

Table of Contents

Part A Principles and Rules

1 Flow and Ultrasound Basics	2	Parameters of Cerebral Hemodynamics	60
Flow Dynamics	2	Cerebral Blood Flow Velocity	60
Physics of Flow	2	Resistance Indices	60
Flow Pattern and Flow Velocity	2	Cerebral Blood Flow	60
Ultrasound Principles	3	Cerebral Circulation Time	61
Doppler Effect	3	Cerebral Blood Volume	62
Doppler Shift and Flow Velocity	4		
Ultrasound Systems	6	4 Pathogenesis of Stroke	64
Ultrasound Transducer	6	Arterial Ischemia	64
Imaging Modalities, Parameters, and Settings	7	Pathophysiology	64
		Classification of Arterial Stroke	65
2 Vascular Anatomy and Structure of Ultrasound Examination	13	Microembolic Signals	72
General Arterial Anatomy	13	Spontaneous Microemboli	72
Extracranial Arterial Anatomy	13	Detection of Microemboli in Patent Foramen	
Intracranial Arterial Anatomy	15	Ovale	74
General Structure of Arterial Ultrasound Examination	17	Venous Ischemia	74
Special Arterial Anatomy and Ultrasound Anatomy	18		
Extracranial Arteries	18	5 Vascular Pathology	76
Intracranial Arteries	24	Vessel Wall Pathology	76
General Venous Anatomy	40	Elongations	76
Intracranial Venous Anatomy	41	Intima-media Thickness	77
Extracranial Venous Anatomy	42	Atherosclerotic Plaques	78
General Structure of Venous Ultrasound Examination	43	Dissection	80
Special Venous Anatomy and Ultrasound Anatomy	43	Fibromuscular Dysplasia	80
Intracranial Veins and Sinuses	43	Vasculitis	81
Extracranial Veins	49	Stenoses and Occlusions	81
		Ultrasound Criteria of Stenoses	81
3 Intracranial Hemodynamics and Functional Tests	54	Ultrasound Criteria of Occlusions	85
Autoregulation	55	Extracranial Pathology	86
Testing of Autoregulation	56	Extracranial Anterior Circulation	86
Neurovascular Coupling	56	Extracranial Posterior Circulation	91
Testing of Neurovascular Coupling	57	Intracranial Pathology	94
Metabolic Coupling	57	Intracranial Anterior Circulation	96
Other Tests to Assess Differences Between the Right and Left Sides as Markers of Impaired Collateral Function	59	Intracranial Posterior Circulation	99
		Collateral Pathways	101
		Intracranial Collateral Pathways	101
		Intracranial Collateral Pathways in ICA	
		Occlusive Processes	105
		Intracranial Collateral Pathways in VA	
		Occlusive Processes	108
		Extracranial Collateral Pathways	108
		Clinical Relevance of Collateral Pathways	109

6 Angiographic Techniques in Neuroradiology	111	Historical Development	116
Digital Subtraction Angiography	111	Technical Aspects	116
Historical Development	111	Strengths and Disadvantages	117
Technical Aspects	112	Current Algorithm at the Charité University	
Strengths and Disadvantages	113	Hospital	119
Magnetic Resonance Angiography	113	Stroke	119
Historical Development	113	Intracranial Aneurysm	120
Technical Aspects	114	Vasculitis	121
Strengths and Disadvantages	115	Cerebral Venous Thrombosis	123
Computed Tomographic Angiography	116	Peri-therapeutic Imaging	124

Part B: Case Histories

Case 1 Extracranial Internal Carotid Artery

Stenosis	128
Clinical Presentation	128
Initial Neuroradiologic Findings	128
Suspected Diagnosis	128
Questions to Answer by Ultrasound Techniques	128
Initial Neurosonologic Findings	128
Conventional Angiography	128
Clinical Course	128
Final Diagnosis	130
Discussion	130

Case 2 Free-floating Thrombus of the

Extracranial Internal Carotid Artery	133
Clinical Presentation	133
Initial Neuroradiologic Findings	133
Suspected Diagnosis	133
Question to Answer by Ultrasound Techniques	133
Initial Neurosonologic Findings (Day 1)	133
Clinical Course	133
Neurosonologic Findings (Day 20)	134
Final Diagnosis	134
Discussion	135

Case 3 Common Carotid Artery Occlusion

Clinical Presentation	138
Initial Neuroradiologic Findings	138
Suspected Diagnosis	138
Questions to Answer by Ultrasound Techniques	138
Initial Neurosonologic Findings	138
Clinical Course	139
Final Diagnosis	141
Discussion	142

