

Foreword	VII
Preface	VIII
Introduction	IX
 A Histopathological Diagnosis	 1
A.1 Enzyme Histochemical Differential Diagnosis in Chronic Constipation	1
A.2 Functional Histopathological Differential Diagnosis in Colonic Motility Disorder	2
 B Different Colon Diseases with Chronic Constipation	 3
B.1 Pathogenesis of Hirschsprung's Disease	3
B.2 'Swiss-Roll Technique'	7
B.3 Intraoperative Evaluation of the Myenteric Plexus	8
B.4 Ultrashort Hirschsprung's Disease	8
B.5 Total Aganglionosis of the Colon	10
B.6 Hypoganglionosis of the Colon	12
B.7 Immaturity of the Enteric Nervous System in Childhood	15
B.8 Intestinal Neuronal Dysplasia Type A	17
B.9 Intestinal Neuronal Dysplasia Type B	19
B.10 Ganglioneuromatosis. Multiple Endocrine Neoplasia 2B (MEN 2B)	21
B.11 Desmosis Coli	22
B.12 Architectural Malformation of the Muscularis Propria	26
B.13 Degenerative Leiomyopathy: A Rare Disease	27
B.14 Stretching Atrophy of Circular and Longitudinal Muscles in the Gut	29
B.15 Nerve Cell Heterotopias in Mucosa and Muscularis Propria	30

C	A Laboratory Guide to Histopathological Diagnosis of Intestinal Motility Disorders	33
C.1	The Most Important Technical Factors for Optimal Pathohistological Results	33
C.2	Recommendations for Taking Mucosal Biopsies in Chronic Constipation	34
C.3	Instructions for Transportation of Colorectal Biopsies or Surgical Specimens	35
D	Preparation of Cryostat Sections from Biopsies and Colorectal Specimens	37
D.1	The Problem of Section Thickness	37
D.2	Preparation of Incubation Media for the Daily Routine of Enzyme Histochemical Reactions	39
E	Immunohistochemical Techniques of Paraffin Sections in the Diagnosis of Gut Dysmotility	43
	References	45
	Index	51
	Abbreviations	53
