

Contents Overview

1. Introduction: Total Synthesis Marching on with New Methods and Strategies and with Molecules for Biology and Medicine
2. Halichondrin B and Norhalichondrin B (Y. Kishi; A. J. Phillips; K. C. Nicolaou) (1992; 2009; 2021)
3. Daphmanidin E (E. M. Carreira) (2011)
4. Epicoccin G and (–)-Acetylaranotin (K. C. Nicolaou; S. E. Reisman; H. Tokuyama) (2011; 2011; 2012)
5. Taiwaniadducts B, C, and D (A. Li) (2014)
6. Schindilactone A (Z. Yang, J. Chen, Y. Tang) (2011)
7. Welwitindolinones (V. H. Rawal; N. K. Garg) (2011, 2012, 2017; 2011, 2012, 2013, 2014)
8. Ryanodine and Ryanodol (P. Deslongchamps; M. Inoue; S. E. Reisman) (1979; 2014; 2016)
9. Gedunin, Mitrephorone A, and Antiretroviral Agent Islatravir (M. A. Huffman, A. Fryszkowska; H. Renata) (2019; 2020, 2022)
10. Trioxacarcins (A. G. Myers; K. C. Nicolaou) (2011, 2013; 2015, 2016)
11. Aplyviolene (L. E. Overman) (2011, 2012)
12. Dixiamycin B (P. S. Baran) (2014)
13. Ingenol (P. S. Baran) (2013)
14. Cardamom Peroxide, Nodulisporic Acid C, and Bilobalide (T. J. Maimone; S. V. Pronin; R. A. Shenvi) (2014; 2018; 2019)
15. Batrachotoxin and Conidiogenones (J. Du Bois; S. A. Snyder) (2016; 2019)
16. Gukulenin B and C–H Functionalization (K. C. Nicolaou) (2022)

Table of Contents

Chapter 1

Introduction: Total Synthesis Marching on with New Methods and Strategies and with Molecules for Biology and Medicine

1.1	Targets	2
1.2	Methods and Strategies	5
1.3	Classics in Total Synthesis IV	5

Chapter 2

Halichondrin B and Norhalichondrin B

Y. Kishi; A. J. Phillips; K. C. Nicolaou (1992; 2009; 2021)

2.1	Introduction	11
2.1.1	Nozaki–Hiyama–Kishi Reaction	14
2.1.2	Achmatowicz Rearrangement	22
2.2	Kishi’s Retrosynthetic Analysis and Strategy . . .	25
2.3	Kishi’s Total Syntheses of Halichondrin B and Norhalichondrin B	27
2.3.1	Eribulin	48
2.4	Phillips’ Retrosynthetic Analysis and Strategy . .	52
2.5	Phillips’ Total Synthesis of Norhalichondrin B . .	54
2.6	Nicolaou’s Retrosynthetic Analyses and Strategies	63
2.7	Nicolaou’s Total Synthesis of Halichondrin B . . .	66
2.8	Nicolaou’s Total Synthesis of Norhalichondrin B .	75
2.9	... and the Sky’s the Limit	81

Chapter 3

Daphmanidin E

E. M. Carreira (2011)

3.1	Introduction	87
3.2	Retrosynthetic Analysis and Strategy	90

3.3	Total Synthesis	90
3.4	Conclusion	103

Chapter 4

*Epicoccin G and (–)-Acetylaranotin**K. C. Nicolaou; S. E. Reisman; H. Tokuyama (2011; 2011; 2012)*

4.1	Introduction	111
4.2	Nicolaou's Retrosynthetic Analysis of Epicoccin G	115
4.3	Nicolaou's Total Synthesis of Epicoccin G	116
4.4	Reisman's Retrosynthetic Analysis of (–)-Acetylaranotin	121
4.5	Reisman's Total Synthesis of (–)-Acetylaranotin .	124
4.6	Tokuyama's Retrosynthetic Analysis of (–)-Acetylaranotin	129
4.7	Tokuyama's Total Synthesis of (–)-Acetylaranotin	130
4.8	Conclusion	132

Chapter 5

*Taiwaniadducts B, C, and D**A. Li (2014)*

5.1	Introduction	137
5.1.1	Recent Advances in Nonenzymatic Enantioselective Polyene Cyclization	141
5.2	Retrosynthetic Analysis and Strategy	146
5.3	Total Synthesis	148
5.4	Conclusion	157

Chapter 6

*Schindilactone A**Z. Yang, J. Chen, Y. Tang (2011)*

6.1	Introduction	161
6.1.1	Pauson–Khand Reaction	167

6.1.2	Pd-Mediated Carbonylative Annulation	172
6.2	Retrosynthetic Analysis and Strategy	174
6.3	Total Synthesis	177
6.4	The After Story	186

Chapter 7

*Welwitindolinones**V. H. Rawal; N. K. Garg (2011, 2012, 2017; 2011, 2012, 2013, 2014)*

7.1	Introduction	191
7.2	Rawal's Retrosynthetic Analysis of Oxidized Welwitindolinones	196
7.3	Rawal's Total Synthesis of Oxidized Welwitindolinones	198
7.4	Garg's Retrosynthetic Analysis of Oxidized Welwitindolinones	207
7.5	Garg's Total Synthesis of Oxidized Welwitindolinones	212
7.6	Total Syntheses of <i>N</i> -Methylwelwitindolinone B Isothiocyanate	220
7.7	Conclusion	225

Chapter 8

*Ryanodine and Ryanodol**P. Deslongchamps; M. Inoue; S. E. Reisman (1979; 2014; 2016)*

