Part 1: Overview of Dialysis Treatment and Modeling Techniques

1 Initiation of Dialysis	3
Ahmad Taher Azar, Alicja E. Grzegorzewska	
1.1 Structure of Normal Kidneys	4
1.2 Functions of Normal Kidney.....	7
1.3 Renal Failure	14
1.4 Renal Replacement Therapy (RRT).....	22
1.5 Final Remarks and Conclusions	37
References	38
 2 Measurement of Renal Function.....	 45
Ahmad Taher Azar	
2.1 Stages of Chronic Kidney Disease	46
2.2 Measurement of Residual Renal Function	47
2.3 Glomerular Filtration Rate in Children with Chronic Kidney Disease.....	73
2.4 Conclusion	81
References.....	82
 3 Hemodialysis System.....	 99
Ahmad Taher Azar, Bernard Canuad	
3.1 Principles of Dialysis	100
3.2 Hemodialysis Machine.....	116
3.3 Advanced Options for Hemodialysis Machines.....	148
3.4 Conclusion	154
References.....	155
 4 Intensive Hemodialysis in the Clinic and at Home.....	 167
Philip A. McFarlane	
4.1 Introduction	168
4.2 The Home Nocturnal Hemodialysis Technique	176

4.3	Rationale for Intensive Hemodialysis	178
4.4	Determining Adequacy of Dialysis in People Undergoing Intensive Hemodialysis	187
4.5	Economic Considerations.....	201
4.6	Selecting Patients for Intensive Hemodialysis	204
4.7	Candidacy and Home Hemodialysis Requirements	205
4.8	Performing Intensive Hemodialysis Safely.....	214
4.9	Conclusions.....	218
	References	219
5	Vascular Access for Hemodialysis Therapy.....	235
	A.S. Bode, J.H.M. Tordoir	
5.1	End-Stage Renal Disease	236
5.2	History of Vascular Access.....	238
5.3	Options for Vascular Access.....	242
5.4	Pre-operative Work-Up.....	260
5.5	Using Arteriovenous Fistula	266
5.6	Vascular Access Complications and Their Treatment	269
5.7	Hemodynamic Aspects of Arteriovenous Fistulas	280
5.8	Conclusion and Future Directions for Vascular Access.....	286
	References	287
6	Access Flow Monitoring Methods.....	305
	Daniel Schneditz, Laura M. Rosales, Ahmad Taher Azar	
6.1	Introduction	306
6.2	Peripheral Access	307
6.3	Flow Measurement.....	310
6.4	Extracorporeal Application	314
6.5	Access Flow	318
6.6	Bolus Approach.....	321
6.7	Continuous Infusion Approach	323
6.8	Line Switches	329
6.9	Arterio-Venous Gradients	330
6.10	Conclusion.....	334
	References	335
7	Hemodialysis Water Treatment System.....	347
	Ahmad Taher Azar, Suhail Ahmad	
7.1	Water Contaminants.....	348
7.2	Methods of Hemodialysis Water Purification	350
7.3	Disinfection of Water Treatment Systems	368

7.4	Monitoring and Testing of Dialysis Water Treatment System.....	369
7.5	Conclusion	372
	References.....	372
8	Dialyzer Performance Parameters	379
	Ahmad Taher Azar	
8.1	Performance Characteristics of Dialyzers	380
8.2	Factors Affecting Solute Clearance on Hemodialysis.....	401
8.3	High Efficiency Dialysis	413
8.4	Conclusion	417
	References.....	418
9	Dialyzer Structure and Membrane Biocompatibility	427
	Orfeas Liangos, Bertrand L. Jaber	
9.1	Introduction.....	428
9.2	Overview of Dialyzer Structure	429
9.3	Materials Used for Artificial Kidney Membranes.....	430
9.4	Key Features of Biocompatibility	434
9.5	Clinical Implications of Dialysis Membrane Biocompatibility.....	450
9.6	Conclusion	455
	References.....	456
10	Dialyzer Reprocessing.....	481
	Wayne Carlson	
10.1	History of Dialyzer Reprocessing	482
10.2	Guidance and Regulation of Dialyzer Reprocessing.....	486
10.3	The Process of Dialyzer Reprocessing.....	486
10.4	Manual and Automated Reprocessing.....	495
10.5	Advantages and Disadvantages of Dialyzer Reprocessing ...	498
10.6	Water Quality	505
10.7	Anti-N Antibodies.....	507
10.8	Reuse Associated Changes in Ultrafiltration Coefficient.....	508
10.9	Current Controversies	509
10.10	Conclusion and Future Developments	510
	References.....	510
11	Flow Modeling of Hollow Fiber Dialyzers	519
	Manuel Prado-Velasco	
11.1	General Issues of Dialyzer Flows.....	520
11.2	Flow Modeling in a Whole Scenario.....	529
11.3	1D Diffusive Model of a Hollow Fiber Dialyzer	537

11.4	Succinct Review of Lacks of 1D Diffusive Flow Modeling of Hollow Fiber Dialyzers.....	545
11.5	A Deeper Insight in the Flow Modeling of Dialyzers	546
11.6	Flow Modeling of Dialyzers: Progress and Future	552
11.7	Conclusion.....	553
	References.....	554
12	Single Pool Urea Kinetic Modeling.....	563
	Alicja E. Grzegorzewska, Ahmad Taher Azar, Laura M. Roa, J. Sergio Oliva, José A. Milán, Alfonso Palma	
12.1	Compartment Effects in Hemodialysis	564
12.2	Historical Review of Urea Kinetic Modeling	565
12.3	Single Pool Urea Kinetic Model (SPUKM).....	571
12.4	Mathematical Models for Hemodialysis Dose Calculation.....	584
12.5	Optimum Single Pool Hemodialysis Dose.....	592
12.6	Residual Renal Function and Dialysis Dose	595
12.7	Normalized Protein Catabolic Rate (Protein Nitrogen Appearance) and Dialysis Dose	600
12.8	Dynamic Approach to Kt/V : The Time Constant in Hemodialysis.....	608
12.9	Final Remarks and Conclusions.....	610
	References.....	613
13	Double Pool Urea Kinetic Modeling.....	627
	Ahmad Taher Azar, Masatomo Yashiro, Daniel Schneditz, Laura M. Roa	
13.1	Single Pool Model versus Double Pool Model	628
13.2	Double Pool Urea Kinetic Model.....	630
13.3	Estimation of Equilibrated Post-dialysis Blood Urea Concentration	640
13.4	Estimation of Post-dialysis Urea Rebound.....	643
13.5	Estimation of Equilibrated Dialysis Dose $_{eq}(Kt/V)$	645
13.6	Regional Blood Flow Model.....	655
13.7	Conclusion.....	668
	References.....	676
14	Applications of Bioimpedance to End Stage Renal Disease (ESRD).....	689
	Laura M. Roa, David Naranjo, Javier Reina-Tosina, Alfonso Lara, José A. Milán, Miguel A. Estudillo, J. Sergio Oliva	
14.1	Introduction.....	690
14.2	History of Bioimpedance	695

14.3	Physical Principles of Bioimpedance	698
14.4	Bioimpedance Instrumentation Basics	709
14.5	Bioimpedance Measurement Techniques.....	714
14.6	Nephrology Applications	730
14.7	Commercial Devices	738
14.8	Case Studies	742
14.9	Conclusion.....	751
	References	753
