

1	Introduction	1
1.1	Nervous System	1
1.2	The Peripheral Nerve	2
1.3	Dorsal Root Ganglia	4
1.4	Schwann Cells	4
1.5	Disease of the Peripheral Nervous System	5
1.5.1	Guillain-Barré Syndrome	6
1.5.2	Chronic Inflammatory Demyelinating Polyneuropathy	7
1.6	Oxidative Stress	8
1.7	The Short Chain Fatty Acid Butyrate	9
1.7.1	Short Chain Fatty Acids (SCFA) in General	9
1.7.2	Butyrate	10
2	Aims	13
3	Materials	15
3.1	Equipment	15
3.2	Consumables	16
3.3	Chemicals and Reagents	17
3.4	Buffer and Solutions	19
3.5	Cell culture medium	20
3.6	Kits	20
3.7	Antibodies	21
3.8	Primer	21
3.9	Softwares	22

4	Methods	23
4.1	Laboratory Animals	23
4.2	Cell Culture	23
4.2.1	SC and DRG Generation and Cultivation	23
4.3	DRG Isolation and Culturing	24
4.4	Schwann Cell Isolation, Purification, and Culturing	24
4.4.1	Generation of Schwann Cells from Sciatic Nerves	24
4.4.2	Magnetic Activated Cell Sorting	26
4.5	Neurite Outgrowth Assay of DRG	27
4.5.1	Oxidative Stress Induction in the Dorsal Root Ganglia	27
4.6	Neuroprotective Effects of Sodium Butyrate in DRG	27
4.6.1	Neuroregenerative Effect of Sodium Butyrate in DRG	27
4.6.2	DRG Fixation and Immunohistochemical Staining	28
4.7	4.5 Schwann Cell Propidium Iodide (PI) Staining	28
4.7.1	4.5.1 Oxidative Stress Induction in SC	28
4.7.2	PI Staining and Measurement	29
4.8	Seahorse XF Cell Mito Stress Test	29
4.8.1	Cell Titration	32
4.8.2	FCCP Titration	34
4.9	Gene Expression Analysis	34
4.9.1	RNA Isolation	34
4.9.2	cDNA Synthesis	35
4.9.3	4.7.3 Quantitative real-time PCR analysis (qPCR)	36
4.10	Co-Culture	37
4.11	Statistics	38
5	Results	39
5.1	Effects of Sodium Butyrate on DRG Explants	39
5.1.1	Sodium Butyrate Toxicity Test in DRG Explants	39
5.1.2	Neuroprotective Effect of Sodium Butyrate Under Oxidative Stress	40
5.2	Effect of Sodium Butyrate on Myelination of Embryonic DRG in Co-Culture	41
5.3	Effect of Sodium Butyrate on Schwann Cells	42
5.3.1	Sodium Butyrate Toxicity Test in Schwann Cells	42
5.3.2	SNAP Titration	42

5.3.3	Oxidative Stress Induction on Sodium Butyrate Treated Schwann Cells	45
5.3.4	Gene Expression Changes in Oxidatively Stressed and Sodium Butyrate-Treated Schwann Cells	46
5.4	Seahorse Establishment on Schwann Cells	48
5.4.1	Schwann Cells Titration	48
5.4.2	FCCP Titration	49
6	Discussion	55
6.1	Effects of Sodium Butyrate on Oxidatively Stressed DRG Explants	55
6.2	Effects of Sodium Butyrate on Oxidatively Stressed SC	56
6.3	Does SB Improve SC Support and Protection of Damaged Neurons?	56
6.3.1	Does SB Influence Myelination of Axons in Embryonic DRG Co-Culture?	56
6.3.2	Does SB Influence the Gene Expression of Oxidatively Stressed SC?	57
6.4	Seahorse Establishment	60
7	Conclusion and Outlook	63
	Bibliography	65
