.10.2	Recyclability of Metals	80

4.10.3	Recyclability of Plastics	81
4.10.4	Recyclability of Ceramics and Glass	85
4.10.5	Recyclability of Fibers	86
4.11	Design for Composting (DfC)	87
4.12	Waste Strategies that Do Not Fit in the Circular Economy Model	92
4.12.1	Incineration	92
4.12.2	Landfill	93
4.13	Design for Circularity (DfCi)	93
5	Ecodesign Tools	97
5.1	Strategy Tools	100
5.1.1	Begin with the End in Mind	100
5.1.2	The Nightmare Scenario	101
5.1.3	The Business Model Canvas	101
5.1.4	The Business Model Innovation Grid (BMIX)	102
5.1.5	The Sustainable Innovation System (SIS) Tool Kit	102
5.1.6	Risk&Race	103
5.1.7	Global Reporting Initiative	103
5.2	Ecodesign Tools Based on Product Life Cycle Thinking	105
5.2.1	Quantitative Tools	106
5.2.1.1	Life Cycle Assessment (LCA)	106
5.2.1.1.1	Methodology	107
5.2.1.1.2	Conclusion	113
5.2.1.2	Eco-indicators	114
5.2.1.2.1	Methodology	115
5.2.1.2.2	Conclusion	118
5.2.1.3	(Product) Carbon Footprint	119
5.2.1.3.1	Methodology	120
5.2.1.3.2	Conclusion	121
5.2.1.4	Energy Balance	122
5.2.1.4.1	Methodology	122
5.2.1.4.2	Conclusion	123
5.2.1.5	Exergetic Life Cycle Analysis (ELCA)	124
5.2.1.5.1	Methodology	125
5.2.1.5.2	Conclusion	125
5.2.1.6	Life Cycle Sustainability Assessment (LCSA)	126
5.2.1.6.1	Methodology	127
5.2.1.6.2	Conclusion	128

5.2.2	Qualitative Tools	128
5.2.2.1	LiDS Wheel	129
5.2.2.1.1	Approach	130
5.2.2.1.2	Use	134
5.2.2.2	Eco-star	134
5.2.2.2.1	Approach	135
5.2.2.2.2	Use	136
5.2.2.3	Eco-(innovation) Compass	139
5.2.2.4	Checklists	140
5.2.2.5	Ecodesign Rules of Thumb for a Circular Economy Model 146	
5.2.2.5.1	General Rules of Thumb	146
5.2.2.5.2	Focus on Reuse by the Same Consumer	147
5.2.2.5.3	Focus on Reuse by Different Consumers	148
5.2.2.5.4	Focus on Refurbish and Remanufacture	148
5.2.2.5.5	Focus on Recycling	149
5.2.2.5.6	Checklist Visualization	149
5.3	Conclusions	150
6	Ecodesign in the Product Development Process	157
6.1	The Design Process	160
6.1.1	Stage 1: Strategic Choices	161
6.1.2	Stage 2: Product Ideas	162
6.1.3	Stage 3: Product Definition	163
6.1.4	Stages 4, 5, and 6: System, Concept, and Detailed Design	163
6.2	Eco-Innovation	164
6.3	Implementation of Ecodesign by System Thinking	166
6.4	Evaluation of Ecodesign by Multi-Objective Optimization	168
6.5	Ecodesign Examples	170
6.5.1	Master-Project “Cargo-Tram – Last Mile Delivery” by Frederik Carette (Graduate 2018)	170
6.5.2	Master-Project FIBIO by Laure Herweyers (Graduate 2018)	171
6.5.3	Master-Project “HyperLeafs” by Thomas Roscam (Graduate 2019)	172
6.5.4	Master-Project “ZERO DISCARDS” by Nicholas Van Beylen (Graduate 2017)	173
6.5.5	Master-Project “Re-shuttle” by Robrecht Vandekerckhove (Graduate 2019)	174
6.6	Conclusion	175

7	Stimulating Ecodesign	179
7.1	Biomimicry	182
7.2	Blue Economy	184
7.3	Green Economy	185
7.4	Industry 4.0	186
7.5	Learn from the Past	188
8	Ecodesign and Entrepreneurship	191
8.1	The Value Chains	194
8.1.1	Internal and External Stakeholders	194
8.1.2	Costs and Benefits	196
8.2	Integrating Ecodesign	198
8.2.1	Company Leadership	199
8.2.1.1	Corporate Social Responsibility	199
8.2.2	Process Level: Environmental Permits	200
8.2.3	Product Level: Ecodesign	201
8.3	Value and Profit	201
8.4	Risk	202
9	Ecodesign and Governance	205
9.1	Standards	207
9.1.1	ISO Standards	209
9.1.1.1	ISO 9000 Standards	210
9.1.1.2	ISO 14000 Standards and EMAS	210
9.1.1.3	ISO 26000 Standards	211
9.1.1.4	ISO 14080 Standard	212
9.1.2	Country Standards	212
9.2	EU Directives and Regulations	213
9.2.1	Ecodesign for Energy-Consuming Products	214
9.2.2	Product Environmental Footprint (PEF)	216
9.2.3	REACH	216
9.2.4	WEEE	217
9.2.5	RoHS	218
9.3	Government Stimuli	218
9.3.1	In Pursuit of the Circular Economy Model	218
9.3.2	Extended Producer Responsibility	218
9.3.2.1	Take-Back Obligation	219
9.3.2.2	Collective Initiatives	220

9.3.3	Government Investments	220
9.3.4	Government Public Procurements	221
10	Ecodesign and Consumers	225
10.1	Sustainable Consumption	229
10.2	Needs and Desires	234
10.3	Frugality	236
10.4	Stimuli	236
10.4.1	Ecolabels	237
10.4.2	Governments and Consumer Organizations	237
11	Conclusions and Perspectives	241
