Chapter 1: The asymptotic homotopy category	1
1-1 Asymptotic parameters	1
1-2 Asymptotic morphisms	4
1-3 Admissible Fréchet algebras	10
1-4 K-theory of admissible Fréchet algebras	15
 Chapter 2: Algebraic de Rham complexes	 19
2-1 The periodic de Rham complex	19
2-2 X-complexes	20
2-3 Differential graded X-complexes	22
2-4 The algebraic Chern character	25
 Chapter 3: Cyclic cohomology	 27
3-1 Extending functors	27
3-2 The algebra RA	28
3-3 I-adic filtrations	30
3-4 Cyclic cohomology	34
 Chapter 4: Homotopy properties of X-complexes	 40
4-1 The Cartan homotopy formula	41
4-2 Homotopy formulas for differential graded X-complexes	50
 Chapter 5: The analytic X-complex	 59
5-1 Behaviour of I-adic filtrations under based linear maps	60
5-2 Locally convex topologies on subalgebras of RA	66
5-3 The analytic X-complex	82
5-4 The analytic X-complex and entire cyclic cohomology	90
5-5 The analytic Chern character	95

Chapter 6: The asymptotic X-complex	97
6-1 The asymptotic X-complex	97
6-2 Comparison with other cyclic theories	103
6-3 Functorial properties of the asymptotic X-complex	107
6-4 Homotopy properties of the asymptotic X-complex	108
6-5 The pairing of asymptotic cohomology with K-theory	113
 Chapter 7: Asymptotic cohomology of dense subalgebras	 118
7-1 The derivation lemma	118
7-2 Applications	121
 Chapter 8: Products	 127
8-1 Exterior products	129
8-2 Stable Morita invariance of asymptotic cohomology	146
8-3 Compatibility of the Chern character with exterior products	148
8-4 Slant products	154
 Chapter 9: Exact sequences	 158
9-1 The stable periodicity theorem	160
9-2 Puppe sequences and the first excision theorem	170
9-3 Stable cohomology of C^* -algebras and the second excision theorem	177
 Chapter 10: KK-Theory and asymptotic cohomology	 182
10-1 The bivariant Chern character and the Riemann-Roch theorem	183
 Chapter 11: Examples	 202
11-1 Asymptotic cyclic cohomology of commutative C^* -algebras	203
11-2 Explicit calculation of asymptotic cohomology groups	217
 Index of Notations	 232
 Index of Symbols	 235
 Bibliography	 237
