## Contents

1	Introduction to Photonics .....	1
1.1	Light Absorption .....	3
1.2	Vibrational Relaxation and Internal Conversion .....	3
1.3	Fluorescence .....	3
1.4	Intersystem Crossing and Phosphorescence .....	4
1.5	Energy Transfer .....	5
1.6	Excimer and Exciplex Formation .....	5
1.7	Photochemical Reaction and Electron Transfer .....	5
1.8	Photoinduced Conformational Changes .....	5
2	Light Absorption in Ordered Structures .....	7
2.1	Probability of Absorption .....	7
2.2	Lambert–Beer Law .....	9
2.3	Biological Chromophores .....	10
2.4	Absorbance in Scattering Media .....	11
2.5	Hypochromism .....	11
2.6	Molecular Interactions .....	12
2.7	Sieve Effect .....	13
2.8	Light-Scattering Model .....	14
2.9	Light-Dispersion Model .....	15
2.10	Stacking Model .....	15
2.11	Conclusion .....	16
3	Screening Hypochromism .....	18
3.1	Screening model .....	19
3.2	Nucleotides, Oligonucleotides and DNA .....	23
3.3	Tyrosine and Tryptophan in Aggregates .....	27
3.4	Tyrosine and Tryptophan in Proteins .....	28
3.5	Hemoglobin in Erythrocytes .....	30
3.6	Chloroplasts and Visual Rods .....	31
3.7	Clusters of Aromatic Hydrocarbons .....	32
3.8	Conclusion .....	35
4	Photometric Estimation of Protein Content in Biological Suspensions .....	36
4.1	Colorimetry and Others Methods .....	36
4.2	Combined UV-Spectrophotometric Method .....	36

## VIII Contents

---

4.3 Comparison of the Methods .....	38
4.4 Conclusion .....	40
5 Screening and Reabsorption of Light .....	41
5.1 Inner Filter Effect .....	41
5.2 Microscreening and Microreabsorption .....	42
5.3 Erythrocytes and Other Cells .....	44
5.4 Volume Reabsorption of Donor Luminescence .....	45
5.5 Trypaflavine Activates Rhodamine Fluorescence .....	47
5.6 Conclusion .....	50
6 Multipass Cuvettes for Luminescence Spectroscopy .....	51
6.1 Mirror and Total Internal Reflection Cuvettes .....	51
6.2 Multipass Cuvettes in Steady-State Measurements .....	53
6.3 Multipass Cuvettes in Lifetime Measurements .....	54
6.4 Other Applications .....	55
6.5 Conclusion .....	55
7 Division of Tyrosine and Tryptophan Fluorescence Components .....	56
7.1 Generally Accepted Approaches .....	56
7.2 Synchronous Scanning Method .....	58
7.3 Synchronous Spectra of Tryptophan and Tyrosine .....	58
7.4 Synchronous Spectra of Different Tryptophan Residues .....	60
7.5 Conclusion .....	61
8 Spectral Heterogeneity of Tryptophan Emission .....	62
8.1 Variation of Fluorescence Polarization along Tryptophan Emission Spectrum .....	62
8.2 Fluorescence Lifetime Variations .....	68
8.3 Photoinduced Conformational Mobility of Proteins .....	70
8.4. Phosphorescence of Proteins .....	72
8.5 Conclusion .....	73
9 Discrete Emission States in Photoexcited Tryptophan Complexes .....	74
9.1 Time-Resolved Spectroscopy of Tryptophan Fluorescence .....	75
9.2 TRP and NATA in Water .....	78
9.3 TRP, NATA and Indole in Ethanol .....	80
9.4 TRP and NATA in Glycerol .....	81
9.5 Dipeptides .....	83
9.6 Exciplexes in Proteins .....	84
9.7 Conclusion .....	88
10 Mechanisms of Exciplex Formation .....	90
10.1 Generally Accepted Models .....	90
10.2 Fractional Energy Transfer in Exciplexes .....	92
10.3 Exciplex of Aromatic Hydrocarbons .....	94

