

Contents List of Papers and Workshop Summaries

Ethnomathematics in the Bedouin Culture Fouze Abu Qouder & Miriam Amit.....	1
New Ways of Teaching and Learning Mathematics with Innovative Online and Offline Apps Kehinde Emmanuel Adenegan	7
Navigating Time's Labyrinth through Mathematical Lens: The Math behind Videography of Slow Motion Pahel Agarwal & Kashish Agarwal.....	15
AI to AIE: Artificial Intelligence to Access, Inclusion and Equity Melina Alexander, Sheryl Rushton, Shirley Dawson & Shernavaz Vakil...	18
A Research-Based Dual Enrollment Statistics Textbook Maria Emilia Alfaro, John Hicks, Anant Godbole & Ryan Nivens	23
Challenging Non-routine, Problem-Solving: A Hands-on Experience Miriam Amit.....	27
Find out Mathematics on the Rhombic Dodecahedron Takako Aoki & Shin Watanabe	29
The Math-Chemistry Notebook as a Result of an Interdisciplinary Activity in the Italian High School Elena Arabini & Daniela Dallari	32
Unplugged Computational Thinking Claudia Baiata & Ryan Andrew Nivens	38
Algebraic Reasoning and Modeling: Meaningful Curriculum for Non-STEM Majors Patti Blanton	44
Moving from Concrete to Abstract Mathematical Thinking: The Role of Algebra Tiles Simone Brasili	49
When Double 38 Is Equal To 616 Aarnout Brombacher	55
Engaging Students in Worthwhile Tasks in this Ever Changing World Gail Burrill.....	62

New Ways of Teaching and Learning Basic Arithmetic Using Visualizable Strategies
Kathleen Cotter Clayton..... 68

Mastering Multiplication and Division Facts: New Ways of Learning the Facts with Card Games and the Short Multiplication Table
Kathleen Cotter Clayton & Teresa Foltin..... 74

Analogical Models, Intuition, and Knowledge Construction: The Case of a System of Algebraic Equations
Klila Copperman, Anatoli Kouropatov & Ivy Kidron..... 80

Place Value: The Nucleus of Arithmetic
Teresa Foltin..... 87

Self-Efficacy in Mathematics: How K-5 Teachers’ Perceptions Change Over Time and Experience
Courtney Fox 93

Family Math in the Post-COVID-19 Setting: New and Traditional Practical Math Applications to Sponsor Conversations about Math
Kathy Fox, Shelby Morge & Tracy Hargrove 98

Teaching Mathematics in the Age of Generative Artificial Intelligence
Joanne Goodell 104

Computational Thinking in Students’ Research Projects
Christopher Gordon, Alisa Wickliff, Gregory Wickliff & David Pugalee.....110

Experiments in Teaching Advanced Calculus: An Early Introduction to Double Integrals
John Gordon117

Experiences in Working with Children in the Scientific Method at a Technical University
Aneta Grodzicka..... 120

Chaos Theory and Fractals in Finance
Raisa Gulati 124

Using MCQs for Formative and Summative Mathematics Assessment
Clinton Hayes, Nadine Adams & Antony Dekkers 130

Hints for Challenging Problems
Nader Hilf & Avi Berman..... 136

Exploring Secondary Mathematics Teachers’ Reasons for Attending Voluntary Professional Learning	
Gregory Hine	141
A Holistic Teaching Approach to Intermediate Algebra	
Charity Jones & Kathryn Van Wagoner	147
Adapting Learning Methodologies in a Changing World: The Transition from Face-to-Face to Distance and Hybrid Learning via Active Learning	
Anna Khalemsky & Yelena Stukalin	153
Support for Preservice Teachers to Use Curriculum Resources Productively	
Ok-Kyeong Kim	160
A Novel Approach to Teaching and Assessing Students’ Critical Thinking in University Mathematics	
Sergiy Klymchuk	167
Promoting Discourse and Argumentation in Mathematics Classroom Interaction as a Challenge for Pre-Service Teachers – Vignette-Based Learning Opportunities as a Possible Solution Pathway	
Sebastian Kuntze & Jens Krummenauer	173
Conceptualization and Challenges from a Global Undergraduate Research Study	
Barbara H. Leitherer, Pankaj R. Dwarka, Entela K. Xhane & Jignasa R. Rami	182
Using Practical Programming Tasks to Enhance Combinatorial Understanding.	
Sigal Levy, Yelena Stukalin & Nili Guttmann-Beck	189
Logic as a ‘Medium’ for Paradigm Shifts in Mathematics, Psychology of Reasoning, Informatics, and Education	
Michail Lousis	195
STEM Pre-College Program: How an Out-of-School Program Is Contributing to In-School Success	
Victor Mack, Joyce Dunlap & David Pugalee	207
Problem Solving and Posing - from University to Primary School	
Ahlam Mahagna & Avi Berman	212
Effect of Change of Shape on Time Period of a Pendulum	
Jahnavi Mahana	218

