

Contents

Preface	5
Contents	7-8
Timetable	10-11
1 Prolog – Is there any Chemistry Without Atoms? <i>Pieter Thyssen & Klaus Ruthenberg</i>	13
2 What is a Chemical Individual? <i>František Wald</i>	25
3 Dimitri Ivanovich Mendeleev <i>František Wald</i>	29
4 Marcelin Pierre Eugène Berthelot <i>František Wald</i>	35
5 Chemistry without Atoms: Chemie Fasi <i>Klaus Ruthenberg</i>	41
6 Franz Wald's Epistemological Deliberations <i>Richard Ehrenfeld</i>	67
7 The Epistemology of Contemporary Natural Science <i>Hans Kleinpeter</i>	81
8 Frantisek Wald's Empiricism <i>Jaap van Brakel</i>	95
9 The Atom Concept and Experience – On the Dispute between Instrumentalism and Realism <i>Michael Heidelberger</i>	113
10 Chemistry without Atoms: Ostwald's Prinzipien <i>Klaus Ruthenberg</i>	133
11 Between Manifold and Completeness – Wilhelm Ostwald on Mathematics and Form <i>Thomas Hapke</i>	157

12 Looking at the Atomic Theory from Below: Atomism in Chemical Textbooks During the 19th Century <i>Anders Lundgren</i>	179
13 Duhem's Reasons for Resisting Atomism <i>Paul Needham</i>	199
13 Mendeleev's Periodic Law and the 19th Century Debates on Atomism <i>Pieter Thyssen</i>	215
14 Dreamt vs. Beheld Reality: Frantisek Wald's Anti-Atomism as a Critical Reply to Plato's Precarious Mode of Existence of the Structural Elements of Matter Presented in the Dialogue Timaeus <i>Nikos Psarros</i>	235
15 Epilog – The Century of Abstraction <i>Brigitte Van Tiggelen & Klaus Ruthenberg</i>	247
16 Collected Bibliography	257
17 Index	277
