

TABLE OF CONTENT:

1. INTRODUCTION 1

2. LITERATURE 2

2.1. BOVINE COLOSTRUM 2

 2.1.1. *Components of bovine colostrum in comparison to bovine mature milk* 2

 2.1.2. *Processing of bovine colostrum* 6

 2.1.3. *Immunologically active components in bovine colostrum* 8

 2.1.4. *Use of bovine colostrum in veterinary medicine*..... 12

2.2. CANINE IMMUNOLOGY 15

 2.2.1. *The immune system*..... 15

 2.2.2. *Immune cells* 15

 2.2.2.1. *Cluster of differentiation and major histocompatibility complex* 16

 2.2.2.2. *Types of immune cells* 19

 2.2.3. *Antibodies: definition, structure and types* 26

 2.2.4. *Skin immune system* 32

2.3. CANINE ATOPIC DERMATITIS 33

 2.3.1. *Clinical signs* 33

 2.3.2. *Diagnostics*..... 33

 2.3.3. *Pathogenesis* 37

 2.3.4. *Therapy* 44

2.4. SUMMARY OF THE LITERATURE AND BACKGROUND OF THE PRESENT STUDY..... 46

3. MATERIALS AND METHODS 47

3.1. AIM..... 47

3.2. APPROVAL 47

3.3. HEALTHY DOGS 47

 3.3.1. *Study population* 47

 3.3.2. *Basic diet*..... 47

 3.3.3. *Study design* 50

 3.3.4. *Feed intake and body weight* 51

 3.3.5. *Fecal consistency*..... 51

3.4. DOGS WITH ATOPIC DERMATITIS..... 52

 3.4.1. *Study population* 52

 3.4.2. *Basic diets*..... 55

3.4.2.1.	Determination of the dietary dry matter	55
3.4.3.	<i>Study design</i>	56
3.4.4.	<i>Feed intake and body weight</i>	58
3.4.5.	<i>General examination</i>	58
3.4.6.	<i>Dermatological examination</i>	58
3.4.7.	<i>Questionnaires</i>	59
3.4.7.1.	Pruritus Visual Analog Scale	59
3.4.7.2.	Quality of Life	59
3.4.7.3.	Global assessment and Quality of Coat	59
3.5.	BLOOD COLLECTION	59
3.6.	LABORATORY MEASUREMENTS	60
3.6.1.	<i>Flow cytometry: definition and principle</i>	60
3.6.2.	<i>Isolation of peripheral blood mononuclear cells</i>	61
3.6.2.1.	Principle	61
3.6.2.2.	Procedure	61
3.6.3.	<i>Phenotyping of peripheral blood mononuclear cells</i>	63
3.6.3.1.	Principle	63
3.6.3.2.	Procedure	63
3.6.4.	<i>Mitogen-induced proliferation assay</i>	64
3.6.4.1.	Principle	64
3.6.4.2.	Procedure	64
3.6.5.	<i>Phagocytic activity of monocytes and granulocytes</i>	66
3.6.5.1.	Principle	66
3.6.5.2.	Procedure	66
3.6.6.	<i>Concentration of immunoglobulins and serum-amyloid-A</i>	67
3.6.6.1.	Principle	67
3.6.6.2.	Procedure	67
3.6.7.	<i>C-reactive protein</i>	68
3.7.	STATISTICAL ANALYSIS	70
4.	RESULTS	71
4.1.	HEALTHY BEAGLE DOGS	71
4.1.1.	<i>Health status, feed intake, body weight and fecal consistency</i>	71
4.1.2.	<i>Phenotyping of blood lymphocytes</i>	71
4.1.3.	<i>Mitogen-induced proliferation assays</i>	71
4.1.4.	<i>Phagocytic activity of blood granulocytes and monocytes</i>	71
4.1.5.	<i>Concentrations of plasma IgG, IgA, IgM, CRP and SAA as well as of fecal IgA</i>	74
4.2.	DOGS WITH ATOPIC DERMATITIS	79

4.2.1.	<i>Dietary treatment, feed intake and body weight.....</i>	79
4.2.2.	<i>Concurrent treatments.....</i>	79
4.2.3.	<i>Dermatological examination and questionnaires</i>	79
4.2.4.	<i>Mitogen-induced proliferation assays.....</i>	80
4.2.5.	<i>Phagocytic activity of blood granulocytes and monocytes</i>	80
4.2.6.	<i>Concentrations of plasma IgG, IgA, IgM, CRP and SAA as well as fecal IgA</i>	80
5.	DISCUSSION	91
5.1.	HEALTHY BEAGLE DOGS.....	91
5.1.1.	<i>Health status, feed intake, body weight and fecal consistency</i>	91
5.1.2.	<i>Immunological parameters.....</i>	91
5.2.	DOGS WITH ATOPIC DERMATITIS	96
5.2.1.	<i>Health status, feed intake and body weight</i>	96
5.2.2.	<i>Dermatological examination and questionnaires</i>	96
5.2.3.	<i>Immunological parameters.....</i>	98
5.3.	STUDY LIMITATIONS	99
5.4.	CONCLUSION AND PERSPECTIVES	101
6.	SUMMARY	102
7.	ZUSAMMENFASSUNG	103
8.	APPENDIX	105
9.	REFERENCES	121
10.	FINANZIELLE UNTERSTÜTZUNG DER ARBEIT	148
11.	DANKSAGUNG.....	149