Case 4 Temporal Arteriovenous Malformation

Clinical Presentation	143
Initial Neuroradiologic Findings	143
Suspected Diagnosis	143
Questions to Answer by Ultrasound Techniques	143
Initial Neurosonologic Findings	143

Conventional Angiography	143
Clinical Course	144
Final Diagnosis	144
Discussion	146

Case 5 M1 Middle Cerebral Artery Stenosis

Clinical Presentation	149
Initial Neuroradiologic Findings	149
Suspected Diagnosis	149
Questions to Answer by Ultrasound Techniques	149
Initial Neurosonologic Findings (Day 1)	149
Conventional Angiography (Day 2)	149
Final Diagnosis	150
Discussion	151

Case 6 P2 Posterior Cerebral Artery Stenosis

Clinical Presentation	156
Initial Neuroradiologic Findings	156
Suspected Diagnosis	156
Questions to Answer by Ultrasound Techniques	156
Initial Neurosonologic Findings (Day 2)	156
Clinical Course	156
Final Diagnosis	157
Discussion	157

Case 7 Cerebral Circulatory Arrest

Clinical Presentation	160
Initial Neuroradiologic Findings	160
Suspected Diagnosis	160
Clinical Course (1)	160
Question to Answer by Ultrasound Techniques	160
Initial Neurosonologic Findings	160
Cerebral CT	160
Clinical Course (2)	160
Final Diagnosis	162
Discussion	162

Case 8 Bilateral Intracranial V4 Vertebral

Artery Stenosis	165
Clinical Presentation	165

Initial Neuroradiologic Findings	165	Clinical Presentation	194
Suspected Diagnosis	165	Initial Neuroradiologic Findings	194
Conventional Angiography (Day 1).....	165	Suspected Diagnosis	194
Clinical Course (1)	165	Questions to Answer by Ultrasound Techniques..	194
Question to Answer by Ultrasound Techniques..	165	Initial Neurosonologic Findings.....	194
Initial Neurosonologic Findings (Day 42).....	165	Conventional Angiography.....	195
Neuroradiologic Findings	166	Clinical Course	195
Clinical Course (2)	168	Final Diagnosis	196
Final Diagnosis	168	Discussion	200
Discussion	168		
Case 9 Moyamoya Disease with Bilateral Carotid-T Stenosis	171	Case 13 Internal Carotid Artery Stenosis in Fibromuscular Dysplasia and Wegener Granulomatosis	204
Clinical Presentation	171	Clinical Presentation	204
Initial Neuroradiologic Findings	171	Initial Neuroradiologic Findings	204
Suspected Diagnosis	171	Suspected Diagnosis	204
Questions to Answer by Ultrasound Techniques..	171	Question to Answer by Ultrasound Techniques..	204
Initial Neurosonologic Findings (Day 1).....	171	Initial Neurosonologic Findings (Day 1).....	204
Conventional Angiography (Day 2).....	171	Clinical Course (1)	204
Clinical Course	173	Conventional Angiography (Day 5).....	205
Final Diagnosis	173	Clinical Course (2)	205
Discussion	173	Follow-up Neurosonologic Findings (5 Years)...	205
		Final Diagnosis	206
Case 10 Thrombolysis of M1 Middle Cerebral Artery Occlusion	176	Discussion	207
Clinical Presentation	176		
Initial Neuroradiologic Findings	176	Case 14 Isolated Carotid Siphon Stenosis	210
Suspected Diagnosis	176	Clinical Presentation	210
Clinical Course (1)	176	Initial Neuroradiologic Findings	210
Questions to Answer by Ultrasound Techniques..	176	Suspected Diagnosis	210
Initial Neurosonologic Findings.....	176	Questions to Answer by Ultrasound Techniques..	210
Clinical Course (2)	176	Initial Neurosonologic Findings.....	210
Follow-up Neurosonologic Findings (1 Hour)...	176	Clinical Course	210
Clinical Course (3)	177	Final Diagnosis	211
Final Diagnosis	177	Discussion	213
Discussion	178		
Case 11 Secondary Occlusion in Internal Carotid Artery Dissection	183	Case 15 Near Occlusion of the Extracranial Internal Carotid Artery.....	215
Clinical Presentation	183	Clinical Presentation	215
Initial Neuroradiologic Findings	183	Initial Neuroradiologic Findings	215
Suspected Diagnosis	183	Suspected Diagnosis	215
Questions to Answer by Ultrasound Techniques..	183	Questions to Answer by Ultrasound Techniques..	215
Initial Neurosonologic Findings (Day 1).....	183	Initial Neurosonologic Findings.....	215
Clinical Course (1)	183	Conventional Angiography.....	216
Questions to Answer by Ultrasound Techniques..	184	Clinical Course (1)	216
Follow-up Neurosonologic Findings (Day 2)....	184	Follow-up Neurosonologic Findings (2 Months)..	216
Clinical Course (2)	184	Clinical Course (2)	216
Follow-up Neurosonologic Findings (Day 7)....	184	Follow-up Neurosonologic Findings (5 Months)..	216
Clinical Course (3)	184	Final Diagnosis	216
Follow-up Neurosonologic Findings (6 Months)..	184	Discussion	222
Final Diagnosis	185		
Discussion	190	Case 16 Giant-cell Arteritis with Bilateral Intracranial V4 Vertebral Artery Stenosis	225
Case 12 Bilateral Proximal Extracranial Internal Carotid Artery Occlusion and High-grade V1 Vertebral Artery Stenosis ...	194	Clinical Presentation	225
		Initial Neuroradiologic Findings	225
		Suspected Diagnosis	225
		Questions to Answer by Ultrasound Techniques..	225

