

<i>Presentation</i>	X
<i>Introduction</i>	XI
<i>Curricula</i>	XII

HISTOLOGIC FEATURES OF OSSEOUS TISSUE C. Dellavia • E. Canciani	2
---	----------

Introduction	3
Types of bone tissue	4
The composition of bone tissue	6
Microscopic structure of the alveolar bone	11
Bone shaping and remodeling	12
Formation of the jaw bones	14

SURGICAL ANATOMY OF THE MAXILLA AND MANDIBLE F. Fontana • R. Pistilli	18
---	-----------

Introduction	19
Chin symphysis and intraforaminal area	19
Mandibular body	21
Anterior maxilla	24
Posterior maxilla	27

BIOLOGIC FOUNDATIONS OF OSSEOINTEGRATION M. Simion	30
--	-----------

Introduction	31
Definition of osseointegration	33
Histologic and functional differences between natural teeth and osseointegrated implants	34
Periodontal and peri-implant supporting bone tissue	37
The process of osseointegration	39
Bone adaptation to mechanical stress	44
Biologic principles of osseointegration	46

SURGICAL TECHNIQUES FOR ACHIEVING OSSEOINTEGRATION M. Simion	64
--	-----------

General principles	65
Minimal surgical trauma	66
Primary implant stability	67
Healing times and loading for submerged and nonsubmerged implants	72
Secondary implant stability	73
Surgical technique	74

TREATMENT PLANNING AND THERAPY FOR COMPLETELY AND PARTIALLY EDENTULOUS PATIENTS M. Simion • M. Maglione • P. Bozzoli	82
--	-----------

Introduction	83
Diagnosis	83
Classification of totally edentulous ridges and corresponding treatment planning	86
Clinical cases 1 to 8	87
Treatment planning for partially edentulous ridges	117

GUIDED IMPLANT SURGERY

M. Beretta • C. Maiorana

126

Introduction	127
Fundamental principles of guided surgery	128
Software of guided surgery	128
Coupling systems in guided surgery	128
Protocol for guided surgery	130
Precision and accuracy of guided implant surgery	134
Fully digital, model-free protocols for guided surgery	134
Clinical cases 1 to 3	137

ALVEOLAR RIDGE PRESERVATION AND IMMEDIATE IMPLANT PLACEMENT

L. Ferrantino • A. Pispero • M. Maglione • M. Simion

152

Introduction	153
Origin of immediate implants placement	154
Healing of extraction sites	154
Implant and extraction site interaction	156
Preservation of the alveolar ridge	156
Clinical case 1	159
Risk assessment for immediate implant placement	163
Stages of implant placement	164
Clinical cases 2 to 4	170
Socket shield technique	184
Clinical case 5	191

IMMEDIATE LOADING

M. Simion • M. Maglione

198

Introduction	199
Immediate loading, early loading and delayed loading	200
Biologic foundations of loading	200
Indications for immediate loading	203
Clinical cases 1 and 2	205

SURGICAL AND PROSTHETIC COMPLICATIONS: PREVENTION, DIAGNOSIS, AND TREATMENT

M. Simion

214

Introduction	215
Complications during the first phase of surgery	215
Clinical cases 1 and 2	218
Complications between the first and the second phases of surgery	225
Prosthetic complications	230

MANAGEMENT OF INFERIOR ALVEOLAR NERVE INJURIES

F. Biglioli • F. Allevi

240

Introduction	241
Classification of nerve injuries	242
Etiopathogenesis of IAN injury	242
Clinical symptoms and diagnosis of IAN injury	243
Treatment of IAN injury	246

PATIENTS UNDERGOING ANTIPLATELET AND ANTICOAGULANT THERAPY

R. Nocini • D. De Santis

252

Introduction	253
Hemostasis	253
Primary hemostasis	254
Secondary hemostasis	255
New concept of coagulation (cell-based model)	256
Antiplatelet drugs	257
Anticoagulant drugs	258
Pharmacology	259
Operative protocols	262
Surgery in patients on antiplatelet therapy	262
Surgery in patients on VKA therapy	263
Surgery in patients undergoing NOA therapy	264
Clinical cases 1 to 8	265

