Part I Diagnosis of Gastrointestinal Disorders

1 Diagnostic Tools

1.1 Clinical History	3
1.1.1 Introduction	3
1.1.2 History of specific gastrointestinal signs ..	3
1.1.2.1 Dysphagia and regurgitation	3
1.1.2.2 Gagging	5
1.1.2.3 Vomiting	5
1.1.2.4 Retching	6
1.1.2.5 Diarrhea	6
1.1.2.6 Other stool abnormalities	6
1.1.2.7 Flatulence and borborygmus	7
1.1.2.8 Dyschezia	8
1.1.2.9 Constipation	8
1.1.2.10 Fecal incontinence	8
1.1.2.11 Anal pruritus	8
1.1.2.12 Abdominal pain	8
1.1.3 Dietary history	8
1.2 Physical Examination	9
1.2.1 Introduction	9
1.2.2 General physical examination	10
1.2.2.1 Skeletal growth and development	10
1.2.2.2 Body condition	10
1.2.2.3 Mental status	10
1.2.2.4 Abnormalities in posture and locomotion ..	10
1.2.2.5 Mucous membranes	11
1.2.2.6 Peripheral lymph nodes	11
1.2.2.7 Skin and subcutaneous tissue	11
1.2.2.8 Body temperature	12
1.2.2.9 Pulse rate	12
1.2.2.10 Respiratory rate	12
1.2.3 Examination of the gastrointestinal tract ..	13
1.3 Diagnostic Imaging	16
1.3.1 Introduction	16
1.3.2 Oropharynx	17
1.3.2.1 Structural abnormalities	18
1.3.2.2 Functional Disorders	19
1.3.3 Esophagus	22

1.3.3.1 Generalized esophageal dilation	22
1.3.3.2 Segmental esophageal dilation	25
1.3.4 Stomach	25
1.3.4.1 Gastric dilation and volvulus	25
1.3.4.2 Gastric causes of chronic vomiting	27
1.3.4.3 Diagnosis of delayed gastric emptying ...	28
1.3.5 Small intestine	28
1.3.5.1 Ileus	28
1.3.5.2 Partial obstructions	29
1.3.5.3 Complete obstructions	32
1.3.5.4 Functional ileus	32
1.3.5.5 Detecting ileus with ultrasound	33
1.3.5.6 Complicated ileus	33
1.3.5.7 Chronic diarrhea	35
1.3.5.8 Diffuse bowel wall infiltration	35
1.3.5.9 Gastrointestinal hemodynamic assessment with Doppler ultrasound	36
1.3.6 Large intestine	36
1.3.7 Liver and biliary tract	38
1.3.7.1 Hepatic parenchymal disease	38
1.3.7.2 Non-obstructive biliary tract disease	41
1.3.7.3 Obstructive disease	43
1.3.7.4 Interventional procedures of the liver and biliary system	43
1.3.8 Pancreas	44
1.3.8.1 Pancreatitis	44
1.3.8.2 Pancreatic neoplasia	45
1.4 Laboratory Tests	48
1.4.1 Laboratory assessment of gastric disease ..	48
1.4.1.1 Introduction	48
1.4.1.2 Evaluation for parasitic infestation	48
1.4.1.3 Sucrose permeability testing	48
1.4.1.4 Minimally-invasive markers for gastric disease	48
1.4.1.5 Analysis of gastric juice	49
1.4.1.6 Evaluation of gastric emptying time	49
1.4.2 Laboratory tests for the diagnosis of intestinal disorders	50
1.4.2.1 Introduction	50
1.4.2.2 Assessment of serum cobalamin and folate concentrations	50
1.4.2.3 Assessment of gastrointestinal protein loss ..	53
1.4.2.4 Assessment of intestinal absorptive capacity and barrier function	54
1.4.3 Laboratory tests for the diagnosis of liver disease	56
1.4.3.1 Introduction	56
1.4.3.2 Routine hematological testing, urinalysis, and fecal examination	56

