Preface *xiii*

1	The Palladium/Norbornene-Catalyzed Annulation Chemistry: Rapid Access to Diverse Ring Structures	1
	<i>Mark Lautens and Xavier Abel-Snape</i>	
1.1	Introduction	1
1.2	Intramolecular Cyclizations	3
1.2.1	Electrophile Tethered to Terminating Reagent	3
1.2.1.1	<i>Ortho</i> Alkylation	3
1.2.1.2	<i>Ortho</i> Arylation	8
1.2.1.3	<i>Ortho</i> Acylation	11
1.2.1.4	<i>Ortho</i> Amination and <i>Ipso</i> Heck Termination	14
1.2.1.5	<i>Ortho</i> Alkenylation and <i>Ipso</i> Amination via Reversal of Regioselectivity	15
1.2.1.6	Pd(II)-Initiated Annulations	16
1.2.2	Aryl Halide Tethered to Terminating Reagent	17
1.2.2.1	<i>Ortho</i> Alkylation, <i>Ortho</i> Arylation and <i>Ortho</i> Amination	17
1.2.3	Aryl Halide Tethered to Electrophile	17
1.2.3.1	<i>Ortho</i> Alkylation	17
1.2.4	Aryl Halide Tethered to Electrophile and Terminating Reagent	19
1.2.4.1	<i>Ortho</i> Alkylation	19
1.3	Intermolecular Cyclizations Following Intermolecular <i>Ortho</i> Functionalization	21
1.3.1	<i>Ortho</i> Arylation	21
1.3.1.1	<i>Ipso</i> Alkyne Insertion and <i>Ipso</i> Formal Benzyne Insertion	21
1.3.2	<i>Ortho</i> Amination	22
1.3.2.1	<i>Ipso</i> Alkyne Insertion	22
1.4	Cyclizations with Three-Membered Heterocycles as Both the Electrophile and Terminating Reagent	22
1.4.1	2 <i>H</i> -Azirines	23
1.4.2	Aziridines	24
1.4.3	Epoxides	25
1.5	Norbornene/Norbornadiene-Integrated Cyclizations	25

1.5.1	Norbornene	25
1.5.2	Norbornadiene	27
1.6	One-Pot Postcatalytic Intramolecular Cyclizations	29
1.6.1	Postcatalytic Intramolecular Michael Additions	29
1.6.1.1	<i>Ortho</i> Alkylation	29
1.6.1.2	<i>Ortho</i> Arylation	30
1.6.2	Postcatalytic Intramolecular Addition to Norbornyl Moiety	31
1.7	Summary	32
	References	33
2	Diverse <i>Ips</i>o Arene Functionalization by the Palladium/Norbornene Cooperative Catalysis	45
	<i>Bo-Sheng Zhang and Yong-Min Liang</i>	
2.1	Introduction	45
2.2	<i>Ips</i> o Functionalization Reaction in the Pd/NBE Catalytic Cycle	46
2.2.1	The Role of <i>Ips</i> o Functionalization Reaction in the Catalytic Cycle	46
2.2.2	Competitive or Side Reactions of <i>Ips</i> o Functionalization	46
2.2.2.1	Competitive Pathways Between <i>Ips</i> o Functionalization and NBE Insertion	46
2.2.2.2	Compatibility Between Electrophile Reagents and <i>Ips</i> o Functionalization Reagents	48
2.2.2.3	Process of NBE Extrusion and <i>Ips</i> o Functionalization	49
2.2.2.4	Dehalogenation Reaction and <i>Ips</i> o Functionalization Reaction	51
2.3	Type of <i>Ips</i> o Functionalization Reactions	52
2.3.1	Alkenylation Reaction	52
2.3.1.1	Heck Coupling	52
2.3.1.2	Carbene Coupling	58
2.3.1.3	Allenylation Reaction	59
2.3.2	Alkynylation Reactions (Sonogashira Coupling)	61
2.3.3	Arylation Reactions	61
2.3.3.1	Suzuki Coupling	61
2.3.3.2	<i>Ips</i> o C–H Arylation	64
2.3.3.3	Decarboxylation Coupling Reaction	67
2.3.4	Alkylation Reaction	67
2.3.4.1	Coupling Reaction of Boron Reagents	67
2.3.4.2	Coupling Reaction of Germanium Reagents	67
2.3.4.3	<i>Ips</i> o Ketone α -Arylation	69
2.3.4.4	C–H Activation of Inert Alkyl Groups	71
2.3.4.5	The C—C Bond Cleavage Reaction	71
2.3.4.6	The 1,4-Pd Shift	72
2.3.5	Hydrogenation Reaction	74
2.3.6	Cyanation Reaction	74
2.3.7	Borylation Reaction	76

