

Contents

Part I: SCIENTIFIC LIFE OF PROF. DR. KRZYSZTOF WILMAŃSKI

Curriculum Vitae of Prof. Dr. K. Wilmański	3
Publications of Prof. Dr. K. Wilmański	7

Part II: THERMODYNAMIC MODELING

On Pore Fluid Pressure and Effective Solid Stress in the Mixture Theory of Porous Media	19
<i>I-Shih Liu</i>	
An Extrapolation of Thermodynamics to Evolutionary Genetics	29
<i>Ingo Müller</i>	
Some Recent Results on Multi-temperature Mixture of Fluids	39
<i>Tommaso Ruggeri</i>	

Part III: EXTENSIONS OF CONSTITUTIVE LAWS

Hypocontinua	61
<i>Gianfranco Capriz</i>	
On Constitutive Choices for Smectic Elastomers	71
<i>Pasquale Giovine</i>	
A Note on the Representation of Cosserat Rotation	83
<i>J.D. Goddard</i>	

Material Uniformity and the Concept of the Stress Space . . .	91
<i>Serge Preston, Marek Elżanowski</i>	

Coupled Nonlinear Thermoelastic Equations for an Orthotropic Beam with Thermal and Viscous Dissipation . . .	103
<i>M.B. Rubin</i>	

On the Mathematical Modelling of Functionally Graded Composites with a Deterministic Microstructure	117
<i>Czesław Woźniak, Jowita Rychlewska</i>	

Part IV: MICRO- AND NANOSCALE MECHANICS

On the Derivation of Biological Tissue Models from Kinetic Models of Multicellular Growing Systems	131
<i>N. Bellomo, A. Bellouquid, E. De Angelis</i>	

Instabilities in Arch Shaped MEMS	147
<i>K. Das, R.C. Batra</i>	

Towards Poroelasticity of Fractal Materials	157
<i>M. Ostoja-Starzewski</i>	

The Maxwell Problem (Mathematical Aspects)	165
<i>Evgeniy V. Radkevich</i>	

Continuum-Molecular Modeling of Nanostructured Materials	189
<i>Gwidon Szefer, Dorota Jasińska</i>	

Part V: WAVES

Linear Wave Propagation in Unsaturated Rocks and Soils . .	205
<i>Bettina Albers</i>	

Explicit Solution Formulas for the Acoustic Diffraction Problem with a Slit in a Hard and a Soft Screen	221
<i>Matthias Kunik</i>	

On the Stability of the Inversion of Measured Seismic Wave Velocities to Estimate Porosity in Fluid-Saturated Porous Media	233
<i>Carlo G. Lai, Jorge G.F. Crempien de la Carrera</i>	

On Two Insufficiently Exploited Conservation Laws in Continuum Mechanics: Canonical Momentum and Action . .	251
<i>G.A. Maugin, M. Rousseau</i>	

Waves and Dislocations	269
<i>Łukasz A. Turski</i>	

Part VI: PHASE TRANSITIONS

Liquid-Solid Phase Transitions in a Deformable Container ...	285
<i>Pavel Krejčí, Elisabetta Rocca, Jürgen Sprekels</i>	
Composite Beams with Embedded Shape Memory Alloy	301
<i>Mieczysław Kuczma</i>	
Microstructures in the $\text{Ti}_{50}\text{Ni}_{50-x}\text{Pd}_x$ Alloys' Cubic-to-Orthorhombic Phase Transformation: A Proposed Energy Landscape	317
<i>Mario Pitteri</i>	

Part VII: GRANULAR MEDIA

Analysis of Shear Banding with a Hypoplastic Constitutive Model for a Dry and Cohesionless Granular Material	335
<i>Erich Bauer</i>	
Principal Axes and Values of the Dispersion Coefficient in the 2D Axially Symmetric Porous Medium	351
<i>Leonid G. Fel, Jacob Bear</i>	
The Importance of Sand in Earth Sciences	357
<i>Dimitrios Kolymbas</i>	
Author Index	383
Index	385