1.4.3.3	Analysis of ascites fluid	57	1.6.5.2	Portography	95
1.4.3.4	Classical serum parameters	57	1.6.5.3	Other procedures	96
1.4.3.5	Other serum markers	61	1.6.6	Complications of laparoscopy	96
1.4.3.6	Abnormalities of coagulation parameters	62	1.7 Cytology		97
1.4.3.7	Other hepatic function tests	62	1.7.1	Introduction	97
1.4.3.8	Species differences	63	1.7.2	Technique	97
1.4.4	Laboratory tests for the diagnosis of		1.7.3	Liver	97
	exocrine pancreatic disorders	64	1.7.3.1	Normal liver cells	97
1.4.4.1	Introduction	64	1.7.3.2	Hyperplasia	99
1.4.4.2	Pancreatitis	64	1.7.3.3	Inflammation	99
1.4.4.3	Exocrine pancreatic insufficiency (EPI)	65	1.7.3.4	Neoplasia	99
1.4.5	Molecular-genetics-based laboratory tests	67	1.7.3.5	Other abnormalities of the liver	99
1.4.5.1	Introduction	67	1.7.3.6	Bile	101
1.4.5.2	Test Development	68	1.7.4	Pancreas	101
1.4.5.3	Diseases of the esophagus and stomach	69	1.7.5	Stomach and intestines	102
1.4.5.4	Intestinal diseases	69	1.8 Histopathology		104
1.4.5.5	Pancreatic disease	70	1.8.1	Introduction	104
1.4.5.6	Liver disease	70	1.8.2	Types of gastrointestinal biopsies	104
1.5 Endoscopy		72	1.8.2.1	Endoscopic biopsies	104
1.5.1	Introduction	72	1.8.2.2	Full-thickness biopsies	104
1.5.2	Indications	72	1.8.2.3	Needle biopsies	105
1.5.3	Basic principles of endoscopy	72	1.8.2.4	Brushing and curettage samples	105
1.5.3.1	Choice of endoscopes	72	1.8.3	Advantages and disadvantages of different	
1.5.4	Esophagogastroduodenoscopy	73		biopsy techniques	105
1.5.4.1	Preparation and anesthesia	73	1.8.4	Tissue handling and processing	105
1.5.4.2	Technique	73	1.8.5	Interpretation and misinterpretation of	
1.5.4.3	Gastroduodenoscopy	73		GI tract biopsies	106
1.5.5	Colonoileoscopy	75	1.9 Assessment of Gastrointestinal		
1.5.5.1	Preparation and anesthesia	75	Motility		108
1.5.5.2	Technique	75	1.9.1	Disorders of gastrointestinal motility	108
1.5.6	Proctoscopy	76	1.9.2	Methods for assessing gastrointestinal	
1.5.7	Diagnostic procedures	76		motility	109
1.5.7.1	Biopsy	76	1.9.2.1	Survey radiography	109
1.5.7.2	Mounting and handling tissue samples	79	1.9.2.2	Contrast radiography – liquid barium	109
1.5.8	Appearance of the upper gastrointestinal		1.9.2.3	Contrast radiography – barium meal	109
	tract	80	1.9.2.4	Contrast radiography – BIPS	109
1.5.8.1	Abnormal findings	80	1.9.2.5	Ultrasonography	109
1.5.9	Interventional procedures	85	1.9.2.6	Nuclear scintigraphy	109
1.5.9.1	Foreign body removal	85	1.9.2.7	Tracer studies	110
1.5.9.2	Percutaneous gastrostomy tube	87	1.9.2.8	Manometry	110
1.5.9.3	Dilation of esophageal strictures	87	1.9.2.9	Functional MRI	110
1.5.9.4	Electrocautery techniques	88			
1.6 Diagnostic Laparoscopy		89	2 Clinical Evaluation of Dogs and Cats		
1.6.1	Introduction	89	with Specific Clinical Signs		
1.6.2	Indications	89			
1.6.3	Laparoscopic equipment and technique	90	2.1 Clinical Evaluation of Patients with		
1.6.3.1	Basic equipment	90	Acute Signs of Gastrointestinal		
1.6.3.2	Procedural considerations	91	Disease		115
1.6.4	Biopsy techniques	91	2.1.1	Introduction	115
1.6.4.1	Liver biopsy	91	2.1.2	Diagnostic evaluation of vomiting	115
1.6.4.2	Pancreatic biopsy	93	2.1.2.1	Vomiting versus regurgitation	115
1.6.4.3	Intestinal biopsy	94	2.1.2.2	The vomiting reflex	115
1.6.4.4	Other biopsy techniques	95	2.1.2.3	Etiology of vomiting	115
1.6.5	Ancillary procedures	95	2.1.2.4	History and physical examination	115
1.6.5.1	Cholecystocentesis and cholecystography	95			