2.3.8	The Construction of C—N Bond	76
2.3.9	The Construction of C—O Bond	76
2.3.10	The Construction of C—S or C—Se Bonds	78
2.3.11	<i>Ips</i> o Iodination	79
2.4	Prospects and Challenges of <i>Ips</i> o Functionalization	80
	References	81
3	Diverse <i>Ortho</i> C—H Functionalization by the Palladium/Norbornene Cooperative Catalysis	89
	<i>Xin Liu and Guangbin Dong</i>	
3.1	Introduction	89
3.2	Carbon-Electrophile	91
3.2.1	<i>Ortho</i> Alkylation	91
3.2.1.1	Alkylation Using Alkyl Halides	91
3.2.1.2	Alkylation Using Methyl Sulfonates, Trimethylphosphate, and Phenyltrimethylammonium Salt	92
3.2.1.3	Annulation Using 2 <i>H</i> -Azirines	96
3.2.1.4	Alkylation Using Epoxides	97
3.2.1.5	Alkylation Using Aziridines	97
3.2.1.6	Alkylation Using Ethers and TMSI	98
3.2.2	<i>Ortho</i> Arylation	99
3.2.2.1	“ <i>Ortho</i> Effect” in the Pd/NBE Catalysis	99
3.2.2.2	Arylation Using Aryl Halides	101
3.2.2.3	Homo <i>Ortho</i> Arylation	103
3.2.2.4	Cross <i>Ortho</i> Arylation and the Chelating Effect	103
3.2.2.5	Arylation Using Aryl Diazonium Salts	105
3.2.3	<i>Ortho</i> Acylation	107
3.2.3.1	Acylation Using Acid (Mixed) Anhydrides, Acid Chlorides, and Carboxylic Acids	107
3.2.3.2	Carboxylation Using Thioesters and Selenides	109
3.2.3.3	Alkoxy carbonylation and Aminocarbonylation	110
3.3	Nitrogen-Electrophile	112
3.3.1	<i>Ortho</i> Amination	112
3.3.1.1	Amination Using <i>N</i> -Benzoyloxyamines	113
3.3.1.2	Amination Using Dialkylamino Carbonates	114
3.4	Sulfur-Electrophile	116
3.4.1	<i>Ortho</i> Thiolation	116
3.4.1.1	Thiolation Using Aryl or Alkyl Thiosulfonates	116
3.4.1.2	Thiolation Using Aryl or Alkyl Sulfenamides	116
3.5	Oxygen-Electrophile	117
3.5.1	<i>Ortho</i> Alkoxylation	117
3.6	Conclusion and Outlook	119
	References	121

7.5.1	Partially Aromatic Substrates	252
7.5.2	α -Alkylation and Arylation of Alkenyl Triflates and Bromides	253
7.5.3	α -Amination of Alkenyl Triflates: Formal Carbonyl 1,2-Transposition	255
7.5.4	α -Carbamoylation of Alkenyl Triflates	257
7.5.5	Distal Alkenyl C—H Bond Functionalization	258
7.6	Conclusions and Outlook	260
	Acknowledgments	260
	References	261
8	Application of the Palladium/Norbornene Cooperative Catalysis to Synthesis of Natural Products and Materials	265
	<i>Jianchun Wang</i>	
8.1	Applications in Synthesis of Natural Products and Drugs	265
8.1.1	Synthesis Using <i>Ortho</i> Functionalization of Aryl Halides	265
8.1.1.1	Synthesis Using <i>Ortho</i> Alkylation Reactions	267
8.1.1.2	Synthesis Using <i>Ortho</i> Arylation Reactions	273
8.1.1.3	Synthesis Using <i>Ortho</i> Amination Reactions	275
8.1.1.4	Synthesis Using <i>Ortho</i> Acylation Reactions	277
8.1.2	Synthesis Using 2-Alkylation of Indoles	279
8.1.3	Synthesis Using <i>Ortho</i> Functionalization of Vinyl Substrates	283
8.2	Applications in Synthesis of Organic Aromatic Materials	284
8.3	Summary	290
	References	291
