Foreword xv

Preface xvii

1	A Bibliometric Analysis on the Application of Biopolymers in Water Purification	1
	<i>Fabiula D.B. de Sousa and Júlia R. Gouveia</i>	
1.1	Introduction	1
1.2	Methodology	2
1.3	Results	2
1.3.1	Bibliometric Analysis	2
1.3.1.1	Sources	2
1.3.1.2	Authors, Affiliations, and Countries	3
1.3.1.3	Publications	6
1.3.1.4	Keywords	7
1.4	Conclusions	13
	References	14
2	Extraction of Biopolymers from Nature and Their Characterization	25
	<i>Ayşe Kalemtaş, Gulsum Aydın, Aslıhan Kurt-Kızıldoğan, and Gulsum Topates</i>	
2.1	Introduction	25
2.2	Production of Animal-Derived Biopolymers	27
2.2.1	Polysaccharides	30
2.2.1.1	Hyaluronan (Hyaluronic Acid)	30
2.2.1.2	Chitin and Chitosan	31
2.2.1.3	Heparin	32
2.2.1.4	Glycogen	32
2.2.2	Proteins	33
2.2.2.1	Collagen	33
2.2.2.2	Gelatin	34
2.2.2.3	Keratin	35
2.2.3	Oils	36
2.2.3.1	Beeswax	36
2.3	Production of Bacteria-Derived Biopolymers	37

2.3.1	Polyhydroxyalkanoates	37
2.3.2	Bacterial Nanocellulose	42
2.3.3	Microbial Exopolysaccharides	45
2.4	Production of Plant-Derived Biopolymers	46
2.4.1	Cellulose	46
2.4.2	Starch	49
2.4.3	Lignin	50
2.4.4	Natural Rubber	52
2.5	Production of Algae-Derived Biopolymers	52
2.5.1	Alginate	54
2.5.2	Carrageenan	54
2.6	Characterization of Biopolymers	55
2.6.1	Optical Microscopy	56
2.6.2	Scanning Electron Microscopy	56
2.6.3	Atomic Force Microscopy	57
2.6.4	Transmission Electron Microscopy	58
2.6.5	Thermogravimetric Analysis	60
2.6.6	Differential Scanning Calorimetry	62
2.6.7	Fourier Transform Infrared Spectroscopy	63
2.6.8	Raman Spectroscopy	64
2.6.9	Nuclear Magnetic Resonance	65
2.6.10	Atomic Absorption Spectrometry	67
2.6.11	X-ray Diffraction	68
2.6.12	CHNS-O Analysis	70
2.6.13	Mechanical Properties	70
2.7	Conclusion	71
	References	72
3	Synthesis of Biopolymers and Characterization	91
	<i>Dilipkumar Pal and Supriyo Saha</i>	
3.1	Introduction	91
3.2	Biopolymer: Source and Types	93
3.3	Biopolymers Used in the Treatment of Water Pollution: Synthesis and Characterization	94
3.3.1	Chitosan in the Treatment of Water Pollution	94
3.3.2	Selenide–Chitosan Microsphere in the Treatment of Water Pollution	94
3.3.3	Magnetic Phosphorylated Chitosan Composite in the Removal of Cobalt from Water	95
3.3.4	Magnetic Chitosan Bead Used in the Removal of Arsenic from Water	95
3.3.5	Chitosan–Clay Composite in the Treatment of Water Pollution	96
3.3.6	Chitosan Bead in the Removal of Molybdate Ion from Contaminated Ground Water	97
3.3.7	Chitosan Chloride–Graphene Oxide Composite Modified Quartz for the Treatment of Polluted Water	97