2.1.2.5	Laboratory and ancillary testing	116
2.1.3	Diagnostic evaluation of acute diarrhea	117
2.1.3.1	Etiology of acute diarrhea	117
2.1.3.2	Pathophysiological changes with acute diarrhea	117
2.1.3.3	History and physical examination	118
2.1.3.4	Laboratory and ancillary testing	119
2.2	Clinical Evaluation of Patients with Chronic Vomiting	120
2.2.1	Introduction	120
2.2.2	Initial evaluation	121
2.2.3	Diagnostic approach	123
2.2.4	Secondary gastrointestinal disease	124
2.2.4.1	Hyperthyroidism	124
2.2.4.2	Hepatobiliary disease	124
2.2.4.3	Renal failure	125
2.2.4.4	Hypoadrenocorticism	125
2.2.4.5	Pancreatitis	125
2.2.4.6	Heartworm disease	125
2.2.5	Primary gastrointestinal disease	125
2.3	Clinical Evaluation of Patients with Chronic Diarrhea	127
2.3.1	Introduction	127
2.3.2	General workup	127
2.3.2.1	Case history	127
2.3.2.2	Physical examination	127
2.3.2.3	Laboratory evaluation	127
2.3.3	Division of patients according to the findings on initial evaluation	128
2.3.3.1	Patients with obvious abnormalities (A)	128
2.3.3.2	Patients with diarrhea without any other obvious abnormalities (B)	128
2.3.4	Diagnostic imaging (C)	132
2.3.4.1	Abdominal ultrasonography	132
2.3.4.2	Endoscopy	132
2.3.4.3	Abdominal radiography	132
2.4	Clinical Evaluation of Patient with Chronic Weight Loss	133
2.4.1	Introduction	133
2.4.2	Pathophysiology	134
2.4.3	Etiology	134
2.4.4	Diagnosis	135

Part II Diseases of the Gastrointestinal Tract

3	Esophagus	
3.1	Anatomy	139
3.2	Physiology	140
3.3	Diseases of the Esophagus	140
3.3.1	Cricopharyngeal achalasia	140
3.3.2	Esophagitis	141

3.3.3	Gastroesophageal reflux	142
3.3.4	Esophageal foreign bodies	142
3.3.5	Esophageal strictures	144
3.3.6	Esophageal diverticula	145
3.3.7	Airway-esophageal fistula	146
3.3.8	Megaesophagus	146
3.3.9	Hiatal hernia	147
3.3.10	Gastroesophageal intussusception	148
3.3.11	Vascular ring anomalies	148
3.3.12	Neoplastic conditions of the esophagus	151

4 Stomach

4.1	Introduction	155
4.2	Anatomy	155
4.3	Gastric physiology	155
4.3.1	Gastric glands	155
4.3.2	Gastric secretion	156
4.3.3	The gastric mucosal barrier	158
4.4	Diseases of the Stomach	159
4.4.1	Gastritis	159
4.4.1.1	Acute gastritis	159
4.4.1.2	Chronic gastritis	161
4.4.1.2.1	Lymphoplasmacytic gastritis	161
4.4.1.2.2	Eosinophilic gastritis	162
4.4.1.2.3	Hypertrophic gastritis	162
4.4.1.2.4	Atrophic gastritis	162
4.4.1.2.5	Helicobacter infection	162
4.4.1.2.6	Parasitic gastritis	165
4.4.1.2.7	Treatment of chronic gastritis	166
4.4.1.3	Gastric ulceration	166
4.4.2	Gastric dilation-volvulus	169
4.4.3	Motility disorders	171
4.4.4	Neoplastic conditions of the stomach	176

5 Small Intestine

5.1	Anatomy	181
5.1.1	Introduction	181
5.1.2	Gross anatomy of the intestinal tract	181
5.1.2.1	Anatomical features of the small intestine	181
5.1.2.1.1	Increasing available surface area	181
5.1.2.1.2	Microscopic anatomy of the intestinal tract	182
5.1.2.1.3	Spatial variation in intestinal structure	182
5.2	Intestinal Physiology	183
5.2.1	Introduction	183
5.2.2	Secretion, digestion, and absorption: function of the villus	183
5.2.3	Regulation of secretion, absorption, and motility: gastrointestinal hormones	184
5.2.4	Gut-associated lymphoid tissue and the immune system	185

