
Contents

1	Fundamentals of Endocrinology	1
1.1	Endocrinology: Definition and Explanation of the Scientific Discipline	2
1.2	The Endocrine System (Hormonal System)	3
1.2.1	Neurotransmitters	6
1.2.2	Peptide or Protein Hormones	8
1.2.3	Amino Acid Derivatives	8
1.2.4	Steroid Hormones	9
1.2.5	Summary and Principles of a Hormone	9
1.3	The Endocrine Glands	10
1.3.1	Pineal Gland	11
1.3.2	Hypothalamus	11
1.3.3	Pituitary Gland or Hypophysis	13
1.3.4	Adenohypophysis or Anterior Pituitary Lobe	13
1.3.5	Neurohypophysis or Posterior Pituitary Lobe	14
1.3.6	Hypothalamic-Pituitary Hormone System	14
1.3.7	Thyroid and Parathyroid Glands	14
1.3.8	Gastroenteropancreatic Endocrine System (GEP)	16
1.3.9	Adrenal Glands	17
1.3.10	Gonads	17
1.3.11	Placenta or Afterbirth	19
1.3.12	Skin	20
1.4	The Most Important Hormones and Their Places of Origin	21
1.4.1	Neuropeptides of the Hypothalamus: Releasing Hormones (Liberins)	21
1.4.1.1	CRH—Corticotropin-Releasing Hormone	21
1.4.1.2	Urocortins	22
1.4.1.3	TRH—Thyrotropin-Releasing Hormone	22
1.4.1.4	GnRH—Gonadotropin-Releasing Hormone	22
1.4.1.5	GHRH—Somatoliberin	23

1.4.2	Neuropeptides of the Hypothalamus: Release-Inhibiting Hormones.	23
1.4.2.1	SST—Somatostatin.	23
1.4.2.2	PRH—Prolactin-Releasing Hormone.	23
1.4.2.3	MRIH—Melanostatin.	24
1.4.2.4	Peptides and Food Intake	24
1.4.2.5	Dopamine and Dopaminergic Systems.	24
1.4.2.6	Serotonin and the Serotonergic System	25
1.4.2.7	KiSS Peptides	26
1.4.3	Hormones of the Adenohypophysis.	27
1.4.3.1	ACTH—Adrenocorticotropin.	27
1.4.3.2	TSH—Thyrotropin, T3—Triiodothyronine, and T4—Thyroxine.	27
1.4.3.3	LH—luteinizing hormone, and FSH—follicle-stimulating hormone	28
1.4.3.4	GH—“growth hormone”.	29
1.4.3.5	PRL—Prolactin.	29
1.4.3.6	POMC—Proopiomelanocortin	30
1.4.4	Hormones of the Neurohypophysis	31
1.4.4.1	AVP—Arginine Vasopressin.	31
1.4.4.2	OXY—Oxytocin	32
1.4.5	Hormones from Endocrine Glands and Organs.	32
1.4.5.1	Melatonin—Pineal Gland, Gut, and Retina	32
1.4.5.2	Hormones of the Paired Adrenal Glands.	33
1.4.5.3	DHEA—Dehydroepiandrosterone	33
1.4.5.4	Cortisol	34
1.4.5.5	Glucocorticoids.	34
1.4.6	Hormones of the Adrenal Medulla (AM)	35
1.4.6.1	Catecholamines.	36
1.4.6.2	Noradrenaline and Noradrenergic Systems.	36
1.4.6.3	Adrenaline and Adrenergic Systems.	37
1.5	Communication Pathways of Hormones: The Hormone Axes	38
1.5.1	Hypothalamus-Pituitary-Adrenal Axis (HPA).	39
1.5.2	Hypothalamus-Pituitary-Gonadal Axis (HPGA).	40
1.5.2.1	Reproductive Control in Men	41
1.5.2.2	Reproductive Control in Women.	41
1.5.2.3	Mediators of the Hypothalamus-Pituitary-Gonadal Axis (HPGA)	41
1.6	Summary: Fundamentals of Endocrinology	42
	References.	42