3.3.8	Fungal Chitosan in the Purification of Polluted Water	98
3.3.9	Gum Arabic in the Treatment of Organic Waste from Polluted Water	98
3.3.10	Gelatin–Beta Cyclodextrin Adsorbent in the Treatment of Wastewater	100
3.3.11	Gelatin Infused with Chitosan/Polyethyleneimine for the Treatment of Water Pollution	100
3.3.12	Kappa Carrageenan–Graphene Oxide Composite in the Treatment of Water Pollution	101
3.3.13	Lignin Polymeric Particles in the Removal of Virus from Water	102
3.3.14	Polyelectrolyte Layered Cellulose in the Removal of Bacteria from Water	102
3.3.15	Cellulose–Polyaniline–Silver Nanocomposite Fused Fiber in the Treatment of Water Pollution	103
3.3.16	Polycaprolactone–Nanocellulose Fiber in the Removal of Heavy Metals from Polluted Water	103
3.3.17	Cellulose–Metallothionein Biosorbent in the Treatment of Polluted Water	104
3.3.18	Magnetic–Carboxylated Cellulose/Starch Composite in the Treatment of Polluted Water	104
3.4	Conclusion and Future Scope	105
	References	106
4	Importance of Water and Water Quality	109
	<i>Gaurav Awasthi, Manu Sharma, and Pawan Kumar</i>	
4.1	Introduction	109
4.1.1	Overview	109
4.1.2	Problems Related to Water	109
4.1.3	Solutions to Water Problem	112
4.2	Quality Measure for Water	113
4.2.1	Physical Contaminants	114
4.2.2	Biological Contaminants	114
4.2.3	Chemical Contaminants	115
4.2.3.1	Inorganic Contaminants	115
4.2.3.2	Organic Contaminants	116
4.2.3.3	Miscellaneous Contaminants	118
4.3	Role of Materials to Maintain Water Quality	118
4.3.1	Role of Biopolymers	119
4.4	Challenges and Future Perspective	123
4.5	Conclusion	125
	References	125
5	Microcellulose Membranes for Water Purification	137
	<i>Turup P. Mohan and Krishnan Kanny</i>	
5.1	Introduction	137

5.2	Water Purification	138
5.3	Filtration	139
5.4	Nanofiltration Process	139
5.5	Ultrafiltration Process	140
5.6	Reverse Osmosis	141
5.7	Reverse Osmosis versus Nanofiltration Membrane Process	142
5.8	Distillation	142
5.9	Chlorination	143
5.10	Polymer	144
5.11	Cellulose	145
5.12	Tissue Engineering	147
5.13	Barrier Properties	148
5.14	Membrane Technology	148
5.15	Membrane Filtration	149
5.16	Membrane Processing	150
5.17	Conclusions	151
	Acknowledgment	152
	References	152
6	Nanocellulose and Their Composite Membranes for Water Purification	157
	<i>Tian Mai, Pei-Lin Wang, Lei Chen, and Ming-Guo Ma</i>	
6.1	Introduction	157
6.2	Nanocellulose	158
6.3	Cellulose Nanofibrils and Their Composite Membranes for Water Purification	162
6.4	Cellulose Nanocrystals and Their Composite Membranes for Water Purification	166
6.5	Bacterial Cellulose and Their Composite Membranes for Water Purification	169
6.6	Conclusions and Prospects	173
	Acknowledgments	174
	References	175
7	Lignin Polymers for Water Treatment	181
	<i>Júlia R. Gouveia and Fabiula D.B. de Sousa</i>	
7.1	Introduction	181
7.1.1	Lignin Structure	182
7.1.2	Lignin-Based Polymers for Water Treatment	183
7.1.2.1	Cationic Lignin-Based Polymers	183
7.1.2.2	Anionic Lignin-Based Polymers	185
7.1.2.3	Lignin-Based Polymers with Dual Action	189
7.1.2.4	Lignin-Based Thermoplastics for Water Treatment	191
7.1.3	Lignin-Based Nanoparticles for Water Treatment	195

- 7.1.4 Lignin-Based Membranes for Water Treatment 199
- 7.1.5 Lignin-Based Hydrogels for Water Treatment 202
- 7.2 Conclusions 204
- List of Abbreviations 205
- References 206

- 8 Use of Cellulosic Material and Natural Fibers in Wastewater Treatment 211**
Gabriela Y. Romero-Zúñiga, Roberto Yáñez-Macías, Israel Sifuentes-Nieves, Zureima García-Hernández, Yucundo Mendoza-Tolentino, Pablo González-Morones, and Ernesto Hernández-Hernández
- 8.1 Introduction 211
- 8.2 Cellulosic Materials (CMs) and Natural Fibers (NFs) 212
 - 8.2.1 Characterization 213
 - 8.2.1.1 Chemical Composition 214
 - 8.2.1.2 Morphology and Crystalline Structure 214
 - 8.2.1.3 Physical-Mechanical Properties 218
 - 8.2.1.4 Thermal Properties 220
 - 8.3 Use of MCs and NFs in Water Purification 222
 - 8.3.1 Heavy Metals Purification 224
 - 8.3.2 Dyes/Colorants 225
 - 8.3.3 Organic/Inorganic Material 227
 - 8.3.4 Oils/Hydrocarbons 228
 - 8.4 Mechanisms of Contaminant Absorption 231
 - 8.4.1 Absorption of Heavy Metals and Industrial Dyes 232
 - 8.4.2 Organic and Inorganic Compounds 233
 - 8.4.3 Oils and Hydrocarbons 234
 - 8.5 Adaptation and Modification of CMs and NFs for Application in Water Purification 235
 - 8.5.1 Physical and Chemical Modifications 235
 - 8.5.1.1 Esterification 237
 - 8.5.1.2 Oxidation 237
 - 8.5.1.3 Halogenation 237
 - 8.5.1.4 Etherification 238
 - 8.5.1.5 Graft Copolymerization 238
 - 8.5.2 Morphological Characteristics 240
 - 8.5.3 Devices Manufactured with CMs and NFs for Their Application in Water Purification 241
 - 8.5.4 Characterization and Evolution of the Performance of CMs and NFs as Water Purifiers 242
 - 8.6 Selection of the Stage of Water Treatment at Which the CMs and NFs Will Be Applied 243
 - 8.7 Conclusion 244
 - References 245

