

Contents

Preface	7
<i>Jakub Kaleta, Danny Jäger, Sascha Gerhardt, Carsten Kluth, Stefan Angermaier, Mukunda Gopal / Robert Bosch Group</i>	
Software-Features for optimization of ignition timing	9
<i>Moritz Grüninger, Olaf Toedter, Thomas Koch, Ahmed Assabiki</i>	
On the Origin of Pre-Ignition inside a Pre-Chamber Spark Plug – Gas Analysis	25
<i>Matthias Biehl, Timo Rehm, Philipp Hahn, Carsten Kluth, Rama Krishnan Saravana Kumar</i>	
Prechamber combustion and the challenges of knock detection	35
<i>Chandelier, M., Papi, S., Serrano, D., Colliou, T., Duffour, F.</i>	
Development of Ignition Systems for Hydrogen-Powered Internal Combustion Engines	51
<i>Dr. Jakob Ångeby, SEM AB, Andreas Ehn, Lund University</i>	
Robust ignition and sparkplug wear for H2 SI-ICE	81
<i>Papi, S., Ricci, F., Dal Re, M., Chandelier, M.</i>	
Smart Ignition Coil Diagnostic System for H2 ICE Combustion Detection	95
<i>Ryosuke Shiina, Yusuke Shintani, Hirokazu Ando, Noritaka Kimura</i>	
Consideration of the Relationship between Flame Formation and Fast Combustion in the Second Half of the Combustion Phase of Pre-chamber Jet Combustion	125
<i>Alessandro Nodi, Lorenzo Sforza, Tommaso Lucchini</i>	
3D CFD modelling of TJI combustion achieved by active or passive pre-chamber	147
<i>Dimitrios Karageorgiou, Thierry Prunier, Matej Myslivecek, Carmen Vesel</i>	
Assessment of passive TJI technology on a mild hybrid powertrain and its performance on cold operating conditions	157
<i>Dario Di Maio, Pierpaolo Napolitano, Chiara Guido, Carlo Beatrice, Lorenzo Sforza, Tommaso Lucchini, Stefano Golini</i>	
Virtual analysis of the Efficiency Gain with Pre-Chamber combustion systems in Heavy-Duty Natural Gas Engine for Long-Haul Truck Application.	197
<i>Dr.-Ing. Antonino Vacca, M. Sc. Cristian Tortorella, Dr.-Ing. Marco Chiodi, M. Sc. Sebastian Bucherer, Prof. Dr.-Ing. André Casal Kulzer, Dipl.-Ing. Florian Helmut Karl Sobek, M. Sc. Paul Rothe, Dipl.-Ing Ivica Kraljevic, Dr.-Ing. Hans-Peter Kollmeier, Dipl.-Ing. Albert Breuer, Dr.-Ing. Ruhland Helmut</i>	
Design Optimization of a CNG-Single-Cylinder Engine for Lean Mixture Operation via Active Pre-Chamber System: Numerical Investigation and Experimental Validation ..	221

Dr.-Ing. Thomas Emmrich

Assessment of pre-ignition phenomena by thermodynamically approach 257

Jan Reimer (KIT-IFKM), Jürgen Pfeil (KIT-IFKM), Frank Altenschmidt (Mercedes-Benz Group AG), Thomas Koch (KIT-IFKM)

A fundamental investigation of oil additives on pre-ignition in a high pressure combustion chamber 279

Lu Li, Pradeep Sapkota, Pinaki Pal, Yee Chee See, Mingyi Liang, Josep Gomez-Soriano, Sameera Wijeyakulasuriya, Riccardo Scarcelli, Ricardo Novella

Simulating Fuel Ignition and Combustion in IC Engines with Lagrangian-Eulerian Spark Ignition (LESI) Model and Detailed Chemistry 295

Yiqing Wang, Riccardo Scarcelli, Chao Xu, and Ales Srna

Modeling the Impact of Mixture Formation on Ignition and Flame Propagation in a Hydrogen Direct-Injection Engine 313

Hermesen, Philipp (TME); Plum, Lukas (TME); Günther, Marco (TME); Pischinger, Stefan (TME); Blomberg, Michael (FEV Europe GmbH)*

Determining the Transition from Auto-Ignition to Knock in Methanol Operation by Application of the Bradley Theory 325

Thomas E. Briggs, Jr., Ph.D., Institute Engineer, Powertrain Engineering Division, Southwest Research Institute

Observations on pre-ignition in a port injected heavy duty hydrogen internal combustion engine 335

Dr.-Ing. Michael Fischer/ Tenneco GmbH, Dr.-Ing. Michael Grill/ FKFS, Prof. Dr.-Ing. Andre Kulzer/ FKFS & IFS, University Stuttgart, Dr. Ing. Marco Guenther/ TME, RWTH Aachen University, Prof. Dr. Ing. Stefan Pischinger/ TME, RWTH Aachen University

Higher Efficiency through model-based, predictive Knock Control 351