BISPHOSPHONATES AND IMPLANTOLOGY

D. De Santis • P. F. Nocini

274

Introduction	275
Clinical use of bisphosphonates	276
Medication-related osteonecrosis of the jaw	277
BRONJ: bisphosphonate related osteonecrosis of the jaw	278
Dental treatment in MRONJ patients	282
Performing extractions for implant placement in patients taking biphosphonate/antiresorptives	285
Clinical cases 1 to 3	287
Treatment of BRONJ	292
New approach to the treatment of focal MRONJ	292
Management of the therapeutic window (drug holiday)	292
Clinical cases 4 and 5	293

DIAGNOSIS AND TREATMENT OF PERI-IMPLANTITIS		298
M. Simion • E. Idotta • A. Sironi		
Introduction		299
Defining peri-implant conditions		301
Peri-implant health		302
Peri-implant mucositis		303
Predisposing factors for the development of peri-implantitis		305
Clinical case 1		307
Epidemiology of peri-implantitis		310
Etiology of peri-implantitis		311
Pathogenesis of peri-implantitis		317
Histopathology of peri-implantitis		320
Diagnosis of peri-implantitis		321
Treatment of peri-implantitis		322
Clinical cases 2 to 6		332

BIOLOGIC PRINCIPLES OF THE GUIDED BONE REGENERATION		348
C. Dahlin • M. Simion		
Guided tissue regeneration		349
Development of guided bone regeneration		351
Long-term studies on GBR		357
The future of GBR		358
Clinical cases 1 and 2		360

SURGICAL TECHNIQUES FOR GUIDED BONE REGENERATION		370
M. Simion		
Introduction		371
Flap design		372
Periosteal releasing incisions		373
Choosing a membrane		376
Membrane fixation tools		380
Bone grafts and biomaterials		380
Suture techniques		388

HORIZONTAL ALVEOLAR RIDGE AUGMENTATION		394
M. Simion • S. Pieroni		
Introduction		395
One-stage regenerative techniques		396
Clinical cases 1 and 2		399
Two-stage regenerative techniques		404
Clinical cases 3 to 6		405

VERTICAL ALVEOLAR RIDGE AUGMENTATION

M. Simion

424

Introduction	425
Indications for vertical alveolar ridge augmentation	432
Clinical cases 1 to 3	435

IMPLANT TREATMENT IN ESTHETIC AREAS

M. Simion • M. Maglione

454

Introduction	455
Anatomical considerations for esthetic implants-supported restorations	456
Indices for the esthetic evaluation of implant rehabilitations	457
Restorations for single teeth	459
Restorations for adjacent edentulous sites	460
3D implant positioning	462
Clinical cases 1 to 5	467

PERI-IMPLANT SOFT TISSUE MANAGEMENT

M. Simion • G. Zucchelli

502

Introduction	503
Keratinized mucosa	503
Soft tissue interventions before implant placement	508
Interventions during the first stage of implant surgery and during submerged	509
Interventions during or after the second stage of implant surgery	511
Clinical cases 1 to 10	513
Heterologous grafts	47
Clinical cases 11 and 12	49

BONE REGENERATION WITH GROWTH FACTORS

M. Nevins • M. Camelo • M. Simion • C-Y Chen • D. M. Kim

558

Introduction	559
Bone morphogenetic protein	560
Alveolar bone preservation in extraction sites	565
Sinus grafts	565
Atrophic alveolar ridge augmentation	567
Minimally invasive horizontal ridge augmentation	570
Treatment of larger edentulous ridge defects	570
Improved osseointegration	570
Conclusions	570

SINUS FLOOR ELEVATION	582
F. Bernardello • P. Bozzoli • L. Ferrantino • M. Simion	
Introduction	583
Preoperative anatomical considerations	584
Indications for choosing a crestal or lateral technique	589
Crestal approach to sinus elevation	590
Surgical technique using sequential drills	591
Clinical case 1	595
Sinus elevation with a lateral approach	598

COMPLICATIONS OF GBR: PREVENTION, DIAGNOSIS, AND MANAGEMENT	612
M. Simion • F. Fontana	
Introduction	613
Classification of GBR complications	614
Clinical cases 1 to 3	616
Complication prevention	627
Clinical case 4	629