Initial Neurosonologic Findings (Day 1)	225	Final Diagnosis.....	253
Clinical Course (1).....	225	Discussion	259
Follow-up Neurosonologic Findings (6 weeks)...	226		
Clinical Course (2).....	226	Case 21 Mid-basilar Artery Occlusion	261
Final Diagnosis.....	226	Clinical Presentation.....	261
Discussion	228	Initial Neuroradiologic Findings	261
		Suspected Diagnosis	261
Case 17 Ascending Middle Cerebral Artery		Clinical Course (1).....	261
Occlusion.....	231	Follow-up Neuroradiologic Findings (Day 3)	261
Clinical Presentation.....	231	Questions to Answer by Ultrasound Techniques .	261
Initial Neuroradiologic Findings	231	Initial Neurosonologic Findings (Day 3)	261
Suspected Diagnosis.....	231	Conventional Angiography (Day 4)	262
Questions to Answer by Ultrasound Techniques .	231	Clinical Course (2).....	262
Initial Neurosonologic Findings (Day 1)	231	Final Diagnosis.....	262
Conventional Angiography (Day 3)	231	Discussion	266
Clinical Course	232		
Final Diagnosis.....	234	Case 22 M1 Middle Cerebral Artery Occlusion	
Discussion	235	with Prominent Early Temporal	
		Branch	269
Case 18 Bilateral Internal Carotid Artery		Clinical Presentation.....	269
Dissection	238	Initial Neuroradiologic Findings	269
Clinical Presentation.....	238	Suspected Diagnosis	269
Initial Neuroradiologic Findings	238	Questions to Answer by Ultrasound Techniques .	269
Suspected Diagnosis.....	238	Initial Neurosonologic Findings (Day 1)	269
Questions to Answer by Ultrasound Techniques .	238	Clinical Course (1).....	269
Initial Neurosonologic Findings	238	Questions to Answer by Ultrasound Techniques .	270
Conventional Angiography	238	Neurosonologic Findings (Day 10)	270
Clinical Course (1).....	239	Neuroradiologic Findings (Day 11).....	270
Follow-up Neurosonologic Findings (3 Months) .	239	Clinical Course (2).....	271
Clinical Course (2).....	239	Final Diagnosis.....	271
Final Diagnosis.....	239	Discussion	275
Discussion	243		
Case 19 Vertebral Artery Dissection with		Case 23 Takayasu Arteritis with Subclavian	
Distal Occlusion	245	Artery and Vertebral Artery Stenoses..	279
Clinical Presentation.....	245	Clinical Presentation.....	279
Initial Neuroradiologic Findings	245	Initial Neuroradiologic Findings	279
Suspected Diagnosis.....	245	Suspected Diagnosis.....	279
Questions to Answer by Ultrasound Techniques .	245	Questions to Answer by Ultrasound Techniques .	279
Initial Neurosonologic Findings	245	Initial Neurosonologic Findings	279
Conventional Angiography	245	Conventional Angiography	279
Clinical Course.....	246	Clinical Course (1).....	280
Final Diagnosis.....	246	Question to Answer by Ultrasound Techniques	
Discussion	248	(6 Months)	280
		Neurosonologic Findings (6 Months).....	280
Case 20 Internal Carotid Artery Dissection		Clinical Course (2).....	280
with Fast Recanalization	251	Questions to Answer by Ultrasound Techniques	
Clinical Presentation.....	251	(8 Months)	280
Initial Neuroradiologic Findings	251	Neurosonologic Findings (8 Months).....	280
Suspected Diagnosis.....	251	Final Diagnosis.....	281
Questions to Answer by Ultrasound Techniques .	251	Discussion	284
Initial Neurosonologic Findings (Day 1)	251		
Evaluation of Collateral Function	251	Case 24 Dissection of the Extracranial Internal	
Conventional Angiography	252	Carotid Artery and Contralateral M1	
Clinical Course (1).....	252	Middle Cerebral Artery Stenosis	287
Follow-up Neurosonologic Findings (Day 20) ...	252	Clinical Presentation.....	287
Clinical Course (2).....	253	Initial Neuroradiologic Findings	287
		Suspected Diagnosis.....	287