2	Psychoneuroendocrinology	47
2.1	Definition and Explanation of the Scientific Discipline	48
2.2	Endocrine System and Nervous System	49
2.2.1	Neuroendocrine Regulatory Circuits	50
2.2.2	Glucocorticoids and Their Effects on Perception	52
2.3	Chronobiology	54
2.3.1	Hórmone Secretion and Sleep	55
2.3.2	Growth Hormone (GH) and Cortisol	56
2.3.3	Cortisol and Immunosuppression	57
2.3.4	Melatonin and Immune Competence	58
2.3.5	Summary and Intervention	59
2.4	The Importance of (Behavioral) Genetics for Psychoneuroendocrinology	60
2.4.1	Fundamentals of Behavioral Genetics	62
2.4.2	Twin Studies	64
2.4.3	Gene-Gene, Gene-Age, Gene-Gender, and Gene-Environment Interactions	65
2.4.4	The Importance of Genetic Factors for the Regulation of the Hypothalamus-Pituitary-Adrenal Axis (HPA Axis)	66
2.4.5	Gene-Sex Interactions	66
2.4.6	Conclusion	67
2.5	Emotions and Hormones	67
2.5.1	Oxytocin and Its Importance for Emotions, Behavior, and Attachment Disorders	68
2.5.2	Vasopressin and Its Importance for Emotions and Behavior	76
2.5.3	Dopamine and Its Significance for Emotions and Behavior	78
2.5.4	Hormones and Aggressive Behavior	81
2.5.4.1	Classification of Aggression	82
2.5.4.2	The Neurobiology of Aggressive Behavior	83
2.5.4.3	Aggression and Sex Hormones	85
2.5.4.4	Neurochemistry and Aggression	88
2.5.4.5	Genetics of Aggression	89
2.6	Stress and Helplessness	90
2.6.1	Definition and Explanation of Stress	90
2.6.2	Short-term and Long-term Stress	92
2.6.3	Stress Management (“coping”)	93
2.6.4	Attempts at Stress Management: Successful or Unsuccessful	94
2.6.5	Stress and the Brain: From Homeostasis to Allostasis	96
2.6.6	Stress and Neurochemical Imbalance	97
2.6.7	Stress, Norepinephrine, Cell Loss, and PTSD	97
2.6.8	Stress, Serotonin, and Psychological Functions	99

2.6.9	Stress, Endogenous Opioids, and the Influence on Emotions and Behavior	102
2.6.10	Stress and Pathophysiological Consequences	104
2.6.11	Stress, Cortisol, and Mental Disorders	106
2.6.12	Neurobiological Gender Differences in Psychosocial Stress	111
2.7	Mental Disorders, Psychoneuroendocrinology, and Gene-Environment Factors	112
2.7.1	Post-Traumatic Stress Disorder (PTSD)	113
2.7.2	Depression	117
2.7.3	Anxiety Disorders	127
2.7.4	Obsessive-Compulsive Disorder	133
2.7.5	Borderline Personality Disorder	136
2.7.6	Antisocial Personality Disorder and Psychopathy.	140
2.7.7	Conclusion.	146
2.8	The 6 Psychoneuronal Basic Systems According to Roth and Strüber	146
2.8.1	Stress Processing System.	146
2.8.2	Internal Calming System	148
2.8.3	Internal Evaluation and Reward System	149
2.8.4	Impulse Inhibition System.	150
2.8.5	Attachment System	151
2.8.6	System of Reality Sense and Risk Assessment	153
2.8.7	Psychoneuronal Systems and the 4-Level Model	154
2.8.8	Conclusion: Psychoneuronal Basic Systems and the Psychosocial and Psychotherapeutic Practice	154
2.9	“Happiness Hormones” and the Importance of Precursors and Co-Factors	155
2.9.1	Serotonin and L-Tryptophan	156
2.9.2	Dopamine and L-Tyrosine.	157
2.9.3	GABA and L-Glutamine	158
2.9.4	Co-Factors	159
2.9.5	Inflammations and Serotonin Metabolism.	159
2.9.6	Gut-Brain Axis: Healthy Gut—Healthy Mind.	160
2.9.7	Conclusion.	161
2.10	Summary and Conclusion: Psychoneuroendocrinology	161
	References.	163
3	The Psychological and Psychosocial Counseling Process	175
3.1	Counseling Process: Relationship Building, Diagnostics, Interventions, and Counseling Conclusion	176
3.1.1	The Importance of the Relationship	176

3.1.2	Psychosocial Diagnostics: Definition, Foundations, and Methods	181
3.1.2.1	Psychosocial Diagnostics: Definition and Fundamentals	181
3.1.2.2	Forms of Psychosocial Diagnostics	182
3.1.2.3	Methods of Psychosocial Diagnostics	184
3.1.2.4	Summary: Psychosocial Diagnostics	201
3.1.3	Forms of Intervention: Counseling and Therapy Approaches, Methods, and Training	201
3.1.3.1	Counseling Approaches and School-Specific Therapeutic Orientations.	202
3.1.3.2	Critical Considerations of School-Specific Orientations.	223
3.1.3.3	Methods for Problem Solving in Psychological and Psychosocial Counseling	226
3.1.3.4	Conclusion of Counseling: Evaluation and Quality Assurance	252
3.2	Summary	255
	References.	256
4	Psychoneuroendocrinology (PNE) in Psychosocial and Psychotherapeutic Practice: “PNES Coaching”	265
4.1	Psychoneuroendocrinology in Psychosocial and Psychotherapeutic Practice.	265
4.1.1	Relevant Topics for Psychosocial and Psychotherapeutic Practice	265
4.1.2	Conclusion: Psychoneuroendocrinology in Psychosocial and Psychotherapeutic Practice	269
4.2	PNES Coaching: The Implementation of Psychoneuroendocrinological Insights into an Eclectic-Integrative Biopsychosocial Coaching Approach	271
4.2.1	“PNES Coaching”: The 13 Pillars	273
4.2.2	“PNES Coaching”: Conclusion	297
	Appendix	299
	Glossary	303
	References	323
