1	Introduction	1
2	Preparation	5
2.1	Basic Information	5
2.1.1	What Plasma is and what it can be used for	5
2.1.2	Plasma Frequency	8
2.1.3	Debye Shielding	9
2.1.4	Wave Equation	12
2.1.5	Classification	15
2.1.6	Distribution Function	19
2.1.7	Natural Units	21
2.1.8	Full Width at Half Maximum	22
2.2	Derivation of the Ponderomotive Force	24
2.3	Relativistic Lagrangian	29
2.3.1	Equation of Motion	29
2.3.2	Example	31
3	Wakefield Acceleration	35
3.1	General Setting	35
3.2	Description of the System Using the Hamiltonian	38
3.3	MINLP-Formulation for Two Particles	42

4	Discussion of some Optimization Algorithms	45
4.1	Armijo Line Search	46
4.2	Disadvantage of using the Gradient Descent Method	49
4.3	Heavy Ball Method and Nesterov’s Accelerated Gradient Descent	53
4.4	Relativistic Gradient Descent	54
4.5	Algorithm for Hyperparameter Optimization	55
5	Numerical Simulations	57
5.1	Setting	57
5.2	Parameter Selection	59
5.3	Comparison of Performance	62
5.4	Influence of Various Parameters on the Particle Distance	63
6	Conclusion and Outlook	67
