

Contents

1.1 Apicomplexan parasites	10
1.2 <i>Cryptosporidium parvum</i>	11
1.3 Life cycle of <i>Cryptosporidium parvum</i> and host-parasite transmission routes.....	12
1.4 Cryptosporidiosis in One Health.....	13
1.5. Economic impact, clinic and control of ruminant cryptosporidiosis	14
1.6 Host innate immune responses.....	15
1.7 PMN, monocytes and dendritic cells (DC) and their role within host immune system	16
1.8 Differences of mammalian PMN	18
1.9 Neutrophil extracellular traps (NETs).....	19
1.10 Suicidal NETosis versus vital NETosis	21
1.11 NOX-dependent NETosis	22
1.12 NOX-independent NETosis	22
1.13 Pathogenesis and innate immune reactions during cryptosporidiosis	23
1.14 Cryptosporidiosis in Germany	24
2. ATP PURINERGIC RECEPTOR P2X1-DEPENDENT SUICIDAL NETOSIS INDUCED BY CRYPTOSPORIDIUM PARVUM UNDER PHYSIOXIA CONDITIONS	26
3. MCT-DEPENDENT CRYPTOSPORIDIUM PARVUM INDUCED BOVINE MONOCYTE EXTRACELLULAR TRAPS (METs) UNDER PHYSIOXIA	47
4. GENERAL DISCUSSION AND OUTLOOK	68
5. ZUSAMMENFASSUNG	76
6. ABSTRACT	79
7. REFERENCES.....	82
8. SUPPLEMENTARY DATA	105
<i>CRYPTOSPORIDIUM PARVUM</i> -INDUCED NEUTROPHIL EXTRACELLULAR TRAPS IN NEONATAL CALVES IS A STAGE-INDEPENDENT PROCESS.....	105
HUMAN DENDRITIC CELL INTERACTIONs WITH THE ZOONOTIC PARASITE <i>CRYPTOSPORIDIUM PARVUM</i> RESULT IN ACTIVATION AND MATURATION	118
9. ACKNOWLEDGEMENT.....	149
10. DECLARATION.....	150
