

Contents

Acknowledgements — VII

Preface — IX

Chapter 1
General Introduction — 1

Part I: Understanding the Dynamics of Technological Change and its Strategic Consequences

Chapter 2
A Simplified Smooth View of Technological Substitution — 23

Chapter 3
The Abernathy-Utterback (A-U) Model — 33

Chapter 4
The Process of Technological Substitution and the S-curve — 38

Chapter 5
A Continuum of the Intensity of Technological Change — 47

Chapter 6
The Strategic Consequences of Technological Change — 52

Chapter 7
**Qualifying the Intensity and Strategic Significance of Technological
Change — 56**

Chapter 8
The Dual Technology Tree — 60

Chapter 9
The Customer Concept Tree (CCT) – Market Concept Formation — 74

Chapter 10
**Technology Selection, Technological Bifurcation, Small Events, Lock-in,
De-maturation — 84**

Summary of Key Points of Part I — 93

References for Part I and Further Reading — 96

Part II: Going Beyond the S-curve: Ten Patterns of Technological Substitutions

Chapter 11

Ten Patterns of Technological Substitution — 107

Chapter 12

Recap of the Ten Patterns, Interrelations and Recomposing Trajectories — 125

Chapter 13

A Model for Technological Substitutions — 131

Chapter 14

Windows of Bifurcation and Trigger Relays — 143

Chapter 15

Underlying Forces at Work behind the Patterns — 148

Summary of Key Points of Part II — 160

References for Part II and Further Reading — 162

Part III: Strategizing Technological Change via the Competence Perspective

Chapter 16

Dimensions of Competence — 173

Chapter 17

Learning, Competence Building and Leveraging — 178

Chapter 18

A Model of Organizational Competence — 183

Chapter 19
Using the Concept of Competence to Think about Technological Change Strategically — 192

Summary of Key Points of Part III — 209

References for Part III and Further Reading — 212

Part IV: Managerial Implications – Path Creation in Practice

Chapter 20
The CTO – Who is Minding the Technology Store? — 221

Chapter 21
Using the Overall Framework — 228

Chapter 22
A Final Word on the Nine Cases Used for Illustration — 247

Summary of Key points of part IV and a final word on the carbon-free methanol vs electric cars — 255

References for Part IV and Further Reading — 258

Appendix: Competencies Underlying Key Technologies for the Fourth Industrial Revolution — 261

Index — 285