9	Starch Polymers: Their Blends, Gels, and Composites	
	Membranes for Water Purification	275
	<i>Alana G. de Souza, Rafaela R. Ferreira, Danrlei F. Alves, Derval S. Rosa, and Vania Z. Pinto</i>	
9.1	Introduction	275
9.2	Water Contamination	276
9.3	Water Treatment	278
9.4	Starch in Water Treatments	280
9.4.1	Contaminants Flocculation Using Starch	282
9.4.2	Starch Membranes	283
9.4.3	Starch Sorbents	285
9.4.4	Starch Nanoparticles and Nanocrystals	287
9.4.5	Hydrogels	288
9.4.6	Aerogels	290
9.5	Future Perspectives	291
	References	292
10	Chitosan Polymers: Their Blends, IPNs, Gels, and Composites	
	Membranes for Water Purification	301
	<i>Svetlana Jovanovic and Dejan Kepic</i>	
10.1	Chitosan – Structure and Properties	301
10.2	Chitosan with Carbon-Based Nanomaterials for Water Purification	304
10.2.1	Chitosan-CNT Composites for Water Purification	306
10.2.2	Chitosan-G (GO) Composites for Water Purification	312
10.3	Chitosan Blends with Polymers for Water Purification	315
10.4	Chitosan IPN and Chitosan Gel for Water Purification	318
10.5	Chitosan Composite Membranes for Water Purification	322
10.6	Conclusion	324
	Acknowledgments	324
	References	325
11	The Production of Chitin, Nanochitin Polymers, and Their	
	Composite Membranes for Water Purification	341
	<i>Jonas J. Perez Bravo, Laura D. Pilato, Gabriel I. Tovar, Federico J. Wolman, and Guillermo J. Copello</i>	
11.1	Introduction	341
11.2	Chitin Material Development	343
11.2.1	Chitin Nanoparticle and Nanostructured Composite Production	343
11.2.2	Processing of Chitin Nano-objects	344
11.2.2.1	Acid Hydrolysis	344
11.2.2.2	TEMPO-Mediated Oxidation	345
11.2.2.3	Ionic Liquid	345
11.2.2.4	Deep Eutectic Solvents (DESS)	346
11.2.2.5	High Pressure	346
11.2.2.6	Solvent Casting	347

- 11.2.3 Processing of Chitin Nanostructured Materials 347
 - 11.2.3.1 Electrospinning 348
 - 11.2.3.2 Ionic Liquid 348
 - 11.2.3.3 CaCl₂/Methanol 349
 - 11.2.3.4 N,N-Dimethylacetamide(DMAc)/LiCl 349
 - 11.2.3.5 NaOH/Urea 350
 - 11.2.3.6 Solvent Casting 350
- 11.3 Chitin Materials for Pollutant Removal by Adsorption Processes 350
- 11.4 Chitin Materials for Pollutant Removal by Degradation Processes 358
- 11.5 Conclusions 361
- References 362

- 12 Polysaccharide-Based Water Purifying Materials 371**
Aldrin P. Bonto, Jose P. Bantang, Melvir Sucaldito, Michaela O.S. Lobregas, Francis M. dela Rosa, Feiyang Wang, and Cédric Delattre
 - 12.1 Introduction 371
 - 12.2 Starch, Its Functional Derivatives, and Composites for Water Purification Process 372
 - 12.2.1 Chemically Modified Starch by Regiochemical Functionalization and Grafting for Water Treatment and Purification 372
 - 12.2.2 Modified Starch Composites for Water Purification 377
 - 12.2.3 Alternative Approaches in Improving Starch for Water Treatment 378
 - 12.3 Chitosan 379
 - 12.3.1 Chemical Modification of Chitosan 380
 - 12.3.2 Chitosan-Based Composites for Water Purification 383
 - 12.4 Seaweed-Derived Polysaccharides 388
 - 12.4.1 Chemical Modification of Seaweed-Derived Polysaccharides 391
 - 12.4.2 Seaweed-Derived Polysaccharide Composites 394
 - 12.5 Pectin and Gum Polysaccharides 395
 - 12.5.1 Chemically Modified Pectin and Gum Polysaccharides 397
 - 12.5.2 Pectin/Gum Polysaccharide Gum Composites 401
 - 12.6 Conclusions and Future Research Outlooks 403
 - List of Abbreviations 403
 - References 404

