

Contents

1 Breast

1.1	Breast, Fine-Needle Aspiration Biopsy: Introduction, Imaging, FNAB, Laboratory, Reporting, Axillary Lymph Nodes	1
1.2	Breast, Fine-Needle Aspiration Biopsy: Normal Findings, Benign Disorders, Proliferative Breast Disease With and Without Atypia, Benign Tumors	16
1.3	Breast, Fine-Needle Aspiration Biopsy: Malignant Lesions	56
1.4	Breast: Nipple Discharge.	96

2 Respiratory Tract and Mediastinum

2.1	Respiratory Tract, FNAB and Exfoliative Cytology: Introduction, Normal and Abnormal Cells, Non-cellular Components, Respiratory Infections.	107
2.2	Respiratory Tract, FNAB and Exfoliative Cytology: Tumor-like Lesions, Benign and Malignant Tumors	134
2.3	Respiratory Tract: Bronchoalveolar Lavage	176
2.4	Mediastinum: Introduction, Non-tumorous and Neoplastic Disorders, Thymus Gland and its Diseases	204

3 Effusions

3.1	Effusions: Pleural, Pericardial, Peritoneal, Tunica Vaginalis Testis Benign and Equivocal Lesions	241
3.2	Effusions: Pleural, Pericardial, Peritoneal, Tunica Vaginalis Testis Malignant Lesions	260
3.3	Effusions, Aspiration and Washing: Peritoneal Cavity, Cul-de-Sac, Douglas Pouch	300
3.4	Effusions: Synovial Fluids.	314

4 Thyroid and Parathyroid Glands

4.1	Thyroid.	325
4.2	Thyroid and Parathyroid Glands: Benign and Malignant Lesions	336

5 Salivary Glands, Head and Neck

5.1	Salivary Glands	401
5.2	Head and Neck Lesions	458

6 Central Nervous System

6.1	Central Nervous System: Cerebrospinal Fluid	491
6.2	Central Nervous System, FNAB and Imprints: Intracranial Lesions	514

7 Eye

7.1	Introduction	535
7.2	Globe	537
7.3	Orbit	543
7.4	Eyelid	545
7.5	Further Reading	546

8 Oral Cavity and Oropharynx

8.1	Introduction	563
8.2	Brush Cytology	564
8.3	Processing of the Cell Material	564
8.4	Additional Analyses	565
8.5	Cytology of Benign Oral Lesions	566
8.6	Leukoplakia: The Cytodiagnostic Challenge	567
8.7	Squamous Cell Carcinoma and Its Variants	568
8.8	Other Primary Tumors and Metastases	568
8.9	Further Reading	569

9 Liver

9.1	Liver: Introduction, Normal Findings, Benign Lesions and Tumors, Equivocal and Premalignant Lesions	587
9.2	Liver: Malignant Lesions, Corresponding Additional Analyses	604

10 Pancreas, Extrahepatic Bile Ducts, Ampullary Region

10.1	Pancreas	631
10.2	Extrahepatic Bile Ducts and Ampullary Region	680

11 Gastrointestinal Tract

11.1	Introduction	701
11.2	Esophagus	702
11.3	Stomach, Duodenum, Small Bowel, Large Bowel, Anal Canal, and Perirectal Area	707
11.4	Further Reading	711

12 Kidney, Adrenal Glands, Retroperitoneum

12.1 Kidney 733

12.2 Adrenal Glands 766

12.3 Retroperitoneum 778

13 Urinary Tract

13.1 Urinary Tract: Introduction, Sampling and Preparation, Ancillary Studies.... 799

13.2 Urinary Tract: Normal and Metaplastic Findings, Atypias, Benign Lesions
and Benign Tumors, Inflammation/Infections 808

13.3 Urinary Tract: Precancerous Urothelial Lesions, Malignant Lesions 830

14 Male Genital Organs

14.1 Prostate 853

14.2 Penis 898

15 Lymph Nodes

15.1 Lymph Nodes: FNAB, Laboratory Procedures, Ancillary Techniques,
Histology and Cytology of Benign Lymph Nodes..... 907

