

# Table of contents

List of abbreviations	15
1. Introduction	17
1.1 International Engagement with Climate Change	21
1.2 Approaches Aimed at Altering the Climate System	26
1.2.1 History and Contested Terminology: What is “Geoengineering”?	26
1.2.2 Geoengineering: Not a Substitute for Traditional Mitigation and Adaptation	32
1.3 State of the Art and Aim of the Thesis	33
1.4 Research Questions	36
1.5 Delimitation of the Analysis	36
1.6 Structure of the Analysis	40
2. Marine Geoengineering: Carbon Dioxide Removal and Solar Radiation Modification on/in the Ocean	43
2.1 Carbon Dioxide Removal Approaches	45
2.1.1 Artificial Ocean Upwelling/Downwelling	48
2.1.2 Macroalgae/Seaweed Cultivation	51
2.1.3 Nutrient Fertilization in the Ocean	54
2.1.4 Ocean Alkalinity Enhancement	58
2.2 Solar Radiation Modification Approaches	62
2.2.1 Marine Cloud Brightening	65
2.2.2 Enhancing Ocean Surface Reflectivity (Ocean Albedo Change)	68
2.3 Concluding Remarks: The Need for International Regulation	71
3. Marine Geoengineering and International Law: The (Increasingly) Important Role of Framework Agreements	75
3.1 General Characteristics of Framework Agreements	76

## *Table of contents*

3.2 The Framework Nature of the Rio Conventions vs. the Montego Bay Convention	78
3.2.1 Limitations to State Participation	79
3.2.1.1 The CBD and the UNFCCC	79
3.2.1.2 UNCLOS	80
3.2.2 Differences in Institutional Arrangements	83
3.2.2.1 The CBD and the UNFCCC	84
3.2.2.2 UNCLOS	86
3.3 Built-in Flexibility and the Further Elaboration of General Norms	92
3.4 Concluding remarks	96
4. Marine Geoengineering and the Convention on Biological Diversity	99
4.1 Institutional Arrangements and Decision-making under the CBD	100
4.1.1 The Adoption of COP Decisions	101
4.1.2 The Legal Effect of COP Decisions	103
4.2 COP Decisions: the CBD's Engagement with Marine Geoengineering	107
4.2.1 Decisions of the CBD COP before 2016	107
4.2.2 Decisions of the CBD COP after 2016	110
4.3 Concluding Remarks	112
5. Marine Geoengineering and the International Climate Change Regime	115
5.1 The International Climate Change Regime: From Rio to Paris	117
5.1.1 Overview of the regime established under the UNFCCC	118
5.1.2 The Kyoto Protocol and the Paris Agreement	119
5.2 Mitigation vs Adaptation: Geoengineering and the International Climate Change Regime	123
5.2.1 CDR as Mitigation?	125
5.2.1.1 (Ocean-based) CDR is Mitigation: What are the consequences this?	127

5.2.1.2	Final Remarks: (Ocean-based) CDR as Mitigation	131
5.2.2	SRM as Mitigation or Adaptation?	132
5.2.2.1	SRM and the Paris Agreement: Normative Entry Points	134
5.2.2.2	Final Remarks: SRM and the IPCC?	138
5.2.3	The Need to Evaluate Institutional Arrangements	141
5.3	Institutional Arrangements and Decision-making under the UNFCCC Regime	143
5.3.1	Institutional Bodies Established under the UNFCCC Regime	144
5.3.2	Process, Procedure and the Legal Effect of COP/CMA Decisions	147
5.3.2.1	Process and Procedure for Adopting COP/CMA Decisions	147
5.3.2.2	The Legal Effect of COP/CMA Decisions	151
5.3.3	Regulatory “Dialogue”: COP/CMA Decisions and (Marine) Geoengineering	155
5.3.3.1	Internal Regulatory Dialogue: Subsidiary Bodies and the COP/CMA	156
5.3.3.2	External Regulatory Dialogue: The Influence of Climate Clubs	164
5.4	Concluding Remarks	170
6.	Marine Geoengineering and the Law of the Sea	173
6.1	UNCLOS Provisions and Marine Geoengineering	174
6.1.1	The application of UNCLOS beyond and within national jurisdiction	175
6.1.2	Marine Geoengineering and Part XIII of UNCLOS: Marine scientific research	180
6.1.3	Marine Geoengineering and Part XII of UNCLOS: The obligation to protect and preserve the marine environment	183
6.1.4	Final Remarks: UNCLOS Provisions and Marine Geoengineering	189

## Table of contents

6.2 The Legislative Path	190
6.2.1 The Amendment of UNCLOS and the “Legislative” Power of SPLOS	191
6.2.1.1 The General Amendment Procedures in UNCLOS	191
6.2.1.2 The “undue” Legislative Power of SPLOS	194
6.2.2 Legislating Marine Geoengineering through Implementing Agreements	199
6.2.2.1 The Part XI Agreement	200
6.2.2.2 The Fish Stocks Agreement	200
6.2.2.3 The BBNJ Agreement	202
6.2.3 Final Remarks: The “Legislative Path”	205
6.3 The Adjudicative Path	206
6.3.1 Advisory Proceedings	208
6.3.2 The Request for an Advisory Opinion before ITLOS	211
6.3.3 Final Remarks: The “Adjudicative Path”	217
6.4 The <i>Renvoi</i> Path	218
6.4.1 UNCLOS, Rules of Reference and Marine Geoengineering	219
6.4.1.1 UNCLOS and Pollution caused by “Dumping”	221
6.4.1.2 The Rule of Reference in Article 210	223
6.4.2 The 1972 London Convention and the 1996 London Protocol	224
6.4.2.1 Marine Geoengineering under the London Convention and Protocol	225
6.4.2.2 Recent Developments concerning the 2013 Amendments	228
6.4.3 Final Remarks: The <i>Renvoi</i> Path	233
6.5 Concluding Remarks	234
7. Marine Geoengineering and Regime Interaction	237
7.1 Regime Interaction: Facilitating Interaction and Avoiding Conflict	239

7.2 Hard (Normative) and Soft (Institutional) Interaction	243
7.2.1 “Hard” Interaction: The CBD, the UNFCCC Regime and the Law of the Sea	244
7.2.1.1 Explicit Conflict Clauses	244
7.2.1.2 CBD↔UNCLOS interaction	246
7.2.1.3 UNFCCC↔UNCLOS interaction	250
7.2.1.4 CBD↔UNFCCC interaction	252
7.2.2 “Soft” Interaction: The CBD, the UNFCCC Regime and the Law of the Sea	255
7.2.2.1 (Formal) Calls for “Soft” Interaction: COP, SPLOS and the General Assembly	257
7.2.2.2 Other (Informal) Calls for “Soft” Interaction	266
7.3 Concluding Remarks	271
8. Conclusion	273
8.1 Addressing the Primary Research Questions	273
8.2 Outlook – Where to Now?	276
Bibliography	279
Academic Literature and Other Publications	279
Legal Texts	298
Case Law	307
Online Resources	309