5.2.5	Intestinal bacteria	186
5.3	Small Intestinal Disease	187
5.3.1	Introduction	187
5.3.2	Infectious causes of small intestinal disease	187
5.3.2.1	Viral infections	187
5.3.2.1.1	Canine parvovirus enteritis	187
5.3.2.1.2	Canine distemper virus infection	188
5.3.2.1.3	Feline coronavirus infection	189
5.3.2.1.4	Feline panleukopenia	189
5.3.2.1.5	Feline leukemia virus (FeLV) and feline immunodeficiency virus (FIV)	189
5.3.2.2	Bacterial Infections	189
5.3.2.2.1	Campylobacter spp.	190
5.3.2.2.2	Clostridium spp.	190
5.3.2.2.3	Enterobacteriaceae	192
5.3.2.2.4	Pathogenic <i>E. coli</i>	192
5.3.2.2.5	Salmonellae	192
5.3.2.2.6	Other bacteria	192
5.3.2.3	Fungal and algae infections	193
5.3.2.3.1	Histoplasmosis	193
5.3.2.3.2	Pythiosis	193
5.3.2.4	Parasitic diseases	195
5.3.2.4.1	Helminths	195
5.3.2.4.2	Protozoal infections	195
5.3.2.4.3	Other protozoal parasites	198
5.3.3	Dietary indiscretion (garbage can intoxication)	198
5.3.4	Intestinal obstruction – intestinal foreign bodies, intussusception, and intestinal torsion	198
5.3.5	Hemorrhagic gastroenteritis (HGE)	199
5.3.6	Short bowel syndrome	199
5.3.7	Motility disorders	199
5.3.8	Alterations in the small intestinal microflora (Small intestinal bacterial overgrowth)	202
5.3.9	Protein-losing enteropathies	207
5.3.10	Neoplastic diseases of the small intestines	211

6 Large Intestine

6.1	Introduction	217
6.2	Anatomy	217
6.3	Physiology	218
6.3.1	Motility	218
6.3.2	Water and electrolyte transport	219
6.3.3	Mucus secretion	220
6.3.4	Colonic microflora	220
6.3.5	Immune function	220
6.4	Diseases of the Large Intestine	221
6.4.1	Whipworms	221
6.4.2	Colitis	223
6.4.2.1	Histiocytic ulcerative colitis of Boxers	223

6.4.2.2	<i>Clostridium perfringens</i> enterotoxigenesis	223
6.4.2.3	<i>Tritrichomonas foetus</i> infection	225
6.4.3	Irritable bowel syndrome	226
6.4.4	Fiber-responsive large bowel diarrhea	227
6.4.5	Feline megacolon	230
6.4.6	Neoplastic diseases of the large intestines	236

7 Liver

7.1	Anatomy	241
7.1.1	Biliary system	241
7.1.2	Blood supply	242
7.1.3	Microanatomy	243
7.2	Physiology	244
7.3	Diagnostic approach to patients with suspected liver disease	245
7.3.1	Prevalence of liver disease	246
7.3.2	Symptoms associated with liver diseases	246
7.3.3	Physical examination	247
7.3.4	Diagnostic tests for liver disease	247
7.3.5	Liver biopsy	248
7.3.5.1	General considerations	248
7.3.5.2	Biopsy techniques	249
7.3.5.2.1	True-cut biopsy needle	249
7.3.5.2.2	The Menghini aspiration needle	249
7.3.5.2.3	Fine needle aspiration	249
7.3.5.3	Surgical wedge biopsy	249
7.3.5.4	Gall bladder aspiration	250
7.4	Complications of liver disease	250
7.4.1	Ascites	250
7.4.2	Jaundice	250
7.4.3	Hepatic encephalopathy	251
7.4.3.1	Management of hepatic encephalopathy	254
7.4.4	Coagulopathies	254
7.4.5	Polyuria and polydipsia	255
7.5	Liver diseases of the dog	255
7.5.1	Parenchymal liver diseases of the dog	255
7.5.1.1	Canine hepatitis	255
7.5.1.1.1	Acute Hepatitis	255
7.5.1.2	Leptospirosis	256
7.5.1.3	Chronic hepatitis and hepatic cirrhosis	257
7.5.1.4	Chronic hepatitis due to copper storage in the liver	259
7.5.1.5	Lobular dissecting hepatitis	261
7.5.1.6	Nonspecific reactive hepatitis	261
7.5.2	Parenchymal changes of the liver during systemic disease	262
7.5.2.1	Steroid hepatopathy	262
7.5.2.2	Hepatic steatosis in diabetes mellitus	262
7.5.2.3	Hypoxic liver damage	263
7.5.2.4	Amyloidosis	263
7.5.3	Vascular diseases of the liver	263
7.5.3.1	Congenital portosystemic vascular anomalies	263

