

Table of Contents

Session 1: Invited Talks

The Holy Grail: Finding the Genetic Bases of Phenotypic Characters . . .	1
<i>Paola Bonizzoni</i>	
Inductive Complexity of P versus NP Problem (Extended Abstract) . . .	2
<i>Cristian S. Calude, Elena Calude, and Melissa S. Queen</i>	
Advances in Embryomorphing Engineering	10
<i>René Doursat</i>	
Reasoning As Though	11
<i>Jack H. Lutz</i>	
Universality and the Halting Problem for Cellular Automata in Hyperbolic Spaces: The Side of the Halting Problem	12
<i>Maurice Margenstern</i>	

Session 2: Tutorials

An Introduction to Tile-Based Self-assembly	34
<i>Matthew J. Patitz</i>	
Spatial Computing in <i>MGS</i>	63
<i>Antoine Spicher, Olivier Michel, and Jean-Louis Giavitto</i>	

Session 3: Regular Papers

P Systems Controlled by General Topologies	70
<i>Erzsébet Csuhaj-Varjú, Marian Gheorghe, and Mike Stannett</i>	
P Systems with Minimal Left and Right Insertion and Deletion	82
<i>Rudolf Freund, Yurii Rogozhin, and Sergey Verlan</i>	
Lower Bounds on the Complexity of the Wavelength-Based Machine . . .	94
<i>Sama Goliaei and Mohammad-Hadi Foroughmand-Araabi</i>	
String Matching with Involutions	106
<i>Cristian Grozea, Florin Manea, Mike Müller, and Dirk Nowotka</i>	
Distributed Execution of Automata Networks on a Computing Medium: Introducing IfAny Machines	118
<i>Frederic Gruau and Luidnel Maignan</i>	

Symbol Representations in Evolving Droplet Computers 130
Gerd Gruenert, Gabi Escuela, and Peter Dittrich

Inductive Complexity of Goodstein’s Theorem 141
Joachim Hertel

Towards a Biomolecular Learning Machine 152
Matthew R. Lakin, Amanda Minnich, Terran Lane, and Darko Stefanovic

Tractional Motion Machines: Tangent-Managing Planar Mechanisms as Analog Computers and Educational Artifacts 164
Pietro Milici

Computing with Sand: On the Complexity of Recognizing Two-dimensional Sandpile Critical Configurations 174
J. Andres Montoya

Genome Parameters as Information to Forecast Emergent Developmental Behaviors 186
Stefano Nichele and Gunnar Tufte

Heterotic Computing Examples with Optics, Bacteria, and Chemicals 198
Susan Stepney, Samson Abramsky, Matthias Bechmann, Jerzy Gorecki, Viv Kendon, Thomas J. Naughton, Mario J. Perez-Jimenez, Francisco J. Romero-Campero, and Angelika Sebald

Reliable Node Placement in Wireless Sensor Networks Using Cellular Automata 210
Sami Torbey and Selim G. Akl

Robust Evaluation of Expressions by Distributed Virtual Machines 222
Lance R. Williams

Session 4: Posters

Numerical Evaluation of the Average Number of Successive Guesses 234
Kerstin Andersson

Discrete Discs and Broadcasting Sequences 235
Thomas Nickson and Igor Potapov

Optical Analog Feedback in *Euglena*-Based Neural Network Computing 236
Kazunari Ozasa, Jeessoo Lee, Simon Song, Mizuo Maeda, and Masahiko Hara

Gardening Cyber-Physical Systems	237
<i>Susan Stepney, Ada Diaconescu, René Doursat, Jean-Louis Giavitto,</i> <i>Taras Kowaliw, Ottoline Leyser, Bruce MacLennan, Olivier Michel,</i> <i>Julian F. Miller, Igor Nikolic, Antoine Spicher, Christof Teuscher,</i> <i>Gunnar Tufte, Francisco J. Vico, and Lidia Yamamoto</i>	
Towards a Theory of Self-constructing Automata.....	239
<i>Christian Wurm</i>	
Flower Pollination Algorithm for Global Optimization	240
<i>Xin-She Yang</i>	
Author Index	251
