

Contents

Preface — VII

Nomenclature — IX

Abbreviations — XI

Foreword — XIII

1 Overview on the History of Mixed-Matrix Membrane — 1

- 1.1 Introduction — 1
- 1.2 Membrane Tradeoff and Robeson Curve — 1
- 1.3 Composite Membrane — 2

2 The Application of Mixed-Matrix Membranes — 5

- 2.1 Introduction — 5
- 2.2 Mixed-Matrix Membranes for Gas Separation — 5
- 2.3 Mixed-Matrix Membranes for Gas Separation — 6

3 Challenges and Techniques of Making Composite Network Membranes — 19

- 3.1 Introduction — 19
- 3.2 Mechanical Mixing — 20
- 3.3 Solution Mixing Technique — 20
- 3.4 In Situ Polymerization — 21
- 3.5 Sol–Gel Technique — 21

4 Filler Type in Mixed-Matrix Membrane — 23

- 4.1 Introduction — 23
- 4.2 Zeolites — 23
- 4.3 Metal Nanoparticles — 24
- 4.4 Silicates — 26
- 4.5 Carbon Molecular Sieve — 28
- 4.6 Metal Oxides — 28
- 4.7 Metal-Organic Structures (MOFs) — 29
- 4.8 Zeolite Imidazole Framework Structures — 30
- 4.9 Morphology of Organic/Inorganic at the Interface — 31

5 Gas Measurement and Mechanisms — 33

- 5.1 Separations Productivity and Efficiency — 33
- 5.2 Diffusion in Porous Membranes — 33

VI — Contents

- 5.3 Viscous flow — **34**
- 5.4 Knudsen Diffusion — **34**
- 5.5 Molecular Diffusion — **35**
- 5.6 Solution-diffusion Model — **35**

6 Conclusion — 37

References — 39

About the Authors — 47

Index — 51