15.2 Lymph Nodes: Common Lymphadenopathy, Infections, Particular
Benign Lesions 926

15.3 Lymph Nodes: Malignant Lymphomas, Histiocytic Sarcoma,
Myeloproliferative Disorders, Metastatic Neoplasms 950

16 Skin Lesions and Unusual Subcutaneous Lesions

16.1 Introduction..... 1025

16.2 Common and Rare Skin Lesions, Benign and Malignant (Selected Entities)... 1026

16.3 Primary Cutaneous Tumors Mimicking Metastatic Deposits and Vice-Versa... 1034

16.4 Unusual Nonneoplastic Masses in Skin and Subcutaneous Regions..... 1034

16.5 Further Reading 1037

17 Soft Tissue and Bone

17.1 Soft Tissue and Bone: Introduction, Benign and Intermediate Tumoral
Lesions 1055

17.2 Soft Tissue and Bone: Malignant Tumoral Lesions..... 1092

18 Synopsis and Algorithms

1.2	Breast, Fine-Needle Aspiration Biopsy: Normal Findings, Benign Lesions and Tumors, Infection/Inflammation, Proliferative Disease with Atypia, Noncellular Elements	1109
1.3	Breast, Fine-Needle Aspiration Biopsy: Intraepithelial Neoplasia, Malignant Tumors	1116
1.4	Breast: Nipple Discharge Microscopic Features in correlation with the Etiology of the Lesion	1122
2.1	Respiratory Tract, FNAB and Exfoliative Cytology: Normal and Abnormal Cells, Granulomatous and Infectious Diseases.	1124
2.2	Respiratory Tract, FNAB and Exfoliative Cytology: Tumor-like Lesions, Benign and Malignant Tumors	1129
2.4	Mediastinum: Non-tumorous Disorders, Thymus Gland and its Diseases, Lymphoid Disorders	1138
3.1	Effusions: Pleural, Pericardial, Peritoneal, Tunica Vaginalis Testis Benign and Equivocal Lesions	1143
3.2	Effusions: Pleural, Pericardial, Peritoneal, Tunica Vaginalis Testis Malignant Lesions	1146
3.3	Effusions, Aspiration and Washing: Peritoneal Cavity, Cul-de-Sac, Douglas Pouch Benign and Malignant Lesions	1151
4.2	Thyroid and Parathyroid Glands: Benign and Malignant Lesions	1153
5.1	Salivary Glands: Crystalloids, Nonneoplastic Cells and Disorders, Benign and Malignant Neoplasms.....	1162
5.2	Head and Neck Lesions: Congenital Neck Lesions, Adjacent Pseudotumors and Neoplasms, Benign noncongenital and nonneoplastic Lesions, Benign and Malignant Neoplasms.....	1170
6.1	Central Nervous System: Cerebrospinal Fluid Normal Findings, Atypical Cells, Nontumoral and Neoplastic Lesions	1174
8	Oral Cavity and Oropharynx: Benign Oral Lesions, Leukoplakia, Squamous Cell Carcinoma, Rare Tumors and Metastases	1178
9.1	Liver: Normal Findings, Inflammation/Infections, Benign Lesions, Benign Tumors, Equivocal and Premalignant Lesions.....	1181
9.2	Liver: Malignant Lesions	1185
10.1	Pancreas, Extrahepatic Bile Ducts, Ampullary Region: and Normal Findings, Contaminants, Inflammation/Infections, Non-tumorous	
10.2	Cystic Lesions, Neoplastic Cysts, Malignant Lesions, Endocrine Tumors	1188
11	Gastrointestinal Tract: Normal Cytology and Selected Lesions of the Esophagus, Barrett Esophagus, Stomach, Bowel, Anal Canal, Perirectal Area.....	1198

12.1	Kidney: Normal Findings, Inflammation/Infections, Cystic Lesions, Benign and Malignant Renal Tumors, Tumors of the Renal Pelvis, Pediatric Renal Tumors.....	1203
12.2	Adrenal Glands: Normal Findings, Benign and Malignant Primary Lesions....	1209
12.3	Retroperitoneum: Nonneoplastic Lesions, Benign Tumors, Sarcomas, Germ Cell Tumors, Metastases.....	1211
13.2	Urinary Tract: Normal and Metaplastic Findings, Degenerative and Reactive Atypias, Benign Lesions, Benign Tumors, Inflammation/Infections	1215
13.3	Urinary Tract: Urethral Neoplasms, Precancerous Urothelial Lesions, Papillary Transitional Carcinoma, Other Primary Carcinomas, Carcinomas invading the Urinary Collecting System.....	1220
14.1	Prostate: Normal and Hyperplastic Prostate, Metaplasia, Prostatitis, Epithelial Atypias, FNAB Contaminants, Common Adenocarcinoma, Rare Primary Neoplasms, Non-epithelial and Biphasic Malignancies	1224
15.2	Lymph Nodes: Reactive Lymphadenopathy, Infections, Particular Lymphadenopathies and Miscellaneous Benign Lesions	1230
15.3	Lymph Nodes: Small and Medium Sized B-Cell NHLs, Plasmacell Neoplasms, Blastic B-Cell NHLs, T-Cell Lymphomas, Hodgkin Lymphomas, Histiocytic Sarcoma, Myeloproliferative Disorders.....	1233
16	Skin Lesions and Unusual Subcutaneous Lesions: Varied Common and Rare Skin Lesions (Benign and Malignant), Cutaneous Tumors Mimicking Metastases, Nonneoplastic Masses in Skin and Subcutis, Tumor Mass in the Groin due to Particle Disease and Osteoarthritis.....	1243
17.1	Soft Tissue and Bone: Benign and Intermediate Tumoral Lesions Tabulated Synopsis considering Cell Types, Particular Cytologic Features, Extracellular Matrix, Age Groups, Locations, Differential Diagnosis, and other Features (Table 17.1.1 and 17.1.2)	1250
17.2	Soft Tissue and Bone: Malignant Tumoral Lesions Tabulated Synopsis considering Cytoarchitectural Patterns and Cellular Details (Table 17.2.1)	1254
