

Table of contents

Abstract.....XI

Zusammenfassung XIII

List of Figures..... XV

List of tables XVII

List of abbreviationsXIX

1 Introduction..... 1

1.1 Beta-lactam antibiotics..... 1

1.1.1 Nomenclature and structure of beta-lactam antibiotics 1

1.1.2 Mode of action of beta-lactam antibiotics 3

1.1.3 Resistance to beta-lactam antibiotics..... 4

1.2 Beta-lactamases..... 4

1.2.1 Classification of beta-lactamases..... 5

1.2.2 Mode of action of beta-lactamases 7

1.3 Bacterial secretion of proteins..... 8

1.3.1 Secretion of proteins through the Sec pathway 8

1.3.2 Secretion of proteins through the Tat pathway..... 10

1.3.3 Lipoprotein biosynthesis and trafficking 12

1.4 Sec- and Tat-dependent secretion of beta-lactamases..... 14

1.5 Bioinformatics prediction of the mode of secretion of bacterial proteins ... 17

1.6 Phylogeny of beta-lactamases 18

2 Aims and hypotheses 19

3 Materials and Methods..... 21

3.1 Materials..... 21

3.1.1 Chemicals and consumables 21

3.1.2 Technical equipment..... 23

3.1.3 Biochemical Kits 24

3.1.4 Buffers 24

3.1.5 Culture media..... 25

3.1.6 Antibiotics..... 26

3.1.7 Primers 26

3.1.8 Plasmids 29

3.1.9 Strains 30

3.1.10 Antibodies.....	31
3.1.11 Software.....	31
3.2 <i>Methods</i>	32
3.2.1 <i>In silico</i> methods/Bioinformatics.....	32
3.2.2 Microbiological methods.....	33
3.2.3 Verifying the bioinformatically predicted Tat secretion of diverse Proteobacteria and Nocardia	34
3.2.4 Molecular biology methods	35
3.2.5 Enzymatic modification of DNA.....	40
3.2.6 Electro-competent bacteria and electroporation	42
3.2.7 Methods of protein chemistry	43
4 Results	51
4.1 <i>In silico</i> identification and characterization of beta-lactamases	51
4.1.1 Bioinformatical analysis of beta-lactamases with a predicted Tat signal sequence	51
4.1.2 Family trees of predicted Tat-dependent beta-lactamases.....	59
4.2 <i>Testing Tat-dependent secretion of beta-lactamases of diverse bacteria in Y. enterocolitica ΔtatC and E. coli DH5α ΔtatC</i>	63
4.3 <i>Tat-dependent secretion of BlaA_{Yi} in Y. enterocolitica</i>	67
4.3.1 Isogenic pair of <i>Y. enterocolitica</i> for BlaA _{Yi} testing.....	68
4.3.2 Determination of ampicillin minimal inhibitory concentration (MIC) for BlaA _{Yi} expression in <i>Y. enterocolitica</i>	68
4.3.3 Electroblotting of cell fractions of BlaA _{Yi} -positive <i>Y. enterocolitica</i> isogenic pair.....	69
4.3.4 Relative hydrolytic activity in different compartments of the BlaA _{Yi} -positive <i>Y. enterocolitica</i> isogenic pair	70
4.4 <i>Tat-dependent secretion of BRO-1 in Y. enterocolitica</i>	71
4.4.1 Isogenic pair of <i>Y. enterocolitica</i> for BRO-1 testing.....	71
4.4.2 Determination of ampicillin minimal inhibitory concentration (MIC) for BRO-1 expression in <i>Y. enterocolitica</i>	72
4.4.3 Electroblotting of cell fractions of BRO-1-positive <i>Y. enterocolitica</i> isogenic pair.....	73
4.4.4 Relative hydrolytic activity in different compartments of the BRO-1-positive <i>Y. enterocolitica</i> isogenic pair.....	74
4.5 <i>Generation of a ΔtatC mutant of E. coli DH5α</i>	75
4.6 <i>Tat-dependent secretion of BlaA_{Ye} in E. coli DH5α</i>	76

4.6.1 Isogenic pair of DH5α for BlaA_{Ye} testing..... 76

4.6.2 Determination of ampicillin minimal inhibitory concentration
(MIC) for BlaA_{Ye} expression in *E. coli* 77

4.6.3 Relative hydrolytic activity in different compartments of the
BlaA_{Ye}-positive DH5α isogenic pair 77

4.7 *Testing Tat-dependent secretion of BlaA_{Ha}* 79

4.7.1 Isogenic pair of *Y. enterocolitica* for BlaA_{Ha} testing 79

4.7.2 Determination of ampicillin minimal inhibitory concentration
(MIC) for BlaA_{Ha} expression in *Y. enterocolitica* 79

4.7.3 Electroblothing of cell fractions of BlaA_{Ha} strains in the *Yersinia*
testing system..... 80

4.7.4 Relative hydrolytic activity in different compartments of BlaA_{Ha}
strains in the *Yersinia* testing system..... 81

4.7.5 Isogenic pair of DH5α for BlaA_{Ha} testing..... 82

4.7.6 Determination of ampicillin minimal inhibitory concentration
(MIC) for BlaA_{Ha} expression in *E. coli* 83

4.7.7 Electroblothing of cell fractions of BlaA_{Ha} strains in the DH5α
testing system..... 84

4.7.8 Relative hydrolytic activity in different compartments of BlaA_{Ha}
strains in the DH5α testing system 84

4.8 *Sec-dependent secretion of AST-1* 85

4.8.1 Isogenic pairs of *E. coli* DH5α and *Y. enterocolitica* for AST-1
testing 86

4.8.2 Determination of ampicillin minimal inhibitory concentration
(MIC) for AST-1 expression in *E. coli* DH5α 86

4.8.3 Electroblothing of cell fractions of pAST-1-Strep harbouring
isogenic *E. coli* DH5α and *Y. enterocolitica* 87

4.8.4 Relative hydrolytic activity in different cell compartments of
AST-1 strains 88

4.9 *Purification and characterization of recombinant Strep-tag labeled
beta-lactamases for testing stability towards protease-treatments* 89

4.9.1 Purification of recombinant beta-lactamases..... 90

4.9.2 Protease stability testing of purified Strep-tag labeled beta-
lactamases 92

5 Discussion 97

5.1 *Brief summary of results*..... 97

5.2 <i>In silico</i> experiments: the role of bioinformatics for Tat motif <i>predictions</i>	99
5.3 <i>A critical analysis of the microbiological verification of predicted Tat- dependent secretion</i>	101
5.4 <i>Resistance of beta-lactamases to gut proteases: interpretation of methods and results</i>	104
5.5 <i>Conclusions and outlook</i>	106
