
Contents

- 1 Introduction** 1
 - 1.1 Problem Framing & Research Aim 1
 - 1.2 Outline of the Thesis 3
- 2 Theoretical Review** 5
 - 2.1 Artificial Intelligence (AI) 5
 - 2.1.1 Definition 6
 - 2.1.2 Historical Development of AI 8
 - 2.1.3 Weak & Strong AI 10
 - 2.1.4 Performance Components of AI 11
 - 2.1.4.1 Machine Learning (ML) 11
 - 2.1.4.2 Deep Learning (DL) 13
 - 2.1.5 Ethical Considerations 15
 - 2.2 Change Management (CM) 16
 - 2.2.1 Product Lifecycle Management (PLM) 17
 - 2.2.2 Product Change Management (PCM) 20
 - 2.2.3 PCM in Industry—Engineering Change Management (ECM) 21
 - 2.2.4 Relevance of Managing Change 24
 - 2.3 AI & PCM—Current State of Research & Research Gap 26
 - 2.4 The Medical Technology (MedTech) Industry 27
 - 2.4.1 Medical Technology 27
 - 2.4.2 Numbers, Data & Facts 29
 - 2.4.3 Importance of PCM in MedTech 31

2.4.4	AI in MedTech	33
2.5	Research Gap	35
3	Research Methodology	37
3.1	Research Design: Expert Interviews	37
3.2	Selection Strategy: Sampling	39
3.3	Data Display & Analysis	42
4	Findings	47
4.1	Potential of AI	48
4.1.1	Greatest Fields of Potential of AI in MedTech	50
4.1.2	PCM & AI	51
4.1.3	MedTech & AI	52
4.2	Use of AI in Companies/Institutions	52
4.2.1	Company Size	54
4.3	AI in Society	55
4.4	Requirements of AI	56
4.4.1	Data	57
4.4.2	Data Protection	58
4.5	Human & AI	59
4.6	Risks of AI	60
4.7	Future of AI & MedTech Industry	62
4.7.1	Comparison: AI & Internet	64
4.8	Regulations of AI	65
4.9	Ethical Considerations	66
4.9.1	Jobs	67
4.9.2	Knowledge Management	68
4.9.3	AI Trainings	69
4.9.4	Market Competition	69
4.10	Regulations in MedTech Industry	71
4.11	State of Research AI & MedTech	72
4.11.1	Development of AI	72
4.11.2	Development of MedTech Industry	73
4.12	Challenges in MedTech Industry	74
4.13	PCM Process	75
4.13.1	Process Duration	76
4.13.2	Challenges in PCM	77
4.13.3	Tasks of Product Change Manager	78
4.13.4	Requirements of PCM	80
4.13.5	Drivers of Technological Change	81