7.5.3.2	Hepatic congestion	266
7.5.3.3	Primary portal vein hypoplasia	266
7.5.3.4	Portal vein thrombosis	267
7.5.3.5	Arteriovenous fistulas	268
7.5.4	Diseases of the biliary tract	269
7.5.4.1	Cholecystitis	269
7.5.4.2	Biliary duct or gall bladder rupture	269
7.5.4.3	Cystic liver disease	269
7.5.4.4	Extrahepatic bile duct obstruction (EBDO)	270
7.5.5	Neoplastic conditions of the liver	270
7.5.5.1	Hepatocellular carcinoma and adenoma	270
7.5.5.2	Hemangiosarcoma	271
7.5.5.3	Malignant lymphoma	271
7.5.5.4	Bile duct carcinoma	272
7.6	Liver diseases in the cat	272
7.6.1	Parenchymal liver diseases in cats	272
7.6.1.1	Hepatic lipidosis	272
7.6.1.2	Acute toxic hepatopathy	274
7.6.1.3	Hepatopathy due to infectious peritonitis (FIP)	274
7.6.1.4	Hepatic changes due to hyperthyroidism	274
7.6.1.5	Nonspecific reactive hepatitis and amyloidosis	275
7.6.2	Vascular liver diseases in cats	275
7.6.2.1	Congenital portosystemic shunt	275
7.6.3	Diseases of the biliary system in cats	275
7.6.3.1	Neutrophilic cholangitis	276
7.6.3.2	Lymphocytic cholangitis	276
7.6.3.3	Extrahepatic bile duct obstruction (EBDO)	278
7.6.4	Neoplasia	278

8 Exocrine Pancreas

8.1	Anatomy	283
8.2	Physiology	284
8.3	Diseases of the exocrine pancreas	285
8.3.1	Pancreatitis	285
8.3.2	Exocrine pancreatic insufficiency	294
8.3.3	Exocrine pancreatic neoplasia	299
8.3.4	Rare diseases of the exocrine pancreas	301
8.3.4.1	Pancreatic pseudocyst	301
8.3.4.2	Pancreatic abscess	301
8.3.4.3	Pancreatic parasites	302

8.3.4.4	Pancreatic bladder	302
8.3.4.5	Pancreatolithiasis	302
8.3.4.6	Pancreatic nodular hyperplasia	302

9 Diseases that affect more than one Organ of the Gastrointestinal Tract

9.1	Adverse Reactions to Food – Allergy versus Intolerance	307
9.1.1	Introduction	307
9.1.2	Terminology	307
9.1.3	Etiopathogenesis of food allergy	307
9.1.4	Food allergies	308
9.2	Inflammatory Bowel Disease	312
9.2.1	Introduction	312
9.2.2	Common principles of IBD	313
9.2.2.1	Etiology and pathogenesis	313
9.2.2.2	Clinical presentation	315
9.2.2.3	Diagnosis	316
9.2.2.4	Treatment	320
9.2.3	Lymphoplasmacytic enteritis (LPE)	324
9.2.4	Lymphoplasmacytic colitis (LPC)	324
9.2.5	Basenji enteropathy	325
9.2.6	Familial PLE and PLN in Soft-coated Wheaten Terriers	325
9.2.7	Eosinophilic enteritis (EE)	326
9.2.8	Granulomatous enteritis	326
9.2.9	Histiocytic ulcerative colitis (HUC)	327
9.2.10	Proliferative enteritis	327
9.3	Gastrointestinal Lymphoma	329
9.3.1	Feline gastrointestinal lymphoma	329
9.3.2	Canine gastrointestinal lymphoma	335
9.4	Neuroendocrine Tumors of the Gastrointestinal Tract	337
9.4.1	Introduction	337
9.4.2	Insulinoma	337
9.4.3	Gastrinoma	344
9.4.4	Glucagonoma	347
9.4.5	Pancreatic polypeptidoma	349
9.4.6	Carcinoids	349
9.4.7	Other neuroendocrine tumors of the gastrointestinal tract	350

Subject Index	352
