

Table of contents

List of abbreviations	13
1 Introduction	15
1.1 Why Individuality?	15
1.2 Literature Review	17
1.3 Scope and Research Questions	21
2 Materials and Methods	23
2.1 Source Discussion and Research Methodology	23
3 A Career in Biochemistry	29
3.1 Upbringing and Education in Biochemistry	29
3.2 Academic Networks	31
4 Origins of Biochemical Individuality as a Concept	39
4.1 Youthful Observations	39
4.2 “The Vitamine Requirement of Yeast”	40
4.3 Adverse Drug Reaction	42
4.4 Yeast Extract Research	44
4.5 “‘Taste Deficiency’ for Creatine”	47
4.6 Biochemical Individuality Before 1940	50
4.7 Conclusion	50
5 Vitamin Studies	51
5.1 Individuality of Yeast Strains	52
5.2 The Vitamin Content of Tissues	54
5.3 Practical Applications of Vitamin Research	59
5.4 <i>What to Do About Vitamins</i>	65

5.5	Biochemical Individuality Preceding <i>The Human Frontier</i>	69
5.6	Conclusion	69
6	The Human Frontier	71
6.1	“Humanity Must Understand Itself”	72
6.2	Audience	74
6.3	Social Control	88
6.4	“Distinctive Metabolic Traits”	90
6.5	“Individuals Vary Greatly”	96
6.6	Reviews of <i>The Human Frontier</i>	102
6.7	Biochemical Individuality Following <i>The Human Frontier</i>	108
6.8	Conclusion	108
7	The Scientific Study of Individuals and Alcoholism	109
7.1	“Biochemical Individuality and Its Implications”	109
7.2	“The Etiology of Alcoholism”	127
7.3	“Alcoholics and Metabolism”	130
7.4	<i>An Introduction to Biochemistry</i> , Second Edition	132
7.5	Anti-Communist Sentiment	137
7.6	Symposium and Society	139
7.7	Biochemical Individuality in 1949	144
7.8	Conclusion	144
8	Genetotrophic Disease	145
8.1	The Metabolic Individualities of Rats	145
8.2	Collaborative Individuality	150
8.3	Genetotrophic Promotion	152
8.4	Biochemical Individuality Following the Genetotrophic Principle	153
8.5	Conclusion	154

9	Human Individuality	155
9.1	Biochemical Individuality V	155
9.2	Of Marbles and Men	157
9.3	<i>Nutrition and Alcoholism</i>	159
9.3.1	Evidence	160
9.3.2	Supplementation	162
9.3.3	Appeal	163
9.3.4	Promotion and Reviews of <i>Nutrition and Alcoholism</i>	164
9.3.5	Summary	167
9.4	Biochemical Institute Studies	167
9.5	Biochemical Individuality Following First Human Research	170
9.6	Conclusion	170
10	Free and Unequal	171
10.1	Simple Yet Profound	171
10.2	Signatures	173
10.3	Politicisation	173
10.3.1	Communism and Racism Revisited	174
10.3.2	Assembly Line Educations, Regimentation, and Dogma	181
10.4	Reviews of <i>Free and Unequal</i>	183
10.5	Biochemical Individuality Following <i>Free and Unequal</i>	184
10.6	Conclusion	185
11	Practical Genetotrophism	187
11.1	Genetotrophic Supplementation	187
11.2	Cancer	188
11.3	Individual Anatomies and Compositions	189
11.4	Chemical Anthropology	192
11.5	Normal Young Men	193

11.6	The Concept of Biochemical Individuality Before <i>Biochemical Individuality</i>	194
11.7	Conclusion	194
12	Biochemical Individuality	195
12.1	Evidence	203
12.1.1	From Basic Genetics to All-Encompassing Variation	206
12.2	Variation and Its Significance	207
12.3	Resistance and Publishing Difficulties	210
12.4	Reviews of <i>Biochemical Individuality</i>	211
12.5	Appreciation Through the Years	214
12.6	Biochemical Individuality in Its Final Form	214
12.7	Conclusion	214
13	Results	215
14	Discussion	221
15	Summary	235
16	Annex	239
16.1	Interview with Donald R. Davis	239
17	List of figures	245
18	List of tables	249
19	References	251
19.1	Unpublished Materials	251
19.2	Published Materials	260
20	Index	287
21	Acknowledgments	289
