1	Introduction	1
1.1	The Question of Knowledge	1
1.2	The Question of the State of Science	2
1.3	The Question of Scientificity	3
1.4	The Question of Research and Methodology	5
1.5	The Question of Discourse—Dealing with Contrary Views in Public and in Academic Work	14
1.6	The Question of Truth and Reality	15
	References	17
 Part I Economic Standard Theory and the Reasons for Its Failure in the Real World		
2	The Unsolved Deficits of the Classical Economic Standard Model and the Failure of the Theoretical Model in the Real World	21
3	Goods Market	23
3.1	General Information about the Goods Market	23
3.2	Factors Influencing the Goods Market	23
3.3	The Supply of Goods	24
3.4	The Interdependence between Production and Demand, or the “Chicken-and-Egg Problem” in Economics	26
4	Financial Market	31
4.1	Money Market	32
4.1.1	General Information about the Money Market	32
4.1.2	The Money Supply in the Money Market Theory	34
4.1.3	The Demand for Money in the Money Market Theory	34
4.1.4	Interest Rate Control by the Central Bank	35
4.1.5	The so-called Market Equilibrium in the Current Money Market Theory	36
4.1.6	The Functioning of Money Markets	36
4.1.7	The Nature of Money	38

4.1.8	Risks of Market Participants in the Money Markets	62
4.2	Capital Market	65
4.3	Foreign Exchange Market	65
4.4	Credit Market	65
	References	66
5	Labor or Service Market	67
5.1	The Misconceptions about the Labor Market in the Current Economic Model and the Consequences	68
5.2	Service Market	83

6	The Theory of the IS-LM Curve and the IS-LM Model	87
6.1	IS-Function	87
6.2	LM Function	90
6.2.1	The Demand for Money in the Goods Market Theory . . .	90
6.2.2	The Money Supply in the Goods Market Theory	93
6.2.3	The Derived LM Function	94
6.2.4	The Essential Relationships of the LM Function in Standard Theory	94
6.3	The IS-LM Model	95
6.3.1	Background of this Theory	96
6.3.2	Conclusions from the Model	98
6.3.3	Extension of the Model	99
6.3.4	The Historical Development of this Model	100
6.4	The Neoclassical Synthesis	101
6.4.1	The Model of Neoclassical Synthesis	102
6.4.2	Criticism of the Model of Neoclassical Synthesis	103
7	Fundamental Criticism of the Current Economic Standard Model	107
7.1	The Problem of Basic Assumptions in the Current Standard Economic Model	107
7.2	The Problem of Quantifiability of Factors in the Standard Economic Model	109
7.3	The Problem of Aggregates in the Standard Economic Model	110
7.4	The Problem of Distribution, Capital Accumulation, and Poverty in the Standard Economic Model	111
7.4.1	The Principle of Poverty	113
7.4.2	The Effects of Inflation	116
7.5	The Problem of Resource Allocation in Reality	119
7.6	The Problem of Unemployment	120
7.7	General Criticism of the Standard Economic Model	120
7.8	Specific Criticism of the Standard Economic Model—The Errors of Classical Economic Theory	121
	Reference	143

8	Results of the Previous Analysis	145
8.1	Historical Background and Development of the Current Standard Economic Theory	145
8.2	Today's Economic Reality in the Reflexion of an Unfounded and Inapplicable Economic Theory	147
8.3	How an Unfounded and Inapplicable Theory Causes Frictions and Disruptions in the Economic Reality	150
 Part II New Economic Theory: Evolution of Economic Theory—or Socioeconomic Revolution?		
9	The Holistic Universal View of the Economy	155
9.1	Simple Economic Model	155
9.2	Complex Economic Model	156
9.3	Universal Economic Postulates	158
10	The Components of the Economy	159
10.1	Microeconomics	159
10.2	Macroeconomics	160
10.3	The Economic Subjects (and the Effects of Their Behavior on the Functioning of the Economy)	160
10.4	The State	162
10.5	Resource Allocation vs. Resource Distribution	165
10.5.1	The Problem of Optimal Resource Allocation in Economics	166
10.5.2	The Problem of Optimal Distribution in Economics	168
11	The Real Functioning of the Economy	169
11.1	Starting Point of Economic Activity	169
11.2	The Role and Basic Function of Money	170
11.3	Circular Characteristics of the Overall Economic Process	171
11.4	Relationship between Inflation and Unemployment	172
11.5	Interaction between Money and Work	174
11.6	The New Labor Market Theory	177
11.7	The Significance of Framework Conditions	178
11.7.1	The Performance-Determining Factors of Organizational Systems	180
11.7.2	The Relationship between Organizational Structure and Economic Performance using the Example of Production in East Germany and West Germany	182
11.7.3	Competition of Economic and Organizational Systems	183
11.7.4	Changing Organizational Structures—How Transformations Work	184

12	Summary of the New Economic Theory	191
12.1	The New Economic Theory Reflects the Cutting Edge of Science.	193
12.2	The Basis of the New Economic Theory	196
12.3	The Significance of the Latest Socio-Economic and Behaviorist Findings for the New Theory	199
12.4	How the Microeconomic Basic Principles Determine the Macroeconomic Functions of Economic Theory.	205
12.5	Control Mechanisms and Control Instruments	208
12.5.1	Important Connections and Interdependencies	208
12.5.2	The Role and Impact of Media	210
12.5.3	The Connection Between Human Behavior and System Behavior	211
12.5.4	The Development and Management of Changes in a System.	214
12.5.5	The Development and Management of Crises.	214