.....	38	10.4 Excimers .....	96
.....	40	10.5 Pyrene-Indole Exciplex .....	98
.....	41	10.6 Conclusion .....	100
.....	41	.....	.....
.....	42	11 Mechanisms of Energy Transfer .....	101
nce .....	44	11.1 Inductive-Resonance Model .....	102
cence .....	45	11.2 Energy Transfer in Molecular Structures .....	105
opy .....	47	11.3 Hot Migration .....	108
es .....	50	11.4 Conclusion .....	110
lements .....	51	.....	.....
nts .....	53	12 Energy Transfer in Nucleic Acids .....	111
.....	54	12.1 Migration Between Nucleotides .....	111
.....	55	12.2 Migration Along DNA .....	113
ce Components .....	56	12.3 Quantum Yield of Energy Transfer to Dyes .....	113
.....	56	12.4 Polyadenylic Acid Labeled by Ethenoadenine .....	115
rosine .....	58	12.5 DNA with Intercalated Dyes .....	115
an Residues .....	60	12.6 Fluorescent Probes and Labels on DNA .....	119
.....	61	12.7 Conclusion .....	121
.....	62	.....	.....
g Tryptophan Emission .....	62	13 Energy Transfer in Native Proteins .....	122
.....	62	13.1 Tyrosine-Tryptophan Pair .....	122
roteins .....	68	13.2 Migration between Tryptophan Residues .....	126
.....	70	13.3 Tryptophan-NADH Pair in Alcohol Dehydrogenase .....	127
.....	72	13.4 Tryptophan-Heme Pair in Myoglobin .....	132
.....	73	13.5 Tryptophan-Pyrene Pair .....	134
phan Complexes .....	74	13.6 Quenching of Tryptophan Emission by Dyes .....	137
Fluorescence .....	75	13.7 Conclusion .....	141
.....	78	.....	.....
.....	80	14 Energy Transfer in Biomembranes .....	142
.....	81	14.1 Quenching of Tryptophan Fluorescence in Sarcoplasmic Reticulum by	
.....	83	Probes .....	143
.....	84	14.2 Quenching of Tryptophan Fluorescence by ANS .....	145
.....	88	14.3 Quenching of Tryptophan Fluorescence by Pyrene .....	146
.....	90	14.4 Tryptophan-NADH Pair in Mitochondria .....	147
.....	90	14.5 Photosynthetic Reaction Centers .....	149
.....	92	14.6 Conclusion .....	150
.....	94	.....	.....
.....	151	15 Fluorescence Probes .....	151
.....	151	15.1 Widely Used Probes .....	151
.....	155	15.2 Estimation of Sizes of Chaperones and their Complexes Using ANS .....	155
.....	158	15.3 Fluorescent Studies of $\text{Na}^+ \text{K}^+$ -ATPase .....	158
.....	159	15.4 Anthracene with Dimethylaminochalcone in Membranes .....	159
.....	161	15.5 Diffusion of Probes .....	161
.....	162	15.6 Fluorescence Pharmacology <i>in vitro</i> .....	162
.....	163	15.7 Conclusion .....	163

## X Contents

---

16 Pyrene Monomers and Excimers in Membranes .....	165
16.1 Viscosity Measurements .....	165
16.2 Location and Diffusion of Pyrene .....	166
16.3 Detection of Oxygen by Pyrene Emission .....	168
16.4 Vibronic Peaks as Indicators of Membrane Polarity .....	170
16.5 Conclusion .....	171
17 Photomodulation of Enzyme Activity .....	172
17.1 Photoactivation of Enzymes .....	172
17.2 Photodesorption .....	173
17.3 Photochemical Processes in Alcohol Dehydrogenase .....	174
17.4 Photolysis of Flavin in NADH Dehydrogenase .....	179
17.5 Conclusion .....	183
18 Photoactivation of Animal Membranes and their Chromophores .....	184
18.1 Photoinduced Membranes Activity .....	184
18.2 Oxygen Uptake in Mitochondria under Photoexcitation .....	185
18.3 Oxidation of NADH by Triplet Flavin and Singlet Oxygen .....	187
18.4 Conclusion .....	192
19 Light-Dependent Phosphorylation in Mitochondria .....	193
19.1 ATP Synthesis during Illumination .....	193
19.2 Thermal Coupling between ATP Synthesis and Electron Transfer .....	197
19.3 Conclusion .....	199
References .....	200
Index .....	228
