- 1 Introduction 1**
 - 1.1 Motivation 2
 - 1.2 Literature Review 3
 - 1.2.1 Resource Type 4
 - 1.2.2 Environmental Factors 5
 - 1.2.3 UE Behaviors 6
 - 1.2.4 Traffic Model and Traffic Prediction 7
 - 1.2.5 Quality of Service (QoS) 8
 - 1.2.6 Heterogeneous Use Cases 9
 - 1.2.7 Flexible Time Frame Structure 10
 - 1.2.8 Network Slicing 10
 - 1.2.9 uRLLC 12
 - 1.3 Model Predictive Control for Resource Allocation 17
 - 1.4 Contributions and Outline 18
- 2 5G Background 21**
 - 2.1 Cellular Network Evolution 21
 - 2.2 5G Use Cases 23
 - 2.3 5G Core 24
 - 2.3.1 Network Function Virtualization 24
 - 2.3.2 Software-Defined Networking 27
 - 2.4 5G New Radio 28
 - 2.4.1 Flexible RAN Deployment 28
 - 2.4.2 Multi-Access Edge Computing 30
 - 2.4.3 5G NR Protocols 31
 - 2.4.4 5G Frame Structure 36
 - 2.5 Network Slicing 38
- 3 Control Background 45**
 - 3.1 Model Predictive Control 46
 - 3.1.1 MPC Working Flow 47
 - 3.1.2 Benefits 47
 - 3.1.3 Centralized MPC 48
 - 3.1.4 Parameters 52
 - 3.1.5 Application to Resource Allocation 53

3.1.6	Decentralized and Distributed MPC	54
3.1.7	Hierarchical MPC	58
3.2	Successive Convex Approximation	59
3.2.1	SCA Working Flow	60
3.2.2	Convergence Analysis of SCA	61
4	Prediction Error-Based MPC for Resource Allocation in 5G uRLLC	65
4.1	Research Problem	65
4.2	Proposed Solution	66
4.3	Problem Formulation	67
4.4	MPC-Based Algorithm	68
4.5	Numerical Simulations	72
4.5.1	Stationary Incoming Traffic	72
4.5.2	Dynamic Incoming Traffic	74
4.6	Discussion	78
5	MPC-Based Rate Calculation under Fluctuating Fading Channels	81
5.1	Research Problem	81
5.2	Proposed Solution	82
5.3	Problem Formulation	83
5.4	MPC-Based Resource Allocation	84
5.4.1	MPC-Based Channel Condition-Aware Rate Calculation	85
5.4.2	One Time Step Resource Allocation	86
5.4.3	System Architecture	87
5.5	Numerical Simulations	88
5.5.1	Stationary Cases	88
5.5.2	Dynamic Cases	90
5.5.3	Large Gaps of Channel Conditions	90
5.6	Discussion	93
6	Decentralized MPC-Based 5G uRLLC Rate Calculation	95
6.1	Research Problem	96
6.2	Proposed Solution	96
6.3	System Modeling	98
6.3.1	MPC-Based Rate Calculation	100
6.3.2	One Time Step Resource Allocation	102
6.4	Decentralized MPC-Based Algorithm	104
6.4.1	Decentralized MPC-Based Rate Calculation	106
6.4.2	One Time Step Resource Allocation	112
6.5	Numerical Simulations	113
6.5.1	Deterministic Case	114
6.5.2	Stochastic Case	119
6.5.3	Non-Regular Traffic Predictions	125
6.5.4	Unexpected Large Prediction Errors	131

6.6	Discussion	134
7	MPC-Based Rate Calculation for Effective Bandwidth in 5G uRLLC	137
7.1	Research Problem	137
7.2	Proposed Solution	138
7.3	Problem Formulation	139
7.4	MPC-Based Data Rate Calculation	140
7.5	Parameter Study	141
7.6	Numerical Simulations	143
7.6.1	MPC-Based Finite Time Length Solution	143
7.6.2	Parameter Study	145
7.7	Discussion	147
8	Conclusion and Future Works	149
8.1	Contributions	150
8.2	Future Works	151
A	Appendix	153
A.1	Prove to Global Optimality of Algorithm 1	153
A.2	Prove to Calculate Key Point	155
A.3	Prove to the Solvability of Equation (A.6)	157
A.4	The Gap Between Optimal and Applied Endpoints	157
A.5	Procedure of SCA	158
	Bibliography	159
	Biography	205
