

Contents

Abbreviations	VII
Nomenclature	VIII
1 Introduction	1
1.1 Preview of Past Works	2
1.1.1 Overview of Transient Voltage Distribution	2
1.1.2 Overview of Circuit Models	4
1.2 Research Questions	12
1.3 Outline	13
2 Random-Wound Stator Insulation Systems	15
2.1 Basic Stator Winding Structures	15
2.2 Insulation Systems	16
2.2.1 Wire Insulation	17
2.2.2 Phase and Ground Insulations	18
2.2.3 Varnish Treatment and Impregnation	18
2.3 Summary	19
3 Partial Discharge of Insulated Wires under Pulse Voltage Stress	21
3.1 Basics of Partial Discharges	21
3.2 Partial Discharges Detection System	22
3.3 Experimental Validations	25
3.3.1 Validation through Insulated Wires and a SiC-based Inverter	25
3.3.2 Validation through a Surge Voltage Tester	27
3.4 Specimens and Partial Discharge Measurement Setups	30
3.4.1 Specimens	30
3.4.2 Partial Discharge Measurement Setup with a Surge Voltage Tester	31
3.4.3 Partial Discharge Measurement Setup with a SiC-based Inverter	31
3.5 Partial Discharge Measurement Results	35
3.5.1 Surge Voltage Tester	35
3.5.2 SiC-based Inverter	36
3.6 Discussion	45

4	Single-Coil High-Frequency Model	46
4.1	Mathematical Approaches	46
4.1.1	Multi-Conductor Transmission Lines	49
4.1.2	Nodal Equations	67
4.2	Calculation of Winding Parameters	75
4.2.1	Capacitive and Inductive Couplings	76
4.2.2	Resistive Losses	80
4.3	Calculation Process	84
4.3.1	Parameter Calculation	87
4.3.2	HF Modeling	87
4.4	Experimental Validations and Comparisons	88
4.5	Discussion	100
5	Single-Phase High-Frequency Model	101
5.1	Single-Phase Model	101
5.2	Genetic Algorithms	106
5.2.1	Standard Procedure of Genetic Algorithms	107
5.2.2	Iterative Process	109
5.2.3	Structure of Genetic Algorithms	111
5.3	Specimens	113
5.4	Optimization Results	116
5.4.1	Worst Case	116
5.4.2	Best Case I	118
5.4.3	Comparisons of Worst Case and Best Case I	120
5.4.4	Best Case II	124
5.4.5	Comparisons of Worst Case, Best Case I and II	127
5.5	Discussion	127
6	Three-Phase High-Frequency Model	132
6.1	Three-Phase Model	132
6.2	Experimental Validations	137
6.2.1	Specimens	138
6.2.2	Model Validation	138
6.3	Optimization Results Validations	148
6.3.1	Simulative Validation	148
6.3.2	Experimental Validation	150
6.4	Discussion	162
7	Conclusions and Outlooks	164
A	Experimental Systems	167
A.1	Validation Measurements with the SiC-based Inverter	167
A.2	Validation Measurements with the Commercial Surge Tester	167
A.3	PD Measurements with the SiC-based Inverter	168

B	Three-Phase HF Model with $Q_{cg} = 2$ and $Q_c = 6$	169
C	Three-Phase HF Model with Optimization Results	176
	Bibliography	177
	Curriculum Vitae	186