- 13 Biocatalytic Membrane for Seawater Purification 421**
Wenxiang Zhang, Mingming Hu, Shaoqiang Nie, and Tugui Yuan
 - 13.1 Introduction 421
 - 13.2 Types and Properties of Enzymes 423
 - 13.2.1 Laccase 423
 - 13.2.2 Tyrosinase 423
 - 13.2.3 Catalase 424
 - 13.3 Preparation Method of Biocatalytic Membrane 424
 - 13.3.1 Entrapment Method 424
 - 13.3.2 Cross-linking Method 425

- 13.3.3 Covalent Bonding 425
- 13.3.4 Physical Adsorption Method 426
- 13.4 Application of Biocatalytic Membrane 426
 - 13.4.1 Agricultural Food 426
 - 13.4.2 The Medicine Application 427
 - 13.4.3 Seawater Treatment 427
- 13.5 Challenges and Applications of Biocatalytic Membrane 429
 - 13.5.1 Application of Dopamine in Membrane Modification and Enzyme Immobilization 429
 - 13.5.1.1 Dopamine Properties 429
 - 13.5.2 Application of Dopamine in Membrane Modification 430
 - 13.5.2.1 Membrane Hydrophilicity Enhancement 431
 - 13.5.2.2 The Membrane Antifouling Ability Improvement 431
 - 13.5.3 Application of Dopamine in Enzyme Immobilization 431
 - 13.5.3.1 Dopamine Used in Immobilization of Laccase 432
 - 13.5.4 Application of Dopamine for Alcohol Dehydrogenase Immobilization 432
 - 13.5.5 Opportunities and Challenges 434
- 13.6 Conclusions 434
- Acknowledgments 434
- References 434

- 14 Biopolymer-Coated Nanoparticles for Water Purification 439**
Hebatullah H. Farghal, Marianne Nebsen, Amani Mostafa, and Mayyada M.H. El-Sayed
 - 14.1 Introduction 439
 - 14.2 Synthesis of the Biopolymer-Coated Nanoparticles 440
 - 14.2.1 Biopolymer-Coated Iron Oxide Nanoparticles 440
 - 14.2.2 Biopolymer-Coated Metal Oxide Nanoparticles 442
 - 14.3 Characterization of Biopolymer-Coated Nanoparticles 443
 - 14.3.1 X-ray Diffraction (XRD) Analysis 443
 - 14.3.2 Thermogravimetric Analysis (TGA) 444
 - 14.4 Biopolymer-Coated Nanoparticles in Water Treatment 444
 - 14.4.1 Removal of Heavy Metals 444
 - 14.4.2 Removal of Dyes 447
 - 14.4.3 Removal of Contaminants of Emerging Concern (CECs) 449
 - 14.5 Conclusion 457
 - Abbreviations 458
 - References 459

- 15 Modification of Cellulose for Preparing Hydrogels and Removing Metals in Contaminated Water 465**
Jéssica S. Rodrigues, André M. Senna, and Vagner R. Botaro
 - 15.1 Introduction 465
 - 15.2 Modification of Cellulose for Preparing Hydrogels 466

15.2.1	N-methylmorpholine- <i>N</i> -oxide (NMMO) System	466
15.2.2	Ionic Liquids (ILs) System	467
15.2.3	Alkali/Urea or Thiourea Aqueous Systems	467
15.2.4	Bacterial Cellulose (BC) Hydrogels	467
15.3	Hydrogels Derived from Cellulose Acetate as a Source of Raw Material	469
15.4	The Diversity of Applications	474
15.4.1	Removing Metals and Radioactive Compounds from Contaminated Water	477
15.4.2	Removal of Organic Contaminants, Oils, and Dyes from Contaminated Water	478
15.4.3	New Applications Involving Hydrogels in Evaporators and Hydrogen Production	480
15.5	Final Consideration	481
	References	482
	Index	489
