1	Introduction	1
1.1	DC Motors (Direct Current Motors)	1
1.2	The AC System (Alternating Current)	5
1.2.1	Single-Phase AC	5
1.2.2	Poly-Phase AC	6
1.2.3	AC Motors	7
1.3	Electric Power Transmission	9
1.4	Batteries	10
1.5	Variable Speed Drives	11
1.6	Electromobility	12
2	Drives for Electric Vehicles	17
2.1	Speed/Torque Characteristics of Internal Combustion Engines	18
2.2	Speed/Torque Characteristics of Electric Drives	21
2.3	Limits of Operation	21
2.3.1	Maximum Motor Voltage $U_{\max}$	22
2.3.2	Maximum Motor Current $I_{\max}$	23
2.3.3	Thermal Limits of Continuous Operation	23
2.3.4	Thermal Limits of Short-Time Operation	24
2.4	Performance Characteristics of Electric Motors	24
2.4.1	Base Speed Range	24
2.4.2	Field Weakening Range	25
2.4.3	Breakdown Torque	25
2.4.4	Practical Example of an Electric Drive	26
2.5	Electric Motors for All-Electric and Hybrid Drivetrains	27
2.5.1	Gearbox-Integrated Electric Machines (GEM)	28
2.5.2	Traction Electric Machines (TEM)	28
2.5.3	Belt Starter Generators (BSG)	29
2.6	Gearboxes	30
2.6.1	Multi-speed Gearboxes	31
2.6.2	Automatic Transmissions	32

	2.6.3	Continuously Variable Transmissions	33
2.7		Electric Drivetrains	33
	2.7.1	Gearboxes for Electric Traction Motors (TEM)	33
	2.7.2	Powertrain Configuration	35
	2.7.3	Wheel Hub Drives	36
	2.7.4	Wheel Drives	39
	2.7.5	Axle Drive	39
3		Hybrid Vehicle Drives	41
3.1		Fundamentals	41
3.2		Voltage Classes	42
3.3		Hybrid Vehicle Types	45
	3.3.1	Micro-Hybrid (MCHEV)	45
	3.3.2	Mild-Hybrid (MHEV)	46
	3.3.3	Full-Hybrid (FHEV)	46
	3.3.4	Plug-In-Hybrid (PHEV)	47
3.4		Hybrid Modes of Operation	48
	3.4.1	Load Point Shifting	48
	3.4.2	Fuel Consumption Map of ICE	48
	3.4.3	Load Point Shifting Using a Gearbox	50
	3.4.4	Load Point Increase by an Electric Motor	51
	3.4.5	Load Point Decrease by an Electric Motor	53
	3.4.6	Boosting	53
	3.4.7	Sailing	53
3.5		Hybrid Drive Structures	54
	3.5.1	Serial Hybrid	55
	3.5.2	Range Extender	57
	3.5.3	Parallel Hybrid	58
	3.5.4	Single-Shaft Parallel Hybrid/Torque Addition	58
	3.5.5	Twin-Shaft Parallel Hybrid/Speed Addition	60
	3.5.6	Trough-The-Road Hybrid (TTR)	61
	3.5.7	Power-Split Hybrid	62
	3.5.8	Input-Split Hybrid	66
	3.5.9	Output-Split Hybrid	71
	3.5.10	Compound-Split Hybrid	74
	3.5.11	Summary Hybrid Drives	76
4		Driving Resistances and Energy Consumption	79
4.1		Driving Resistance Force	79
	4.1.1	Aerodynamic Resistance	80
	4.1.2	Rolling Resistance	82
	4.1.3	Fuel Economy at Higher Speeds	82
	4.1.4	Climbing Resistance	84
	4.1.5	Acceleration Resistance	84
	4.1.6	Summary	85