Clinical Course (1)	287	Clinical Course	313
MRI and MR Angiography (10:00 Hours).....	287	Final Diagnosis	313
Questions to Answer by Ultrasound Techniques.	287	Discussion.....	316
Neurosonologic Findings (12:00 Hours).....	287		
Conventional Angiography (16:00 Hours).....	288	Case 28 Subclavian Steal Phenomenon in	
Clinical Course (2)	288	Subclavian Artery and Internal	
Questions to Answer by Ultrasound Techniques.	288	Carotid Artery Occlusion	319
Follow-up Neurosonologic Findings (6 Months).	288	Clinical Presentation	319
Clinical Course (3)	288	Initial Neuroradiologic Findings	319
Final Diagnosis	288	Suspected Diagnosis	319
Discussion.....	294	Questions to Answer by Ultrasound Techniques.	319
		Initial Neurosonologic Findings (Day 1).....	319
Case 25 Progressive M1 Middle Cerebral		Conventional Angiography (Day 2).....	320
Artery Occlusion	297	Clinical Course (1)	320
Clinical Presentation	297	Follow-up Neurosonologic Findings (4 Weeks) .	320
Initial Neuroradiologic Findings	297	Clinical Course (2)	320
Suspected Diagnosis	297	Final Diagnosis	320
Questions to Answer by Ultrasound Techniques.	297	Discussion.....	326
Initial Neurosonologic Findings (Day 2).....	297		
Conventional Angiography (Day 4).....	297	Case 29 Cerebral Venous Thrombosis.....	331
Clinical Course (1)	298	Clinical Presentation	331
Clinical Course (2) and Follow-up		Initial Neuroradiologic Findings	331
Neuroradiologic Findings	298	Suspected Diagnosis	331
Follow-up Neurosonologic Findings (10 Months)	298	Questions to Answer by Ultrasound Techniques	331
Clinical Course (3)	298	Initial Neurosonologic Findings (Day 1).....	331
Final Diagnosis	298	CT Angiography (CTA) (Day 1).....	331
Discussion.....	303	Clinical Course (1)	331
		Question to Answer by Ultrasound Techniques. .	331
Case 26 Extracranial Vertebral Artery		Follow-up Neurosonologic Findings (Day 90)...	331
Dissecting Aneurysm following		Question to Answer by Ultrasound Techniques .	332
Basilar Artery Stenting.....	306	Follow-up Neurosonologic Findings (Day 180)...	332
Clinical Presentation	306	Clinical Course (2)	332
Initial Neuroradiologic Findings	306	Final Diagnosis	332
Suspected Diagnosis	306	Discussion.....	335
Conventional Angiography.....	306		
Clinical Course (1)	306	Case 30 Multilocular Extra- and Intracranial	
Questions to Answer by Ultrasound Techniques.	306	Stenoses and Occlusions	338
Initial Neurosonologic Findings (Day 1).....	306	Clinical Presentation	338
Cranial CT and CTA (Day 1).....	307	Initial Neuroradiologic Findings (Day 1)	338
Clinical Course	307	Suspected Diagnosis	338
Final Diagnosis	307	Questions to Answer by Ultrasound Techniques.	338
Discussion.....	310	Initial Neurosonologic Findings (Day 20).....	338
		Conventional Angiography (Day 22).....	339
Case 27 Diffuse Cerebral Angiomas	312	Clinical Course (1)	339
Clinical Presentation	312	Questions to Answer by Ultrasound Techniques.	339
Initial Neuroradiologic Findings	312	Follow-up Neurosonologic Findings (Day 29)...	339
Suspected Diagnosis	312	Follow-up Neurosonologic Findings (3 Months).....	340
Questions to Answer by Ultrasound Techniques.	312	Final Diagnosis	340
Initial Neurosonologic Findings.....	312	Discussion.....	348
Conventional Angiography.....	313
