

Contents

1. Introduction	1
1.1 Business Cycle Research: 21st Century Perspective	1
1.1.1 The Classic View	3
1.1.2 From CBC to RBC School	4
1.2 Recent Empirical Findings in Favor of CBC	4
1.2.1 Aggregate Investment Fluctuations and Business Cycles	4
1.2.2 The Cyclicity of the Aggregate Investment Series	5
1.2.3 Investment, the RBC View and Disaggregated Dynamics	6

Part I. Methodology

2. General Considerations and Historiography	11
2.1 Methodologies: Econometrics vs. Natural Sciences	11
2.2 The Econometric Approach to Time Series Analysis	13
3. The Analysis of Cyclical Dynamics	15
3.1 The Detrending Problem	16
3.2 Volatility and Spectral Analysis	20
3.2.1 Contribution-to-Variance Analysis	20
3.2.2 Spectral Analysis: The Univariate Case	21
3.2.3 The Analysis of Complex Roots	27
3.2.4 Spectral Analysis: The Multivariate Case	31

Part II. National, Supra- and International Cycles

4. The G7 and Euro15 Economies: 1960 - 2000	35
4.1 Data and Strategy	35
4.2 National Uni- and Bivariate Stylized Facts	37
4.2.1 General Salient Facts	38
4.2.2 Robust Univariate Stylized Facts: National Cycles	42
4.2.3 Robust Bivariate Stylized Facts: National Cycles	43
4.3 Supranational Bivariate Stylized Facts	47

5. Mode-Locking and the Global Cycle	69
5.1 Introduction and Motivation of the Discussion	70
5.2 Generalizing Economic Cycles' Mode-Lock Modelling	72
5.3 A Model Incorporating Information Externalities	75
5.3.1 The Model without Information Externalities	75
5.3.2 Introducing Information Externalities	79
5.3.3 Calibration of the Model and Some Simulations	81
5.4 Outlook and Concluding Remark	88

Part III. The Sectoral Constitution of Macro-Cycles

6. An Aggregation Problem for Linear Models?	91
6.1 Description of US Business Cycles	92
6.1.1 Business Cycles in Central US NIPA Time Series	92
6.1.2 Cycles in Disaggregated US Manufacturing Investment	95
6.2 Testing Autoregressivity and Aggregate Feedback	100
6.3 Linear Models of the Aggregation Process	102
6.4 Evaluation of Linear Models	107
7. The Synchronization of Sectoral Cycles	109
7.1 Definitions of Synchronization	109
7.2 A Recent Approach: Method and Findings	111
7.3 The "Shift-Win"-Approach: Method and Findings	117
8. A Non-Linear Synchronization Model	123
8.1 Theoretical Underpinning of the Model	124
8.1.1 The Medium-Term Investment Objective: Smoothing	124
8.1.2 The Short-Term Investment Objective: Herding	126
8.1.3 The Integrated Model: Smoothing and Herding	128
8.1.4 The Synchronization Mechanism	132
8.2 A Thorough Simulation Study	134
8.2.1 Calibration as an Alternative to Estimation	134
8.2.2 Setting Up the Simulation Strategy and Determining Priors	136
8.2.3 Monte Carlo Simulations of the Model Incorporating Shocks	138
8.2.4 Evaluation of the Model and Outlook	141
9. Conclusion	149
Abbreviations	153