4.2	Energy and Power Flow	85
4.3	Auxiliary Consumers	86
4.3.1	Heating	87
4.3.2	Heat Pumps	88
4.3.3	Other Auxiliary Units	88
4.4	Braking Energy Recovery	90
4.4.1	One-Pedal Driving	92
4.5	Driving Cycles	93
4.5.1	NEDC for ICE-Cars	94
4.5.2	NEDC for Hybrid Cars	96
4.5.3	WLTP for ICE Cars	97
4.5.4	Real Driving Emissions	98
4.5.5	WLTP for Hybrid Cars	99
4.5.6	FTP-72 (UDDS) and FTP-75 (Federal Test Procedure)	102
4.5.7	CADC (Common Artemis Driving Cycle).	102
4.5.8	10–15 Mode/JC08	102
4.6	Deviations Between Tested and Real Driving Fuel Consumption	103
4.7	CO ₂ Efficiency Classes	104
4.8	Typical Energy Consumption of Vehicles	106
4.8.1	Bicycles	106
4.8.2	ICE Passenger Cars	106
4.8.3	BEV Passenger Cars	106
4.8.4	FCEV Passenger Cars	107
4.8.5	Trucks and Busses	108
4.8.6	Ships	109
5	Operating Strategy	111
5.1	Optimization of the Operating Strategy	112
5.1.1	Rule-Based Optimization	112
5.1.2	Online Optimization	112
5.2	Predictive Operating Strategy	114
5.3	Driver Interaction	114
5.3.1	Visualization of Vehicle Status	114
5.3.2	Consideration of Driver Input	115
5.3.3	Accelerator Pedal	117
6	Energy Storage Systems	119
6.1	Terms and Definitions	120
6.2	Electrochemical Storage Systems in Comparison	123
6.3	Basics of Battery Cells	126
6.3.1	Design and Functional Principle	126
6.3.2	Battery Losses	128
6.3.3	Battery Voltage	128

6.3.4	Simple Behavior-Based Battery Models	131
6.3.5	Battery Lifetime	131
6.3.6	Available Power and Energy	135
6.3.7	Battery Packages	137
6.3.8	Battery Safety	141
6.4	Lead-Acid Batteries	144
6.5	Nickel–Metal Hydride Batteries (NiMH)	145
6.6	Vanadium Redox Flow Batteries	145
6.7	Lithium-Ion Batteries	146
6.7.1	Introduction	146
6.7.2	Components and Operating Principles	147
6.7.3	Equivalent Circuit Diagram and Performance	149
6.7.4	Cathode Materials (Positive Electrode)	153
6.7.5	Anode Materials (Negative Electrode)	156
6.7.6	Lithium Plating and Dendrite Formation	157
6.7.7	Electrolyte and Conducting Salt	157
6.7.8	Solid Electrolyte Interphase (SEI)	158
6.7.9	Separators	159
6.7.10	Lithium Polymer Batteries (LiPo)	159
6.7.11	Solid-State Batteries	160
6.8	Lithium Sulfur Batteries	161
6.9	Sodium-Ion Batteries	162
6.10	Metal Air Batteries	162
6.11	Battery Charging	163
6.11.1	Constant Current, Constant Voltage Charging (CCCV)	163
6.11.2	Improved CCCV with Adaptive Current	164
6.11.3	Pulse and Step Charging	167
6.12	Balancing	167
6.13	Battery Management System	170
6.14	Battery Pack	170
6.15	Hydrogen	173
6.15.1	Chemical Properties of Hydrogen	173
6.15.2	Fuel Cells	175
6.15.3	Fuel Cell System	177
6.15.4	Operating Characteristics	179
6.15.5	Hydrogen Storage Systems	180
6.16	Other Short-Time Energy Storage Systems	184
6.17	Fire Hazard of Cars	185
6.18	Summary of Energy Storage Systems for Vehicles	187
7	Fundamentals of Electric Machines	191
7.1	Introduction	191
7.2	Operating Principle	192
7.3	Three-Phase Current (Rotary Current)	193

