

# CONTENTS

Introduction	7
<b>1. NATURE AND TECHNOLOGY</b>	<b>17</b>
<b>1.1 How Nature Helps</b>	<b>18</b>
Biosystems Absorb More CO <sub>2</sub>	19
The Carbon Cycle is out of Sync	24
Maintaining and expanding nature's absorption capacity	30
Reducing methane emissions	35
<b>2.2 Why Carbon Capture is a Game Changer</b>	<b>41</b>
Renewable Energy in Former Times	42
Renewables Today	47
Attention Volatility	52
Electrons and Molecules—Climate-Friendly Mobility	55
The Material World of the Industrial Age	64
Carbon Capture	69
Coal-fired Power Plants—the Elephant in the Room	77
Fossils and the Spaceship Earth	80
<b>1.3 Why All-Electric is Illusionary</b>	<b>83</b>
How Far Will Electrification Go?	84
The “German Energiewende”	89
Two Pillars for One Energy System	91
Phasing Out Fossil Energies or Fossil CO <sub>2</sub> Emissions?	93
Political and Economic Hurdles	96
<b>2. STARTING POINT AND SOLUTION FRAMEWORK</b>	<b>101</b>
<b>2.1 Where we Stand</b>	<b>102</b>
We are Late, but it isn't too Late to Act	103
What a Good World Should Look Like	108
The Weaknesses of the Paris Climate Protection Agreement	109
<b>2.2 How the World is Made Up</b>	<b>115</b>
Energy for Rich and Poor	116
The Extended OECD	119
The China Club	121
The Challenge Group	124

<b>2.3 The Ideal Scenario for the World</b>	<b>129</b>
Three Possible Futures	130
What We Want	133
Realism	135
 <b>3. ACTION PROGRAMS AND FINANCING</b>	 <b>139</b>
<b>3.1 What Has to be Done</b>	<b>140</b>
No Simple Solutions	141
What are Other Voices Saying?	143
Action Programs of the Reference Solution	147
The Costs of the Reference Solution	162
<b>3.2 How Financing is Possible</b>	<b>165</b>
Financing for the Global South	167
Are the Costs of the Reference Solution Affordable?	173
The German Energiewende—A Pure Waste of Money	175
A New Cap-and-Trade System	177
<b>3.3 How to Make German Energiewende in the Electricity Sector Affordable</b>	<b>184</b>
Where do we Stand? What is Planned?	185
What will Happen to Electricity Demand?	193
50 Percent Wind and Solar Energy is Enough	195
The Optimum Ratio of Wind and Solar Energy	197
Reliable and Manageable Energy	198
The CO <sub>2</sub> Transport Network is Coming	200
The Savings Potential of ALL IN! in the German Electricity Sector	201
 <b>4. GRAPHICS AND FIGURES</b>	 <b>203</b>
 <b>5. CONCLUSION AND OUTLOOK</b>	 <b>237</b>
Notes	244
Authors, Team and Acknowledgements	258
Testimonials	265
