1	Thermoelectric Power Generators and Their Applications	1
	<i>Jianxu Shi and Ke Wang</i>	
1.1	Introduction	1
1.2	Principles of Thermoelectric Conversion	1
1.2.1	Seebeck Effect	1
1.2.2	Peltier Effect	2
1.2.3	Thomson Effect	3
1.2.4	Evaluation Indicators for Thermoelectric Materials and Devices	3
1.3	Thermoelectric Materials	4
1.3.1	Traditional Thermoelectric Materials	4
1.3.2	Half-Heusler Alloys	6
1.3.3	2D Thermoelectric Materials	7
1.3.4	Thermoelectric Liquid Materials	9
1.4	Preparation of Thermoelectric Materials	10
1.5	Thermoelectric Devices and Their Applications	15
1.5.1	Conventional Devices	15
1.5.2	Miniature Devices	16
1.5.3	Flexible Devices	18
1.6	Conclusions and Outlook	20
	Acknowledgment	20
	References	20
2	Application of Nanomaterials in Organic Solar Cells	27
	<i>Tongsiliu Wu</i>	
2.1	Introduction	27
2.1.1	Background	27
2.1.2	Mechanisms and Structure of OSCs	28
2.1.3	Advantages of Adding Nanomaterials	30
2.2	Application of Carbon Materials in OSCs	33

2.2.1	Allotropes of Carbon Materials	33
2.2.2	Carbon Nanotubes	34
2.2.3	Graphene	36
2.2.4	Fullerene Receptors and Non-fullerene Receptors	38
2.3	Application of Silver Nanowire-based Nanoarrays in OSCs	43
2.3.1	Influence of Nanomicrostructure	43
2.3.2	Silver Nanowires	45
2.4	Emerging Trends and Future Outlook	47
2.5	Conclusions	48
	References	48
3	Advances in Low-temperature Na-ion Battery Energy Storage	55
	<i>Meng Li, Kuan Wang, Qihang Jing, Xuan Yang, Chenxiang Li, Zhou Liao, Dongsheng Geng, and Biwei Xiao</i>	
3.1	Introduction	55
3.2	LT NIB Cathode Materials	56
3.2.1	Polyanion	57
3.2.2	Layered TMO	59
3.2.3	Prussian Blue and Its Analogues	62
3.3	LT NIB Anode Materials	63
3.3.1	Interleaved Reaction Storage Na Negative Electrode	64
3.3.2	Alloyed Na Storage Anode	66
3.3.3	Transformation-type Na Storage Negative Electrode	68
3.4	LT Organic Electrolyte Research	70
3.4.1	LT Solvent Exploration	71
3.4.2	Selection of Electrolyte Salts	73
3.4.3	Electrolyte Additives	75
3.5	Summary and Outlook	77
	References	79
4	Thermochemical Energy Storage for Renewable Solar Energy Utilization	89
	<i>Ruolan Hu, Lihui Zhang, Wei Deng, Bo Tong, and Yong Zhao</i>	
4.1	Introduction	89
4.2	Materials/Chemical Reactions and Systems for TCES Technology	91
4.2.1	Gas-Gas TCES Materials/Reactions and Systems	92
4.2.1.1	Organics Reforming, Decomposition and Gasification	92
4.2.1.2	Ammonia Synthesis/Dissociation	95
4.2.1.3	Sulfur-based Reactions	96
4.2.2	Solid-Gas TCES Materials/Reactions and Systems	97
4.2.2.1	Carbonates Calcination/Carbonation	97
4.2.2.2	Hydroxides Dehydration/Hydration	101
4.2.2.3	Metal Hydrides Dehydrogenation/Hydrogenation	104
4.2.2.4	Metal Oxides Oxidation/Reduction	107

- 4.2.3 Liquid-Gas TCES Materials/Reactions and Systems 111
 - 4.2.3.1 Isopropanol Dehydrogenation/Hydrogenation 111
 - 4.2.3.2 Ammonium Hydrogen Sulfate Synthesis/Dissociation 112
- 4.3 Solar Receivers/Reactors for TCES Systems 112
 - 4.3.1 Gas-Gas TCES Receivers/Reactors 113
 - 4.3.1.1 Solar Methane Reforming Receivers/Reactors 113
 - 4.3.1.2 Solar Methane Decomposition Receivers/Reactors 118
 - 4.3.1.3 Solar Ammonia Dissociation/Synthesis Receivers/Reactors 120
 - 4.3.1.4 Solar Sulfur-based Cycle Receivers/Reactors 123
 - 4.3.2 Solid-Gas TCES Receivers/Reactors 124
 - 4.3.2.1 Fixed/Packed Bed Receivers/Reactors 124
 - 4.3.2.2 Fluidized Bed Receivers/Reactors 129
 - 4.3.2.3 Moving Bed Receivers/Reactors 131
- 4.4 Conclusion 135
- Acknowledgment 137
- Conflict of Interest 137
- References 137

- 5 Recent Progress in Triboelectric Nanogenerators and New Challenges 161
 - Rong Xue and Xiaojia Wei
 - 5.1 Introduction 161
 - 5.2 Recent Research on Potential Mechanism and Four Working Modes of TENG 162
 - 5.2.1 Recent Research on Potential Mechanism 162
 - 5.2.2 CS Mode 163
 - 5.2.3 LS-Mode 165
 - 5.2.4 SE-Mode 168
 - 5.2.5 FT-mode 171
 - 5.3 Conclusion 174
 - Conflict of Interest 174
 - References 174

- 6 Wind Turbine Blades in Wind Power Generation: Manufacturing, Recovery and Reuse 181
 - Zichun Feng, Chunbao Du, Bingjia Wang, Baoli Li, and Gang Zhang
 - 6.1 Introduction 181
 - 6.2 Recycling of Waste WTBs 182
 - 6.2.1 Manufacturing of WTBs 183
 - 6.2.2 Burial and Incineration 183
 - 6.2.3 Physical Recovery Method 184
 - 6.2.4 Chemical Recovery Methods 184
 - 6.2.4.1 Supercritical Fluid Degradation Method 184
 - 6.2.4.2 Solvent Dissolution Method 186
 - 6.2.5 Thermal Recovery Methods 187

10.2.2.3	Carbon Materials	290
10.3	Chemical Conversion of CO ₂ into Fuels	292
10.3.1	CO ₂ Conversion into Fuels by Catalytic Hydrogenation	293
10.3.2	CO ₂ Conversion into Fuels by Photocatalysis	295
10.3.3	CO ₂ Conversion into Fuels by Electrocatalysis	297
10.4	Conclusions	299
	Acknowledgment	299
	Conflict of Interest	299
	References	299
	Index	307