7.4	Three-Phase Electric Machines	197
7.4.1	Permanent Magnet Synchronous Machine (PMSM)	198
7.4.2	Electrically Excited Synchronous Machine (EESM)	200
7.4.3	Induction Machine (IM).	202
7.5	Types of Electric Machines	205
7.5.1	Rotating Field Machines	205
7.5.2	Stationary Field Machines	206
7.5.3	Alternating Field Machines	207
7.5.4	Axial Flux Machines	207
7.5.5	Transverse Flux Machines	209
7.6	Design of Electric Machines	211
7.6.1	Mechanical Design.	211
7.6.2	Windings	213
7.6.3	Rotors.	216
7.7	Voltage Induction.	219
7.8	Magnetic Forces.	221
7.8.1	Lorentz Force.	222
7.8.2	Power Density	223
7.8.3	Reluctance Force	225
7.9	Base Speed Range (Constant Torque Range).	226
7.10	Field Weakening Range (Constant Power Range).	227
7.11	Materials	227
7.11.1	Conductor Materials.	227
7.11.2	Ferromagnetic Materials	230
7.11.3	Iron Losses.	233
7.11.4	Hard Magnetic Materials	236
7.12	Losses and Efficiency	240
7.13	Cooling.	243
8	Synchronous Machines	247
8.1	The d/q Coordinate System	247
8.2	Mathematical Model	251
8.3	Torque Creation	253
8.3.1	Synchronous Torque and Reluctance Torque.	253
8.3.2	Rotor Design	255
8.4	Current Control Angle	257
8.5	Parameter Plane	258
8.6	Special Operating Conditions	260
8.6.1	Open Circuit.	260
8.6.2	Active Short Circuit	260
9	Induction Machines (IM)	261
9.1	Single-Phase Equivalent Circuit Diagram	262
9.2	Operating Characteristics.	264

10	Power Electronic Components	267
10.1	Semiconductors	267
10.1.1	Diodes	268
10.1.2	Power Electronic Switches	270
10.2	Wide Bandgap Semiconductors	282
10.2.1	Gallium Nitride (GaN)	283
10.2.2	Silicon Carbide (SiC)	284
10.2.3	Gallium Arsenide (GaAs)	285
11	Topology of Electric Drivetrains	287
11.1	Drivetrain Components	287
11.2	DC/AC Converter (Frequency Inverter)	289
11.2.1	Fundamentals of PWM	289
11.2.2	Single-Phase Circuit	291
11.2.3	Three-Phase Circuit	293
11.2.4	Sine-Triangle Modulation	294
11.2.5	Common-Mode Voltage	295
11.3	Motor Control	297
11.3.1	Rotor-Flux-Oriented Control of Synchronous Machines	297
11.3.2	Offline Determination of Set Currents	298
11.3.3	Id/Iq Current Plane	301
11.3.4	Rotor-Flux-Oriented Control of Induction Machines	305
11.4	DC/DC Converter (DC Voltage Controller)	306
11.4.1	Electric Circuit	307
11.4.2	Boost Converter	307
11.4.3	Buck Converter	308
11.5	Effects in the Motor Due to Switching Voltages	309
12	Charging Systems	311
12.1	Introduction	311
12.2	Structure of the On-Board Charging System	312
12.2.1	On-Board AC Charging	312
12.2.2	DC Charging	313
12.2.3	On-Board AC Inverter Charging	314
12.2.4	Electrical Safety	314
12.3	Charging Power and Charging Time	315
12.4	Charging Losses	319
12.5	Charging Systems for Cars and Light Commercial Vehicles	319
12.5.1	Europe	319
12.5.2	USA	321
12.5.3	Japan	322
12.5.4	Korea	322