Analysing Marking Memorandum as an Aspect of Assessment in Mathematics Performance of South African High Schools	
Radley K. Mahlobo, Bonani Sibanda & Ramoshweu S. Lebelo.....	223
Do Girls and Boys have Equally Good Spatial Thinking Skills?	
Günter Maresch & Eleni Lagoudaki	230
Enhancing Equity with Course-Based Undergraduate Research Experiences at the Community College Level	
Frank S. Marfai, Robin Cotter, Rosalind Cook, Anna Marti-Subirana & Elena Ortiz	236
Data Science and the Future of Mathematics	
Johannes Memling.....	243
Meta-Analysis on the use of Mathematical Modelling to Teach Mathematical Concepts in Higher Education in South Africa	
Miranda Moodley, Jacob Jaftha & Duncan Mhakure	249
Integrating Mathematics and Computer Science in the Classroom	
Shelby Morge & Christopher Gordon	255
‘Closing the Gap’: Culturally Responsive Mathematics Education in Australia	
Caty Morris.....	261
Building an Application with AI to Learn First Degree Equations that Recognize Specific Mistakes of the Users	
M. Estela Navarro Robles.....	267
Co-teaching in the Theory and Practice of Academic Education	
Beata Pitula.....	272
The Twelve-Points Circle Theorem	
M. Raja Climax	277
Cross-curricular Teaching and Learning in Mathematics Education	
Ann-Sofi Røj-Lindberg	281
The Guided Reinvention in the Teaching of Linear Algebra	
Ildar Safuanov	287
Utilization of Technology for Assessment Purposes Among Mathematics Teachers	
İpek Saralar-Aras & Sümeyra Tütüncü	291
Learning Statistics through Ethical Data Science	
Marco Scipioni	297

War and Peace in Math Teaching: Preparing U.S. Pre-service Teachers for a Balanced Approach in PK-6 Classrooms	
Dennis Showers	301
Mathematical Fallacies and Scandals	
M. Vali Siadat	306
Logarithm Spiroid Definition: A Novel Theory of the Meaning of “Logarithm” via use of Specially Drawn “Spiral Forms- Spiral logarithms” and Relationship, via Proposed Plato’s Timaeus “Most Beautiful Triangle”, with the Recently Discovered Invention of the “Generator Polyhedron”	
Panagiotis Stefanides.....	311
Advancing Fraction Conceptions as Part of a Whole Comprehensive Course Redesign to Improve Student Success and Self-Efficacy in Developmental Mathematics	
Patrick Sullivan	317
Decolonizing Math by Demodeling Essence as Existence, Teach that $1+1 = 1$, while $1s+1s = 2s$; a Workshop	
Allan Tarp	324
Real Life Mathematics in Traditional Everyday Settings of the Agew and Tigray Peoples of Ethiopia: Implications for Classroom Mathematics	
Hilluf Reddu Tegegne.....	331
Distance Learning in Statistics and Mathematics: The Case of the Greek Universities	
Eleni Tsami, Dimitra Kouloumpou, Andreas Rokopanos, Dimitris Anastasopoulos & Anastasia Anastasopoulou.....	338
Activity–Based Learning Strategies and Mathematics Education in Nigeria	
Kamoru Olayiwola Usman & Kamoru Abiodun Sabitu.....	344
Linear function for environmental managers	
Vivian Libeth Uzuriaga López & Luz Elena Palacio Loaiza	351
Teaching The Process Of Mathematical Investigation	
Deepti Verma	358
Mathematics Education and Lifelong Learning with the Future in Mind	
Shin Watanabe & Takako Aoki.....	363
Experimenting with Active Learning in Multivariable Calculus	
Laura Watkins	369

**Learning Beyond the Textbook: Intrinsic and Extrinsic Skills Needed for
Students' Mathematical Success**
Alan Zollman..... 376
