Introduction	1
1 Speech Prosody, the Missing Link	3
1.1 What is speech prosody?	3
1.2 Speech and Writing	4
1.3 Prosody at work	9
1.4 How many words?	13
1.5 Summary and Perspectives	14
2 Looking at Sounds	17
2.1 Sounds	17
2.2 Using software for acoustic analysis	18
2.2.1 Downloading and installing Praat	19
2.2.2 Opening a recording from a sound file	20
2.2.3 Making your own recording	21
2.2.4 Selecting a recording	22
2.2.5 Some information about your sound	23
2.2.6 Editing a recording	23
2.3 Measuring length	31
2.3.1 Creating a TextGrid	33
2.3.2 Getting durations from a TextGrid	37
2.4 Measuring pitch	39
2.4.1 What's so fundamental about fundamental frequency?	42
2.4.2 Detecting f_0	47
2.5 Measuring loudness	52
2.6 Summary and Perspectives	53
3 The Transcription of Speech Prosody	55
3.1 Musical notation	56
3.2 Numerical scales	65
3.3 Didactic approaches to prosodic transcription	68

3.3.1	Keyless stave transcription.....	68
3.3.2	Tunes	71
3.3.3	Tonetic Stress Marks	75
3.4	Linguistic approaches to prosodic transcription.....	77
3.4.1	Pitch phonemes	77
3.4.2	Tonal segments	79
3.4.3	Multilingual systems	81
3.4.4	Separating form and function	83
3.4.5	Automatic prosodic transcription	85
3.5	Summary and Perspectives	85
4	The Prosody of Words	87
4.1	A prosodic typology of languages	87
4.1.1	Quantity languages	88
4.1.2	Tone languages	89
4.1.3	Stress languages	90
4.2	Not so simple... ..	92
4.2.1	Quantity languages	92
4.2.2	Tone languages	94
4.2.3	Stress languages	95
4.2.4	Pitch-accent languages	96
4.3	Lexical and non-lexical phonology	100
4.3.1	Aspiration in English	100
4.3.2	Quantity in French	102
4.3.3	Tone in French	103
4.3.4	Stress in French	104
4.4	Summary and Perspectives	106
5	The Phonology of Speech Prosody	109
5.1	The phonology of quantity	110
5.1.1	Long sounds as geminate phonemes	111
5.1.2	Long sounds as distinct phonemes	111
5.1.3	Quantity as a distinctive feature	112
5.1.4	The CV tier	113
5.1.5	The X tier and moras	115
5.2	The phonology of tone	116
5.2.1	Annotation of tone	117
5.2.2	Domain of association	118
5.2.3	Relative and absolute pitch	125
5.2.4	Downstep and floating tones	128
5.3	The phonology of stress	131
5.3.1	Stress as prosodic structure	135
5.3.2	Stress and Accent	135
5.4	Summary and Perspectives	136

6	Prosodic Structure	137
6.1	The Phoneme	138
6.1.1	Phonemes	138
6.1.2	Consonant clusters	139
6.1.3	Velar nasals and nasal vowels	141
6.2	The Syllable	142
6.2.1	Syllables	142
6.2.2	Moras	142
6.3	The Stress Foot	146
6.4	The Intonational Phrase	151
6.5	Other Prosodic Constituents	153
6.5.1	Minor Phrases	154
6.5.2	Paratones	157
6.6	Summary and Perspectives	158
7	Modelling Speech Rhythm	159
7.1	Linguists as human scientists	159
7.2	Rhythm and timing	161
7.2.1	Rhythm classes	162
7.2.2	Empirical evidence for rhythm classes	164
7.2.3	Discrimination of rhythm classes	167
7.2.4	Interval metrics	168
7.2.5	Pairwise metrics	172
7.2.6	The reliability of rhythm metrics	175
7.2.7	Rhythm metrics for cross-varietal comparisons	176
7.3	Modelling syllable duration	177
7.4	Tonal Units τ and Rhythm Units ρ	183
7.5	Modelling rhythm with ProZed	185
7.6	Summary and Perspectives	190
8	Modelling Speech Melody	193
8.1	Modelling speech melody	193
8.1.1	Models of fundamental frequency	193
8.1.2	Micromelodic and Macromelodic components	194
8.1.3	Macromelody and micromelody	196
8.1.4	A model for f_0 curves	197
8.1.5	Momel	200
8.2	Coding Melody with INTSINT	204
8.2.1	INTSINT: an International Transcription System for INTonation	204
8.2.2	Mapping from INTSINT to Momel	205
8.2.3	Mapping from Momel to INTSINT	208
8.2.4	Longer term characteristics of pitch range	211
8.3	ProZed	212
8.3.1	ProZed melody	212

8.3.2	Determining pitch via the Tonal Unit (<i>TU</i>) tier.	213
8.3.3	Defining long term parameters with the Intonation Unit (<i>IU</i>) tier	214
8.3.4	Integrating the synthesis with the automatic analysis of pitch	216
8.3.5	Displaying speech prosody	217
8.3.6	Melody metrics	221
8.3.7	Comparing L1 and L2 prosody	225
8.4	Summary and Perspectives	231
9	Interpreting Speech Prosody	233
9.1	The Prosody Paradox	233
9.2	Prosody and Music	236
9.3	Prosody Codes	238
9.3.1	Unnatural patterns	239
9.3.2	Declarative rises in Northern urban UK	242
9.3.3	Why should Viking Falls go up?	244
9.4	Prosodic Features	248
9.5	Prosodic Structure	250
9.6	Prosodic Morphemes	252
9.6.1	Emphatic particles	254
9.6.2	Question particles and non-terminality	256
9.7	Deriving Intonation Patterns	256
9.7.1	Unmarked declarative intonation	256
9.7.2	Emphatic intonation	258
9.7.3	Non-terminal intonation	260
9.7.4	Emphatic non-terminal intonation	264
9.7.5	Summary for English intonation	265
9.7.6	French intonation	265
9.8	Summary and Perspectives	268
10	Conclusion	269