8.1	Introduction	229
8.2	Deslongchamps' Retrosynthetic Analysis and Strategy	233
8.3	Deslongchamps' Total Synthesis of Ryanodol	235
8.4	Inoue's Retrosynthetic Analysis and Strategy	246
8.5	Inoue's Total Synthesis of Ryanodol	248
8.6	Reisman's Retrosynthetic Analysis and Strategy	257
8.7	Reisman's Total Synthesis of Ryanodol	258
8.8	Inoue's and Reisman's Total Syntheses of Ryanodine	263
8.9	Conclusion	268

Chapter 9

*Gedunin, Mitrephorone A, and
Antiretroviral Agent Islatravir**M. A. Huffman, A. Fryszkowska; H. Renata (2019; 2020, 2022)*

9.1	Introduction	273
9.1.1	Gedunin	288
9.1.2	Mitrephorone A	289
9.1.3	Islatravir	289
9.2	Renata's Retrosynthetic Analysis of Gedunin . . .	291
9.3	Renata's Chemoenzymatic Synthesis of Gedunin .	292
9.4	Renata's Retrosynthetic Analysis of Mitrephorone A	296
9.5	Renata's Formal Total Synthesis of Mitrephorone A	298
9.6	Huffman and Fryszkowska's Retrosynthetic Analysis of Islatravir	301
9.7	Huffman and Fryszkowska's Total Synthesis of Islatravir	303
9.8	Conclusion	308

Chapter 10

*Trioxacarcins**A. G. Myers; K. C. Nicolaou (2011, 2013; 2015, 2016)*

10.1	Introduction	317
10.1.1	Hauser–Kraus Annulation	323
10.2	Myers' Retrosynthetic Analysis and Strategy . . .	328
10.3	Myers' Total Synthesis of Trioxacarcins	331
10.4	Nicolaou's Retrosynthetic Analysis and Strategy	343
10.5	Nicolaou's Total Synthesis of Trioxacarcins . . .	345
10.6	Synthesis and Biological Evaluation of Trioxacarcin Analogues	354
10.7	Conclusion	359

Chapter 11

*Aplyviolene**L. E. Overman (2011, 2012)*

11.1	Introduction	363
11.2	Overman's Retrosynthetic Analysis of Aplyviolene	364
11.3	Overman's Total Synthesis of Aplyviolene	366
11.3.1	First-Generation Synthesis	366
11.3.2	Second-Generation Synthetic Approach	370
11.3.3	Third-Generation Synthetic Approach	373
11.4	Visible-Light Photoredox Catalysis	381
11.5	Conclusion	404

Chapter 12

*Dixiamycin B**P. S. Baran (2014)*

12.1	Introduction	407
12.2	Retrosynthetic Analysis and Strategy	417
12.3	Total Synthesis	418
12.4	Electroorganic Chemistry	425
12.5	Conclusion	438

Chapter 13

*Ingenol**P. S. Baran (2013)*

13.1	Introduction	441
13.2	Retrosynthetic Analysis and Strategy	453
13.3	Total Synthesis	455
13.4	Synthesis and Biological Evaluation of Ingenol Analogues	466
13.5	Conclusion	468

Chapter 14

*Cardamom Peroxide, Nodulisporic Acid C, and Bilobalide**T. J. Maimone; S. V. Pronin; R. A. Shenvi (2014; 2018; 2019)*

14.1	Introduction	471
14.2	Maimone's Retrosynthetic Analysis of Cardamom Peroxide	476
14.3	Maimone's Total Synthesis of Cardamom Peroxide	477
14.4	2nd Movement: HAT-Initiated Olefin Hydrogenation and Isomerization	480
14.5	Shenvi's Retrosynthetic Analysis of Bilobalide	485
14.6	Shenvi's Total Synthesis of Bilobalide	488
14.7	3rd Movement: HAT-Initiated Olefin Hydrofunctionalizations	496
14.8	Pronin's Retrosynthesis Analysis of Nodulisporic Acid C	501
14.9	Pronin's Total Synthesis of Nodulisporic Acid C	504
14.10	To Be Continued	508
14.11	Conclusion	511

Chapter 15

*Batrachotoxin and Conidiogenones**J. Du Bois; S. A. Snyder (2016; 2019)*

15.1	Introduction	517
15.2	Snyder's Retrosynthetic Analysis of Conidiogenones	527
15.3	Snyder's Total Synthesis of Conidiogenones	529
15.4	More Methods and Strategies	539
15.5	Du Bois' Retrosynthetic Analysis of Batrachotoxin	544
15.6	Du Bois' Total Synthesis of Batrachotoxin	547
15.7	Conclusion	557

Chapter 16

*Gukulenin B and C–H Functionalization**K. C. Nicolaou (2022)*

16.1	Introduction	561
16.1.1	Functionalization of C(sp ²)–H Bonds	562

16.1.1.1	Electrophilic Aromatic Substitution (S_EAr)	562
16.1.1.2	Nucleophilic Aromatic Substitution (S_NAr)	564
16.1.1.3	Radical-Mediated Aromatic Substitution	567
16.1.1.4	Deprotonation by a Strong Base	570
16.1.1.5	Transition Metal-Mediated C–H Activation	572
16.1.1.6	Formal $C(sp^2)$ –H Insertion of Carbenes and Nitrenes	591
16.1.2	Functionalization of $C(sp^3)$ –H Bonds	596
16.1.2.1	Transition Metal-Mediated C–H Activation	597
16.1.2.2	C–H Insertion of Metal Carbenoids, Nitrenoids, and Oxenoids	607
16.1.2.3	$C(sp^3)$ –H Functionalization via Free Radical Intermediates	616
16.2	Retrosynthetic Analysis and Strategy	623
16.3	Total Synthesis	629
16.4	Conclusion	642