	12.5.5	China	322
	12.5.6	Other Countries	323
12.6		Battery Swapping	324
12.7		IEC Type 1 and 2 and CCS Charging Standards	324
	12.7.1	AC Charging Modes	327
	12.7.2	AC Charging Communication	327
	12.7.3	Combined Charging System (CCS)	329
	12.7.4	High-Level Charging Communication	329
	12.7.5	Charging Authorization	331
12.8		CHAdemo	333
12.9		ChaoJi (CHAdemo 3.0)	333
12.10		Tesla Charging Standard	334
12.11		Charging Systems for Medium- and Heavy-Duty Vehicles	335
	12.11.1	OppCharge	335
	12.11.2	Catenary Systems	335
	12.11.3	Megawatt Charging System (MCS)	336
12.12		Contactless Inductive Charging	336
	12.12.1	Technology	338
12.13		Hydrogen Filling Stations	339
	12.13.1	Technology	340
13		Framework of Individual Mobility	343
13.1		Introduction	343
13.2		Climate Protection	345
	13.2.1	Sustainability	345
	13.2.2	Global Climate	345
	13.2.3	Final Energy Consumption in Germany	346
	13.2.4	Anthropogenic Emissions of Pollutants	347
	13.2.5	Climate Protection Targets	348
13.3		Megacities	350
13.4		Car Fleets	350
	13.4.1	Fuel Economy of Cars in Germany	350
	13.4.2	Global Fuel Economy of Cars	351
	13.4.3	Stock of Cars	352
	13.4.4	Traffic Volume	355
	13.4.5	Daily Mileage of Cars	355
13.5		Electrical Energy	357
	13.5.1	The Global Picture	357
	13.5.2	Trends in Green Electricity Production	360
	13.5.3	Electricity Production in Germany	361
	13.5.4	Cost and Price of Electricity	363
	13.5.5	Electricity Demand for Electromobility	364
13.6		Raw Materials	366
	13.6.1	Lithium	366

13.6.2	Copper	368
13.6.3	Rare Earths.	370
13.6.4	Cobalt.	372
13.6.5	Nickel.	373
13.6.6	Manganese	374
13.6.7	Phosphate.	374
13.6.8	Summary Raw Materials	374
13.7	Second Life (Re-Use)	374
13.8	Recycling	376
14	Production and Distribution of Energy.	379
14.1	Introduction	379
14.2	Crude Oil- and Natural Gas-Based Fuels.	380
14.2.1	Properties	380
14.2.2	Crude Oil Production	381
14.2.3	Gas	382
14.2.4	Natural Gas Production	384
14.3	Synthetic Fuels.	384
14.3.1	Non-sustainable Synthetic Fuels	385
14.3.2	Sustainable Synthetic Biofuels	385
14.3.3	Electricity-Generated Fuels (e-fuels).	387
14.4	Electrical Energy	390
14.4.1	Grids.	390
14.4.2	High-Voltage Grids	391
14.4.3	Micro-Grids	397
14.4.4	Smart Charging	398
14.4.5	Local Electricity Production by PV	400
14.4.6	Home Battery Storage	401
14.4.7	Short-Time Electricity Storage Systems	402
14.4.8	Seasonal Electricity Storage Systems	404
14.4.9	Emission Factors of Power Generation Plants.	405
14.5	Hydrogen	405
14.5.1	Hydrogen Production.	406
14.5.2	Supply of Hydrogen Filling Stations	412
14.5.3	Utilization of Green Hydrogen	414
14.6	Summary	419
15	Life-Cycle Assessment	421
15.1	Pollutants and Environmental Impacts	421
15.2	Well-to-Wheel Analysis	423
15.3	Well-to-Wheel Analysis Examples	425
15.3.1	Vehicles with Piston Engines.	425
15.3.2	Fuel Cell Electric Vehicles.	425
15.3.3	Battery Electric Vehicles	425
15.3.4	Summary	426

15.4	Life-Cycle Analysis	427
15.4.1	Emissions During Vehicle Production	430
15.5	Lice-Cycle Analysis of Average Passenger Cars	432
16	Costs of Electric Mobility	435
16.1	Cost of Vehicle and Battery Production	436
16.2	BEV Charging Points for the Whole Car Fleet of Germany	437
16.2.1	Required Number of Charging Points	438
16.2.2	Required Investment	441
16.2.3	Costs of Public Charging	443
16.3	Service and Maintenance of Battery Electric Vehicles	445
16.4	Summary	446
	Electromagnetic Fundamentals	447
	Closing Words	475
	Glossary	479
	Index	485
