List of symbols xiv

Preface xv

1 Earthquakes, seismology and the VAN earthquake prediction method 1

1.1 Earthquakes: General background and history 1

1.2 Seismology in general: The theory of plate tectonics 3

1.2.1 Seiya Uyeda 4

1.2.2 Seiya Uyeda and the VAN method 6

1.3 Earthquake forecast: The VAN method 6

2 The development of the VAN research on earthquake prediction 9

2.1 How and why the VAN research started 9

2.2 The first experimental VAN network 18

3 The procedure for the measurements: The telemetric VAN network and how the epicenter and magnitude are predicted 21

3.1 The methodology of measurements 21

3.2 The installation and operation of the telemetric network 22

3.3 Sensitive and nonsensitive sites 24

3.4 The selectivity of a sensitive station 27

3.5 How the magnitude, epicenter and time of an expected earthquake is predicted 29

3.6 The desired accuracy in a prediction 34

| | | |
|-----------|--|-----|
| 4 | First international evaluation of VAN, 1984 | 37 |
| 4.1 | The first unsuccessful attempts to evaluate VAN (late 1983–early 1984) | 37 |
| 4.2 | International Scientific Meeting, Athens, November 1984 | 38 |
| 4.3 | The impact of the international meeting, November 1984 | 42 |
| 5 | Two powerful earthquakes, 1986 | 47 |
| 5.1 | The 6.1 earthquake in an aseismic region in the central Aegean Sea | 47 |
| 5.2 | The 6.2 earthquake in Kalamata, 13 September 1986 | 53 |
| 6 | Disastrous earthquakes in Killini-Vartholomio, 1988 | 59 |
| 6.1 | Introduction | 59 |
| 6.2 | What happened before the earthquakes | 60 |
| 6.3 | After the 6.0 main shock | 64 |
| 7 | The French interest in VAN | 67 |
| 7.1 | Professor Haroun Tazieff and the French interest in VAN (1986–1989) | 67 |
| 7.2 | The interruption of the VAN network | 74 |
| 8 | Second International Evaluation of VAN, 1990 | 81 |
| 8.1 | The organization of the International Conference | 81 |
| 8.2 | The conclusion of the Conference | 83 |
| 8.3 | Scientists' responses to questions from the press | 86 |
| 8.4 | The electric power to the VAN network is switched off | 93 |
| 8.5 | The impact of the Conference abroad | 95 |
| 9 | Disastrous earthquakes in Pirgos, 1993: The public warning | 99 |
| 9.1 | Events prior to the earthquakes | 99 |
| 9.2 | Events on the eve of and immediately after the Pirgos main shock | 104 |
| 10 | Third international evaluation of VAN, 1992, 1995 | 107 |
| 11 | The United Nations recommendation on VAN, 1994 | 113 |
| 12 | VAN evaluations, 1995, 1996 | 117 |
| 12.1 | The International Meeting at the Royal Society of London, 1995 | 117 |
| 12.2 | Special issue of <i>Geophysical Research Letters</i> (American Geophysical Union) entitled "Debate on VAN", 1996 | 121 |
| 13 | Earthquake at Chalkidiki, 1995: The success of the prediction | 125 |
| 14 | Earthquake in Grevena-Kozani, 1995 | 129 |
| 14.1 | What happened before and immediately after the earthquake | 129 |
| 14.2 | What the international scientific community said after the earthquake | 132 |

| | | |
|-----------|--|-----|
| 15 | Disastrous earthquake at Eratini-Egion, 1995 | 137 |
| 15.1 | The earthquake and its prediction | 137 |
| 15.2 | What countermeasures did the State take after receiving the prediction? | 143 |
| 16 | The International Prize of the Onassis Foundation, 1995 | 147 |
| 17 | Disastrous Athens earthquake, 1999 | 155 |
| 17.1 | The preseismic signals recorded | 155 |
| 17.2 | The earthquakes that followed the preseismic signals | 157 |
| 18 | A new concept of time and its applications: Natural time | 159 |
| 18.1 | The need for a different view on time | 159 |
| 18.2 | What is natural time? | 160 |
| 18.3 | How to determine the time of a forthcoming earthquake | 162 |
| 18.4 | Using natural time to analyze electrocardiograms | 164 |
| 19 | Earthquake in the northern Aegean Sea, 2001 | 165 |
| 20 | Publicizing predictions: Changes from 2006 | 169 |
| 21 | Earthquake in southwestern Greece, 2008 | 173 |
| 21.1 | What happened before this earthquake | 173 |
| 21.2 | The preseismic signals and how they were publicized in advance | 174 |
| 21.3 | The two 5.5 earthquakes in previously inactive faults near Patras | 174 |
| 21.4 | The 6.9 and 6.5 earthquakes in southwestern Greece | 177 |
| 21.5 | The international impact of the prediction | 178 |
| 22 | Earthquake between Patras and Pirgos, 2008 | 181 |
| 22.1 | What happened before the earthquake | 181 |
| 22.2 | What happened after the earthquake | 186 |
| 22.3 | The impact of our prediction abroad | 187 |
| 22.4 | The extent of the destruction caused by the earthquake of 8 June 2008 | 188 |
| 22.5 | Has our decision to publicize forecasts changed after the earthquake of 8 June 2008? | 189 |
| 23 | The VAN earthquake prediction method in other countries: Current views | 191 |
| 23.1 | Japan | 191 |
| 23.2 | The USA | 194 |
| 23.3 | China | 196 |
| 23.4 | Russia | 198 |
| 23.5 | Mexico | 199 |
| 23.6 | Italy | 200 |
| 23.6.1 | Collaboration with Mexico | 201 |
| 23.7 | France | 201 |
| 23.8 | Concluding remark | 202 |

| | |
|---|-----|
| Appendix | 203 |
| Quantities calculated in natural time analysis. What happened before the Japanese super-giant 9.0 earthquake in 2011 | 203 |
| A.1 Calculation of the mean value and the variance of natural time χ weighted by normalized energy release..... | 203 |
| A.2 Usefulness of the variance κ_1 of natural time to identify the occurrence time of an impending main shock | 204 |
| A.3 Using natural time analysis to identify upcoming earthquakes in the USA | 205 |
| A.4 What happened before the super-giant 9.0 earthquake in Japan in 2011 | 207 |
