Acknowledgements	ii
List of employed symbols and notations	iv
Abstract	viii
Kurzfassung	x
1 Introduction	1
1.1 Motivation	1
1.2 Aims	3
1.3 Frame conditions	4
1.4 Structural outline	4
2 Current state of knowledge	7
2.1 Organ pipe properties	7
2.2 Tube physics	19
2.3 Literature on organ pipes	36
2.4 Summary	46
3 Mouth tone travel inside the resonator	48
3.1 The onset	48
3.2 Summary	58
4 Roughness in organ pipe sound	59
4.1 Analysis of the roughness	59
4.2 Ruled out mechanisms	64
4.3 Hypothesis of frequency comb generation	66
4.4 Summary	77
5 Impulse measurements of tube end reflections	79
5.1 Work environment	80
5.2 One-sided radial opening	90
5.3 Symmetrical radial opening	117
5.4 Axial side opening	126
5.5 Mouth of a pipe model	138
5.6 Summary	143
6 Overall summary and conclusions	144
6.1 Summary	144
6.2 Conclusions	147
Bibliography	149
Appendix	156
